nuts, 490
soy vs. milk protein, 491, 492
whole grains, 490
healthy dietary patterns, 471
DASH diets, 481
MedDiet, 472, 478–480
MIND diet, 481
Nordic diet, 483
lifestyle factors, 505
lutein, 501
observation studies, 504, 505
RCTs, 501, 504
pathological mechanisms, 466
Age-related macular degeneration (AMD), 504
Aging related diseases, 4, 6
Alcohol consumption
prospective studies, 499, 501
systematic review and meta-analysis, 499
Aldosterone, 370
All-cause mortality, 567
Alternate Healthy Eating Index (AHEI), 40, 258, 264
Alzheimer’s disease, 477, 482
American Heart Association’s (AHA) healthy dietary criteria, 314
Ancestral fiber-rich whole foods diets, 213
Anthocyanins, 493
Antioxidant vitamins, 522
Apolipoprotein E (Apo-E), 466
Australian Blue Mountains Eye Study, 34, 35, 41

B

Beverages, 492, 496
alcohol, 420
coffee, 420
flavanol-rich cocoa beverages, 499
100% juices, 496
RCTs, 496–498
sugar and sweetened soda, 420
Biological age, 4
Blood 25-hydroxyvitamin D [25(OH)D], 577
Blood pressure (BP), 370, 390, 398–401, 448
DASH diet vs. Western-type diet, 378
fruit juice, 401, 402
fruits and vegetables intake, 398, 401
RCTs, 399–400
healthy dietary pattern mechanisms, 380
healthy lifestyle factors, 371
hypocaloric DASH-type vs. low fat weight-loss diet, 377
soy milk/cow’s milk-based diet, 403
whole vs. refined grains, 395
whole-grain RCTs, 393–395
Body mass index (BMI), 557
all-cause mortality risk, 9
body composition, 10
disability at retirement, 11
Body weight, 370
Brain-derived neurotrophic factor (BDNF), 491
Breast cancer (BC), 552, 556
lifestyle factors, 552
molecular subtype biological markers, 552
2017 World Cancer Research Fund International/American Institute of Cancer Research Continuous Update (CUP) Project Report, 556
Breast cancer risk, 566, 569–571
healthy vs. Western diets, 561
MedDiet pattern, 559
RCTs, 566
body weight, 566
healthy, low fat diets, 570
MedDiet, 570
