emergency department, 179–180
end of life anticipation, 185–186
exploration, expression, and implementation, 176
healthcare agent, 175
healthcare settings, 186–187
healthcare workforce and practices, 174
inpatient, 179
medical record, 174
myocardial infarction and class II heart failure, 180–181
outpatient, 179
palliative care, 175, 186
patient-centered outcomes, 176
physical dependence, dementia, and disability, 174
POLST, 178
processes and systems, 174
reflection, 187–189
wishes/care preferences, 176, 177
Advanced practice registered nurses (APRN), 37
Allergic sensitivity and anaphylaxis
amphetamine/dextroamphetamine, 92
anxiety, 89, 90
attention-deficit hyperactivity disorder, 93
CT scan, 91
fetal bradycardia, 89
flashing light, 90
health and safety, 89
ibuprofen capsule, 91
levetiracetam, 93
Lyme disease, 90
mood, behavior, and personality, 91
motor tics and obsessional behaviors, 90
neurological and psychiatric symptoms, 89
neuropsychology testing, 91
psychotherapy, 94
seizures, 91–93
social life, 93
verbal fluency, 91
video EEG telemetry recording, 92
Anorexia nervosa (AN), 210
adolescence, 99
anxiety/depression, 137
binge eating, 97
bioethics, 140
birth control counseling, 101, 102
brain MRI, 138
cachectic, 137
comorbidity, 135
complexity, 135
consultant, 140
CT scan, 136
diagnosis, 139
drugs, 98
Anorexia nervosa (AN) (cont.)
EEG, 139
etiologies, 141
facial, jaw, and neck muscle movement, 100
food allergy tests, 101
frontal lobe development, 101
gout, mild central obesity, and hyperlipidemia, 98
high-dose thiamine, 136
injuries and joint pain, 100
lab tests, 138
life-threatening, 135
malnutrition and hypothyroidism, 135, 136
management, 136
medical history, 136
medical insurance, 141
medications, 137
mental illness, 140
mental status examination, 137
middle-aged woman, 135
MRI scan, 138, 139
NG feedings, 141
OCPs, 97, 99–101
OMM, 98
oral medications, 139
orthodontic appliances, 98
osteopathic manipulation techniques, 98
physical therapy, 99
recovery, 99
rheumatology consultation, 98
social and sexual pressures, 101
thyroid antibodies, 101
TPN, 138, 139
urine pregnancy test, 100
weakness, 137
weight loss and food intake, 97, 99, 141
younger woman, 137
Anticoagulation, 108
Anxiety, 4, 59, 68, 69, 74, 75, 89, 90, 137, 143, 192
Arteriovenous malformations (AVMs), 106

B
Binge eating, 97
Bipolar disorder
anorexia nervosa, 116
artificial substances, 113
assessment, 115
communications, 113
confidentiality, 112
depression, 111
family sessions, 114
heroin, 113
medical testing, 111
methamphetamine, 113
monitoring, 116
PCPs, 116
privacy, 114
psychiatric consultation, 111
psychotherapy, 114
recreational drugs, 111
residential program, 115
risk, psychiatric illness, 112
substance abuse treatment programs, 112
suicide, 114
support, 115
therapeutic alliance, 112
therapeutic relationship, 113
treatment program, 114, 115
young adult, 116
Brain tumor resection, 107
