Index

A
Activation function, 135
Adaptive weighting, 41
Affine transformation, 301
AlexNet, 21, 162, 241, 242, 244, 292
Amplitudes of neural responses, 7
Anatomical features, 4, 18
Architectonical constraints, 21
Architecture of the human ventral visual stream, 19
AR face database, 194
Artificial fingers, 290
Artificial neural networks, 83
Authentic, 48
Autoencoder, 266

B
Backpropagation, 297
Backpropagation algorithm, 19
Binary face coding, 35
Binary face representations, 53
Binary hashing, 35
Biometric cryptosystem, 262
Biometric template, 268
Biometric template protection, 261
Bodylogin, 168
Boosted Hashing Forest (BHF), 33, 34, 54, 127
Boosted similarity sensitive coding, 33
Bounding-box regression, 58
Brain responses, 17
Bypass connections, 12

C
Caffe, 38, 69
Casia-iris-ageing-v5 dataset, 140
CASIA-WebFace, 34
Closed-set identification, 164
CMS-RCNN, 57, 59
CMU Multi-PIE face database, 277
CNHF, 33, 36
CNN architecture, 34
CNN-based features, 180
Code bits, 50
Collateral sulcus, 22
Complexity, 115
Computational benefit, 21
Computational models, 13, 18
Computational time, 302
Contextual multi-scale region, 57
Contrastive loss function, 254
Convergence, 297
Convolution, 273
Convolution layers, 295
Convolutional layer, 40, 295
Convolutional network, 33
Convolutional Neural Network (CNN), 58, 109, 135, 162
Cooperative, 291
Cooperative methods, 291
Cortical face network, 18
Cortical regions, 18
Cross entropy loss, 273, 277, 292
Cross-dataset experiments, 301
Cross-entropy loss function, 117
Cryptographic hash function, 261, 268
Cryptosystem, 263
Cumulative match characteristic, 249
Cumulative matching curve, 35
Cytoarchitectonic areas, 10
Cytoarchitecture, 11, 22

D
Data augmentation, 274, 301
Decoder networks, 138
Deep artificial neural network, 83
Deep belief network, 222
Deep CNNs, 19
Deep ConvNets, 62
Deep Convolutional Generative Adversarial
Networks (DCGAN), 188, 192, 207
Deep learning, 35
Deep network representation, 173
Deep neural networks, 3
Deep Siamese networks, 115
Deep triplet embedding, 293
Depiris, 137
Denoising autoencoder, 266
Developmental prosopagnosia, 22

E
Encoder, 138
Entropy, 272, 274
Euclidean loss, 37
Evoked brain responses, 14
Extended Yale Face Database B, 277

F
Face biometrics, 282
Face detection, 57, 76
Face detection data set and benchmark, 59
Face network, 17
Face perception in the human brain, 18
Face recognition, 41
Face-selective regions, 5, 6, 8, 11, 13
FaceNet, 21
Facial gender classification, 184, 185
Facial landmarking, 57
Facial region selection, 265
Fake, 294
Fake fingerprint, 293
False detection rate, 95
FAR, 48
FG1–4, 22
Filters, 19, 37
Filter type, 18
Fingerprint, 83, 287, 292, 294
Finger vein, 109, 123, 131
Flipping, 301
FMRI response, 14
Forest hashing, 35
Fractal dimension, 97
FRR, 48
Full-body gestures, 160
Fully convolutional encoder-decoder net-
works, 133
Fusiform face area, 22
Fusiform Gyrus, 22

G
Gender classification, 219
Gender-from-iris, 219, 237
Generalization capability, 114
Generative adversarial network, 192
Generative feature learning, 87
Gesture recognition, 174
Gestures, 162

H
Hamming distance, 120
Hamming embedding, 34, 35
Hand gestures, 160
Hash codes, 42
Hash digest, 262
Hash function, 276
Hashing forest, 35
Hashing function, 283
Hashing transform, 34
Human faces, 64
Human ventral face network, 4

I
IIITD database, 94
IITD database, 140
Imagenet, 165, 244
In-air hand gestures, 160
Inferior Occipital Gyrus, 23
Iris recognition, 133
Iris segmentation, 134, 149

J
Joint Bayesian formulation, 112

K
Kinect sensors, 160

L
L2 distances, 296
L2 normalization, 69
Lacunarity, 99
Latent fingerprint, 83, 102
Layers, 19
Learning rate, 300
LFW, 53
Light CNN (LCNN), 109, 115, 125
Livdet, 289
Livdet competitions, 299
Liveness, 288
Liveness detection, 287, 290, 302, 304
Liveness detection competition, 298
Local contrast phase descriptor, 298
Local region hashing, 264
Loss function, 109, 112

M
Max-feature-map, 34, 36, 114
Maximum Entropy Binary (MEB) codes, 271, 274, 278, 280
Max-pooling, 227, 295
Methods, 291
MFus-faces, 23
Mid-Fusiform Sulcus, 23
Missed detection rate, 94
Modified VGG-16, 130
Mold, 299
MSRAction3D, 179
Mugshot database, 194
Multi-class classification, 120
Multi-class face identification, 36
Multi-PIE database, 268
Multilayer neural networks, 222

N
ND-Iris-0405 database, 140
Neural architecture in the human brain, 4
Neural circuits, 4
Neural hardware, 11
Neural responses, 5
Neuroimaging research, 3
NIST SD27, 85, 94
NIST Tott-C tattoo dataset, 242

O
Occipito-Temporal Sulcus, 23
Optical flow, 162

P
Parahippocampal place area, 23
Patch images, 302
PCSO mugshot database, 183, 195
Penalizing, 48
Periocular, 187
PFus-faces/FFA-1, 23
Pinellas County Sherrif’s Office, 194
Pooling, 273
Pooling layers, 273
Population receptive field, 23
Pose variation, 70
Pre-train, 164
Precision-recall curves, 73
Presentation attacks, 287
Processing in deep CNNs, 21
Progressive CNN training, 189
Progressively trained attention shift convolutional neural networks, 183, 188
Protected template, 275

R
Random rotations, 301
Real-time face identification, 37
Recognition of faces, 3
Rectifier activation function, 277
Recurrent neural network, 184
Reference patches, 300
Region-based Convolution Neural Networks (R-CNN), 59, 62
Regularization, 275, 297
Restricted Boltzmann Machine (RBM), 83, 86, 219, 223
ROC curves, 51
Robust facial gender classification, 213

S
Security analysis, 278
Segmentation accuracy, 95
Semantic hashing, 35
SHA-512, 277
Siamese networks, 241, 242
Sigmoid activation, 274
Similarity map, 137
Soft biometrics, 184, 241
Softmax layer, 273
Softmax output layer, 36
Sparse connectivity, 226
Spatial ratio, 68
Spatial-stream, 164
Spoof false negative rate, 299
Spoof false positive rate, 299
Spoofing materials, 302, 305
Stochastic gradient descent, 300
Stochastic neighbor embedding, 159
Supervised discrete hashing, 120
Supervised hashing, 120

T
Tattoo database, 246
Tattoo detection, 242, 244, 254
Tattoo recognition technology, 243
Tattoo similarity, 253
Tattoos, 241
Template security, 282
Temporal-stream, 164
The CMU PIE database, 276
Triplet convolutional networks, 287
Triplet loss, 293
Triplet loss function, 248
Triplet similarity loss function, 125
Triplets, 297
Triplets set, 300
Two-stream convolutional neural network, 160

U
Unconstrained face recognition, 57
Unconstrained facial gender classification, 184

V
Validation error, 300
Vascular biometrics, 109
Vascular patterns, 113
Ventral face network, 3
Ventral temporal cortex, 23

Ventral visual stream, 19, 20
Verification, 164
Verification accuracy, 49
VGG, 298
VGG architectures, 292
VGG-16, 109
Visual cortex, 12

W
Weights, 19
White matter connections, 13
WIDER FACE Dataset, 59
Winder face, 70
WVU database, 94
