Index

C1-path, 45
C1-smooth path, 72
\( C \)-differentiability at a point, 9
\( \mathbb{R} \)-differentiability at a point, 9

Abel’s Theorem, 94
absolute convergence of a series of complex numbers, 90
absolute convergence of a series of functions at a point, 92
absolute convergence of a series of functions on a set, 92
absolute value of a complex number, 2
absolutely convergent series of complex numbers, 90
AC of a canonical analytic element along a path, 171
AC of an analytic element, 170
analytic continuation of a canonical analytic element along a path, 171
analytic continuation of an analytic element, 170
analytic element, 169
analytic element that admits an AC along a path, 171
analytic element that admits an analytic continuation along a path, 171
analytic elements that are ACs of each other, 170
analytic elements that are analytic continuations of each other, 170
analytic elements that are IACs of each other, 169
analytic elements that are immediate analytic continuations of each other, 169
annulus of convergence of a Laurent series, 111
argument (set-valued), 4
argument of a complex number, 3
Argument Principle, Final Version, 150
Argument Principle, Preliminary Version, 144
Arzelà-Ascoli’s Theorem, 162
canonical analytic element, 169
Casorati-Weierstrass’ Theorem for an essential singularity at \( \infty \) of a holomorphic function, 130
Casorati-Weierstrass’ Theorem for an essential singularity in \( \mathbb{C} \) of a holomorphic function, 122
Cauchy’s Criterion for sequences of complex numbers, 90
Cauchy’s Criterion for sequences of functions, 91
Cauchy’s Criterion for series of complex numbers, 90
Cauchy’s Criterion for series of functions, 92
Cauchy’s Independence of Homotopy Theorem, 69
Cauchy’s Inequalities for the coefficients of the Laurent series expansion of a holomorphic function, 114
Cauchy’s Inequalities for the coefficients of the power series expansion of a holomorphic function, 104
Cauchy’s Integral Formula, 85
Cauchy’s Integral Formula for a Disk, 80
Cauchy’s Integral Theorem, 79
Cauchy’s Residue Theorem, 132
Cauchy-Riemann equations, 10
centre of a Laurent series, 110
centre of a power series, 94
centre of an analytic element, 169
change of the argument of a holomorphic
function along the boundary of a Jordan
domain, 150
circle in \( \mathbb{C} \), 36
coefficients of a Laurent series, 110
coefficients of a power series, 94
compact subset of a metric space, 161
complex multiplication, 1
complex number, 1
complex plane, 1
conformal equivalence, 23
conformal map between domains, 23
conformal map from a domain onto a domain,
23
conformal transformation of a domain, 23
conformally equivalent domains, 23
conjugate complex number, 2
connectedness, 13
connectedness of an open subset of \( \mathbb{C} \), 12
connectedness of an open subset of \( \overline{\mathbb{C}} \), 20
constructible primitive of a holomorphic
function along any path, 61
constructing a primitive of a holomorphic
function along a \( C^1 \)-path, 52
continuous linear functional on \( H(D) \), 161
convergence (of any kind) of an expression
\( \sum_{n=-\infty}^{\infty} f_n \), 110
convergence in \( H(D) \), 160
convergence of a sequence of complex
numbers, 89
convergence of a sequence of functions at a
point, 91
convergence of a sequence of functions on a
set, 91
convergence of a series of complex numbers,
90
convergence of a series of functions at a point,
92
convergence of a series of functions on a set,
92
convergent sequence of complex numbers, 89
convergent series of complex numbers, 90
CP-homotopic paths, 63
CP-homotopy, 63
CR-equations, 10
derivative of a \( \mathbb{C} \)-differentiable function at a
point, 10
diagonal subsequence, 163
disk of convergence of a power series, 95
distance between two complex numbers, 2
divergence of a sequence of complex numbers,
89
divergence of a sequence of functions at a
point, 91
divergence of a series of complex numbers, 90
divergence of a series of functions at a point,
92
divergence of an expression \( \sum_{n=-\infty}^{\infty} f_n \), 110
divergent sequence of complex numbers, 89
divergent series of complex numbers, 90
domain in \( \mathbb{C} \), 12
domain in \( \overline{\mathbb{C}} \), 20
equal analytic elements, 169
equicontinuous subset of \( C(K, \mathbb{R}^m) \), 162
essential singularity at \( \infty \) of a holomorphic
function, 124
essential singularity in \( \mathbb{C} \) of a holomorphic
function, 115
exponential function, 3
extended complex plane, 20
field of complex numbers, 1
finite limit of a function at \( \infty \), 124
Fundamental Theorem of Algebra, 5
generalised circle, 36
Goursat’s Lemma, 56
Green’s Theorem, 79
Hausdorff length zero, 184
holomorphic extension, 13
holomorphic function, 12
holomorphic primitive, 51
holomorphically simply-connected domain,
188
homotopic paths, 65
Hurwitz’s Theorem, 164
IAC of an analytic element, 169
imaginary number, 2
imaginary part of a complex number, 1
immediate analytic continuation of an analytic
element, 169
index of a closed path in \( \mathbb{C} \setminus \{0\} \) about 0, 149
infinite limit of a function at \( \infty \), 124
infinite limit of a function at a point in \( \mathbb{C} \), 115
infinite point, 20
infinity, 20
initial point of a path, 13
integral of \( Pdx + Qdy \) over a piecewise
\( C^1 \)-path, 72
integral of \( Pdx + Qdy \) over the boundary of a
Jordan domain, 75
integral of a continuous function over a
\( C^1 \)-path, 46
integral of a continuous function over a piecewise $C^1$-path, 72
integral of a continuous function over the boundary of a triangle, 54
integral of a holomorphic function over a component of the boundary of a Jordan domain, 74
integral of a holomorphic function over any path, 61
integral of a holomorphic function over the boundary of a triangle, 54
integral of a holomorphic function over a component of the boundary of a Jordan domain, 75
isolated singular point at $\infty$ of a holomorphic function, 123
isolated singular point in $\mathbb{C}$ of a holomorphic function, 114
isolated singularity at $\infty$ of a holomorphic function, 123
isolated singularity in $\mathbb{C}$ of a holomorphic function, 114

Jordan Curve Theorem, 71
Jordan domain, 73
Jordan path, 71

Laurent series, 110
Laurent series expansion of a holomorphic function, 113
length of a $C^1$-path, 45
length of a piecewise $C^1$-path, 72
limit of a sequence of a complex numbers, 89
limit of a sequence of functions, 91
limit of a sequence of functions at a point, 91
limit superior of a sequence of real numbers, 100
Liouville’s Theorem, 109
logarithm (set-valued), 4
logarithm of a complex number, 4

Möbius transformation, 32
map conformal on a domain, 23
map into $\mathbb{C}$ conformal at a point of $\mathbb{C}$, 22
map into $\mathbb{C}$ conformal at a point of $\mathbb{C}$, 23
Maximum Modulus Principle, 153
modulus of a complex number, 2
Monodromy Theorem, 180
Montel’s Theorem, 162
Morera’s Theorem, 89

open map, 152
Open Mapping Theorem, 24
open subset of $\mathbb{C}$, 20
opposite complex number, 2
order of a pole at $\infty$ of a holomorphic function, 129

order of a pole in $\mathbb{C}$ of a holomorphic function, 121
order of a zero of a holomorphic function, 121
oriented angle between paths, 21
oriented angle between vectors, 21
parametrisation of a component of the boundary of a Jordan domain, 74
parametrisation of a component of the boundary of a Jordan domain that agrees with the standard orientation on the component, 74
partial sums of a series of complex numbers, 90
partial sums of a series of functions, 92
path CP-homotopic to another path, 63
path homotopic to another path, 65
path in a subset of $\mathbb{C}$, 12
path in a subset of $\mathbb{C}$ joining a pair of points, 12
path in a subset of $\overline{\mathbb{C}}$, 20
path in a subset of $\overline{\mathbb{C}}$ joining a pair of points, 20
path PCE-homotopic to another path, 62
path smooth at a point, 21
path-connectedness, 13
paths homotopic as closed paths, 63
paths homotopic as paths with common endpoints, 62
PCE-homotopic paths, 62
PCE-homotopy, 62
piecewise $C^1$-path, 71
piecewise $C^1$-smooth path, 72
pointwise bounded subset of $C(K, \mathbb{R}^m)$, 162
pole at $\infty$ of a holomorphic function, 124
pole in $\mathbb{C}$ of a holomorphic function, 115
power (set-valued), 4
power of a complex number, 4
power series, 94
power series expansion of a holomorphic function, 103
pre-compact subset of a metric space, 161
primitive of a continuous function along a $C^1$-path, 51
principal part of a Laurent series expansion for an isolated singularity at $\infty$ of a holomorphic function, 125
principal part of the Laurent series expansion for an isolated singularity in $\mathbb{C}$ of a holomorphic function, 119
radius of an analytic element, 169
radius of convergence of a power series, 95
ratio of two complex numbers, 2
re-expansion of a power-series, 170
real number, 2
real part of a complex number, 1
reciprocal of a complex number, 2
regular part of a Laurent series expansion
for an isolated singularity at $\infty$ of a
holomorphic function, 119
regular part of the Laurent series expansion
for an isolated singularity in $\mathbb{C}$ of a
holomorphic function, 125
removable singularity at $\infty$ of a holomorphic
function, 124
removable singularity in $\mathbb{C}$ of a holomorphic
function, 114
residue at an isolated singularity at $\infty$ of a
holomorphic function, 131
residue at an isolated singularity in $\mathbb{C}$ of a
holomorphic function, 131
result of the AC of a canonical analytic element
along a path, 173
result of the analytic continuation of a
canonical analytic element along a path, 173
reversal of a path, 47
reversing the orientation of a path, 47
Riemann Mapping Theorem, 65
Riemann Mapping Theorem, Final Version, 188
Riemann sphere, 20
roots of a complex number, 4
Rouché’s Theorem, 151
Schwarz’s Lemma, 159
sequence of complex numbers converging to
$\infty$, 123
sequence of functions convergent at a point, 91
sequence of functions convergent on a set, 91
sequence of functions divergent at a point, 91
sequence of functions uniformly convergent
inside a domain, 92
sequence of functions uniformly convergent on
a set, 91
sequentially compact subset, 161
series of functions absolutely convergent at a
point, 92
series of functions absolutely convergent on a
set, 92
series of functions convergent at a point, 92
series of functions convergent on a set, 92
series of functions divergent at a point, 92
series of functions uniformly convergent inside
a domain, 92
series of functions uniformly convergent on a
set, 92
set of Hausdorff length zero, 184
simple pole at $\infty$ of a holomorphic function, 129
simple pole in $\mathbb{C}$ of a holomorphic function, 121
simple zero of a holomorphic function, 121
simply-connected domain in $\overline{\mathbb{C}}$, 65
standard orientation on a component of the
boundary of a Jordan domain, 74
stereographic projection, 20
sum of a series of complex numbers, 90
sum of a series of functions, 92
sum of a series of functions at a point, 92
sum of an expression $\sum_{n=-\infty}^{\infty} f_n$, 110
sum of an expression $\sum_{n=-\infty}^{\infty} f_n$ at a point, 110
symmetry with respect to a circle, 37
tangent vector to a path, 21
Taylor series of a holomorphic function, 102
terminal point of a path, 13
trigonometric functions (basic), 13
uniform convergence of a sequence of
functions inside a domain, 92
uniform convergence of a sequence of
functions on a set, 91
uniform convergence of a series of functions
inside a domain, 92
uniform convergence of a series of functions
on a set, 92
uniform limit of a sequence of functions on a
set, 91
uniform sum of a series of functions on a set, 92
Uniqueness Theorem, 104
unit disk, 2
Weierstrass’ M-Test for a series of complex
numbers, 91
Weierstrass’ M-Test for series of functions, 92
