Index

A
Active learners, 214
Active learning, 190, 192
  ambiguity aversion, 218
  benefits, 4
  children’s question asking, 7
  cognitive development principles, 5
  cognitive functions, 227
  curiosity and information, 5
  curiosity-driven model, 216
  exploratory decisions, 217
  feedback stay condition, 218
  feedback switch condition, 218, 219
  internal vs. external factors, 5
  metacognitive judgments, 4
  no-feedback condition, 218
  Piaget’s theory, 5
  preschoolers, 7
  pretend play, 6
  social interaction, 4
  task designs, 216
  and teaching, 227
  variability sources, 8
  verbal information, 4
  visual attention, 216
Active learning process
  curiosity research, 79
  deprivation and interest, 81
  information gap theory, 80
  information-seeking behaviors, 77
  lexical ignorance, 78
  metacognitive ability, 77
  metacognitive monitoring skills, 77
  nonverbal behaviors, 76
  preschoolers, 75
  researchers, 76
  self-guided exploration, 80
  social pragmatic constraints, 79
  trait levels, 81
  word meaning, 76
  Apprenticeship, 240
  Authoritarian value, 141

B
Babbling, 20–22
Bilingualism
  academic difficulties, 242
  attentional control to competing cues, 235
  belief, 244
  code-switching, 237
  cognitive flexibility, 235
  disparity, 243
  EF, 234, 237
  high SES parents, 243
  linguistic and metalinguistic skills, 237, 238
  low SES parents, 243
  mediation analysis, 243
  perspective taking, 236
  preschool children, 241
  SES, 234, 235
  vocabulary growth, 244
  vocabulary knowledge, 242

C
Causal explanation development, 114, 122
Causal learning
  explanation and, 115–119
  and problem solving, 122

M. M. Saylor, P. A. Ganea (eds.), Active Learning from Infancy to Childhood, https://doi.org/10.1007/978-3-319-77182-3
in early life, 16–18
individual’s ability, 15
knowledge-gap model, 14
local learning progress, 14
neuroimaging studies, 15
pointing gesture, 22–24, 26
Infant vocalising, 20
Informal teaching, 195
Informants selection
decision-making, 220, 221
learning concepts, 221
novel toy, 219
preschooler, 221
social savvy reasoning, 220
Information gain, 216, 218, 221, 227
Information-seeking, 4, 5, 7, 9, 14, 17, 30, 78, 80–82
Information-seeking skills, 82–89

K
Knowledge attributions, 134, 135

L
Language brokering, 234, 239–241
Language development
changes, 45
contingency detection, 41–42
object manipulation, 43–44
perceptual and social feedback, 39
real-time behaviors, 42
skills, 40
social experiences, 40
statistical learning, 40–41
transactional processes, 40
vocalizations and gestures, 42–43
Language input
caregivers, 45
phonological, semantic and grammatical
regularities, 40
Language pragmatics, 238
Learning concept, 66–69
Learning conversations
information and learning, 209
initiation, 207–208
maintenance, 208–209
preparation, 207
Lexico-semantic representations, 148, 151, 159
Linguistic testimony
belief, 168
trusted adult, 168
Locomotor skills, 47, 48

M
Maternal responsiveness, 44
Metacognitive monitoring skills, 77–79, 89
Monolinguals, 235
Motor skills development, 47–48

N
N200, 153–155
N400, 154, 155, 160
Naïve theory, 215
Natural pedagogy theory, 159
Non-cry prelinguistic vocalisations, 21

O
Object manipulation, 43–44
Object play, 43–44

P
Parent-child book read, 245, 247, 249
Parent-child conversations
animals and animal-like artifacts, 190
animate and inanimate pronouns, 196
anthropomorphic portrayals, animals and
artifacts, 192
anthropomorphism and
anthropocentrism, 191
domain-specific processes, 197
domain-specific processes, 191
ontological distinctions, 191
parental responses, 204–206
preschoolers, 191
proportion of pronouns, 203
prototypical living and nonliving
kinds, 196
robotic dog, 201–202
sea star, 198–200
semi-structured play session, 196
stuffed animal toy, 200–201
verbal “testimony”, 191
Peabody Picture Vocabulary Test 4
(PPVT-4), 88
Piaget model, 5
Play and language development
concrete to decontextualized talk, 46
exploration to symbolic play, 45
in gestures, 45
simple words to grammatical complexity, 46
vocabulary growth, 46
Pointing gesture, 22–24, 26
Preschoolers

explore-exploit decisions, 218
information seeking behaviors, 221
speech productions, 221

Problem solving

and explanation, 119–122
Proximate mechanisms, 149

Q

Question-asking, 77, 82, 83, 88, 89

R

Reasoning abilities, 215
Reliability assessments, 133
Religious cognition

adult testimony, 175
evidence of God, 176
fantastical narratives, 176
hypothesis testing, 177
naturalistic stories, 176
physical possibility, 177
religious narratives, 176
supernatural agents, 175
Robotic dog, 201–202

S

Scientific reasoning tasks, 121
Scientific understanding, 170, 175, 180
Selective social learning

behavioral evidence, 148
cognitive mechanisms, 149
cultural models, 149
ERPs, 148
evolutionary theories, 148, 149
eye-tracking, 148
labeling event, 148, 150
lexico-semantic representation, 148
proximate mechanisms, 149
semantic representation, 150
Selective trust, 139, 140, 170
Semantic-blocking, 151–153
behavioral

comprehension test, 151–153
word-referent links, 151
ERPs, 153–155
eye-tracking, 156, 157
Semantic encoding, 148, 160, 161
Sitting and manual skills, 47
Social learning, 14, 18, 21, 29
children’s judgments, 139

interpersonal violations, 140
selective trust, 139, 140
Social partners, 26–29
Social referencing, 18–19
Socioeconomic status (SES), 234
Stuffed animal toy, 200–201

T

Testimony
cultural/family values, 141
epistemological problem, 131
error forgiveness, 135–138
intentional reasoning, 132
knowledge attributions, 134
parents’ authoritarian value, 141
parents’ epistemological values, 141
reliability assessments, 133
religious belief, 140
social/moral learning, 138–140
types, 132
Theory of Mind (ToM), 223, 224
Theta oscillations, 28, 30
Translation strategies, 241

U

Unobservable entities, 168
adult testimony, 173
children’s belief, 170
and endorsed entities, 170–172
earth shape, 169
explicit, 172
implicit language, 171
natural and supernatural, 170
physical possibility, 173, 174
supernatural religious entities, 171

V

Visual attention behavior, 216
Vocabulary development, 239, 242, 245
Vocalizations and gestures, 42–43
Vygotsky model, 5

W

Word learning, see Active learning process
Word learning model, 147
consolidation process, 159
“data-driven” approaches, 161
episodic memory, 158
ERP, 160
