Index

Abstract class  276
Activation factor  250
Actuator torque  183
Angular chewing  230
Anterior-posterior movement  199
Artificial food  266
Artificial muscle actuators, AMA  18
Association rule  279
Attribute selection  279
Axial load  76

Backlash  86
Bite force  12, 65
Bolus formation  209
Bolus retention  211
Breakage function  210
Breakdown of food  209
Brittle food  197

Canine  167
Central nervous system, CNS  4
Cheek  153
Chewing analysis  173
Chewing behaviour  277
Chewing cycle  2, 10, 123
Chewing cycle time  155
Chewing data  277
Chewing device  147
Chewing experiment  169
Chewing force  11, 65, 154, 161
Chewing measurement  223
Chewing process  199, 276
Chewing robot  99, 188
Chewing simulation  212
Chewing simulator  220
Chewing stroke  199
Chewing trajectory  11, 132, 139
Class object  274
Closed-mouth position  60, 68

Compliant motion  68
Computational models  13
Condylar axis  46
Condylar movement  63
Condylar point  37, 42, 46, 47
Condylar point  62
Confidence factor  283
CosmosMotion  63, 105
Crank angle  125, 127
Crank angular velocity  97
Crank motion  182
Crank torque  142
Crank-slider linkage  224
Curve of Spee  7
Curve of Wilson  7
Cusp  6

Data mining  276
Data mining tool  279
Data pre-processing  279
Degree of deformation  206
Degrees of freedom  39
Dental training  16
Denture position  101
Digastric  6, 36
Double-acting actuator  93
Dynamic model  13

Electromyography, EMG  8, 25
Encoder resolution  81
Encoder  154, 225

Flavour release robot  230
Fluidic muscle  257
Food bolus preparation  209
Food bolus  215, 235
Food chewing robotics  20
Food compression  190
Food dynamics  238
Masticatory performance   2
Masticatory robot   126, 186, 214
Masticatory sequence   1, 54
Masticatory system   2
Matsuoka oscillator   239, 257
Measurements of mastication   173
Mechanical property   208
Model food   184, 212
Molar point   37, 47, 62
Molar teeth   131
Molar   6
Motion control system   24, 72, 103
Motion control   181
Motoneuron   245
Motoneuronal control   241
Motor current   225
Motor torque   76, 125, 129, 162, 181
Mouth-closing muscle   6, 20, 91
Muscle attachment   59
Muscle fibre   249
Muscle group   13
Muscle line of action   60
Muscle of mastication   3, 6
Muscular activity   8, 274, 283

Natural bite volume   214
Neural oscillator   239, 266
Neuromotor system   249

Object oriented programming   279
Object-oriented database   279
Object-oriented method   26
Object-oriented model   273, 277
Occlusal contact   20
Occlusal phase   190
Occlusal position   134, 149
Occlusal surface   214, 219
Occlusal time   155
Occlusal trajectory   212
Occlusion phase   143
Occlusion   123
Oral processing   234

Parallel mechanism   91
Particle size reduction   210, 231
Passive compliance   197
Peak force   188
PID controller   24, 45
Platform mechanism   20
Positional feedback control   265
Posselt envelope   8, 63
Pre-tightening force   160, 226
Primitive behaviour   26
Proportional valve   257
Pterygoid actuator   55, 99
Pterygoid   6, 35, 67, 100
Reduction ratio   76
Reference point   37
Repositioning of food   214
Resistance force   199
Rheological food property   275
Rhythmic output   241
Rhythmic pattern   245
Robotic jaw   25
Robotic linkage   207
Robotic model   45
Rotation matrix   114
Rotational angle   94
Rotational displacement   165
Rotational speed   74
Rubber food model   197
Sagittal plane   160, 225
Salivary flow   215
Sarcomere   13, 252
Sequence of chewing cycles   10
Shear measurement   209
Shearing lateral movement   199
SimMechanics   39, 41, 111
Singular configuration   98
Singularity   98
Six-bar linkage   138, 143
Size reduction mechanism   209
Skew-symmetrical matrix   97
Skull frame   93, 167
SolidWorks   50
Spatial trajectory   51
Speech therapy   16
Spherical joint   89, 93, 183
Static model   13
Stewart platform mechanism   42
Stress analysis   144
Surface EMG   12
Teeth kinematics   211
Teeth locking   149
Temporalis actuator   56
Temporalis   6, 35, 65, 100
Temporomandibular joint, TMJ   36, 42, 217
