About the Authors

**Dr. Grit Mareike Ahlers** is Managing Director of Prof. Bruhn and Partner AG, a strategy and marketing consulting firm with its registered office in Zurich, as well as being assistant professor at the University of Basel and a lecturer at other higher education establishments. She studied business administration in Bayreuth and Madrid, before joining the Department of Marketing and Corporate Management at the University of Basel in 2001 as a research assistant. Her Ph.D. thesis deals with the optimization of organizational structures in marketing with regard to consistent external and internal communications. At the marketing department, besides her scientific work she was also responsible for various consulting projects and worked as lecturer for numerous EMBA-programs. From 2006 until 2009 Mareike Ahlers worked for HUGO BOSS AG as Team Leader Business Development for the brand lines BOSS Orange and Green, responsible for brand strategies, cross-functional process management and the relaunch of the brand BOSS Orange.

**Jørn Bang Andersen**—European Director Clareo Partners and Advisory Board Member Kellogg Innovation Network—is a Nordic and European thought leader from Denmark, and he is considered an international expert on innovation and economic growth. He has served on the World Economic Forum’s panel on the Nordic growth model (2011) and been a contributor to The Economist’s article on ‘The Nordic Countries—The Next Supermodel’ (2013). Jørn has more than two decades of experience developing innovation and globalization strategies for companies, governments and regions in all Nordic and Baltic countries, the OECD and the European Commission. He has done business model innovation with more than 100 companies from the Northern European countries as well as in Russia, Portugal, Austria, Mexico and South Korea. He is the architect behind the groundbreaking Nordic and international innovation management programs and studies ‘Measured and Managed Innovation’ and ‘Business Model Innovation in the Tourism and Experience Economy’. Since 2009, Jørn has served as Advisory Board Member to Kellogg Innovation Network, at the world leading business school, the Kellogg School of Management. Among the topics he can speak and do consulting are: “The Evolution of Innovation Ecosystems and How To Manage Them”, “The Power or Global Innovation Networks”, “Globalization and Financial Diversity”,

N. Pfeffermann et al. (eds.), *Strategy and Communication for Innovation*, DOI: 10.1007/978-3-642-41479-4, © Springer-Verlag Berlin Heidelberg 2013
“How to Turn Innovation Into Growth” and “Measured and Managed Innovation”. Jørn has written several books and articles on innovation and globalization and will be publishing in ‘The Global Science of Innovation’ (McGrawHill) and ‘Strategy and Communication for Innovation’ (Springer Verlag) both books are coming in 2013. Jørn is European Director to Clareo Partners (www.clareopartners.com) and can be reached at: jandersen@clareopartners.com

Alan Belasen holds a Ph.D. from the State University of New York at Albany, and BA and MA degrees from the Hebrew University, Israel. For over 25 years, Dr. Belasen has been involved in designing and implementing leadership development and executive education programs in the US and abroad. Currently he chairs the MBA Program at SUNY, Empire State College where he is also implementing the newly MBA in Global Leadership which he initiated in addition to co-designing the MBA in Healthcare Leadership as well as numerous graduate certificate programs including the Management of Innovation and Technology Transfer.

Belasen has provided communication audit consulting and leadership development curricular design and training to government, not-for-profit, and business organizations in the US and abroad. His clients range from entrepreneurial organizations, healthcare systems, academic institutions, and business enterprises.

In addition to his numerous journal articles and conference papers, he also contributed chapters to a number of books on topics such as self-managed work teams; work motivation; women’s leadership; and executive education. Dr. Belasen’s books include: Leading the Learning Organization: Communication and Competencies for Managing Change (SUNY Press 2000); The Theory and Practice of Corporate Communication: A Competing Values Perspective (Sage 2008); and, Developing Women Leaders in Corporate America: Balancing Competing Demands, Transcending Traditional Boundaries (Praeger 2012).

Volker Bilgram is Team Lead at HYVE, an Open Innovation company based in Munich, and Associated Researcher at the TIM Group of RWTH Aachen University. Currently, he is doing research on the use of Co-Creation as an empowerment and branding tool. Volker graduated in International Business Law at the University of Erlangen-Nuremberg with an academic focus on New Product Development and Open Innovation. Volker blogs about Open Innovation and publishes in journals such as the International Journal of Innovation Management, Marketing Review St. Gallen and Harvard Business Manager.

Bettina Sophie Blasini is a Ph.D. student at the University of Cambridge under the supervision of Tim Minshall. She holds a Master of Arts in Mass Communication and Journalism from Ludwig-Maximilians University Munich and an MPhil in Innovation, Strategy and Organisation of Cambridge Judge Business School. Besides her studies, Bettina Sophie worked at the University of Munich and as a freelance journalist.
**Professer Dr. Henning Breuer** works in innovation consulting, social research, and scientific education. Consulting with uxbel—innovation consulting—he focuses on innovation strategy, corporate venturing and user experience and research. As a professor for business and media psychology he teaches methodology, marketing and innovation management at the University of Applied Sciences for Media, Communication and Management (HMKW). As visiting professor of Waseda University Tokyo his research focuses on human-centred design and innovation for informal learning environments. For Telekom Innovation Laboratories he set up the Project Field User Driven Innovation together with Dr. Fee Steinhoff.

**Professer Dr. Manfred Bruhn** is a full professor for Business Economics, in particular for Marketing and Corporate Management at the Center for Economic Sciences of the University of Basel, as well as holding an honorary professorship at the Technische Universität München. He conducts research on Strategic Marketing, Services Management, Communications Management, Brand Management, and Non Profit Marketing. Many of his publications belong to the standard repertoire in marketing science and practice. He is adviser to various companies and member of numerous organizations and juries. Manfred Bruhn is editor of the Swiss magazine “Die Unternehmung” and director of the Master Program “Marketing Management and Business Administration” in Germany and Switzerland. He studied business administration at the University of Münster, qualified as a professor in 1985 and was a full professor for Marketing at the European Business School until 1995.

**Phillip A. Cartwright** is Professor of Economics at ESG Management School in Paris. He holds B.A. and M.A. degrees in economics from Texas Christian University and M.S. and Ph.D. Degrees in economics from the University of Illinois, Urbana-Champaign. He has held posts at the University of Georgia, INSEAD, Imperial College and The American University of Paris. He has over thirty years of successful academic and commercial experience. As CEO of Horizonvu Group LLC (HorizonVU Music), he provides marketing and promotion services to emerging musicians around the world. He is a member of the Recording Academy, the Country Music Association, Audio Engineering Society and ASCAP.

**Philip Cordes** is a research associate and Ph.D. student of Prof. Dr. Michael Hülsmann in the department «Systems Management» in the School of Engineering and Science at the Jacobs University Bremen. He completed his diploma in business sciences at the University of Bremen in 2008. Since may 2008 Philip Cordes is working for the collaborative research centre 637 «Autonomous Cooperating Logistics Processes—A Paradigm Shift and its Limitations» funded by the German research foundation (DFG). Philip Cordes’ exploratory focuses are autonomous co-operating logistic systems, strategic management in the music industry and complexity science-based organization theory. He deals e.g. with
complexity-based theories of Complex Adaptive Systems, Dynamic Capabilities as well as Dominant Management Logics and Path Dependencies.

**Thomas Crispeels** is a research associate at Vrije Universiteit Brussel. He studies the biotechnology industry, with a focus on innovative companies active in life sciences R&D. He was business developer at the university’s Laboratory for Molecular and Cellular Therapy and organizes the VUB/VIB ‘Workshop Entrepreneurship in Life Sciences’.

**Rani Jeanne Dang** is an Assistant Professor at the University of Nice Sophia-Antipolis, affiliated to CNRS, the National Centre for Scientific Research in France (GREDEG Research group) where she researches and teaches in the fields of innovation, entrepreneurship and strategy. She is also a Broman Research Fellow at the Institute for Innovation and Entrepreneurship, University of Gothenburg, Sweden. She holds a Ph.D in Management from University of Nice/CNRS and was also a visiting researcher at the University of Cambridge, UK and a project officer at the Pôle de Compétitivité SCS (Secured Communicating Solutions), the cluster-led innovation policy in France. Rani’s main research interest is the development of small firms through collaborations in regional ecosystems of innovation.

**Dr. Ulrich Eberl** was born in 1962, is the head of Siemens’ worldwide innovation communication team and Editor-in-Chief and publisher of the award-winning research and innovation magazine Pictures of the Future. He studied physics and earned a doctoral degree with “summa cum laude” on the influence of electric fields on the first picoseconds of photosynthesis at Technical University of Munich in 1992. As a science and technology journalist, Eberl has been contributing hundreds of articles on science and technology for a wide range of publications since 1988, reporting on topics ranging from nanotechnology and space technology to evolutionary biology and the archaeological excavations in Troy. After working for Daimler’s technology publications from 1992 to 1995, Eberl joined Siemens Corporate Communications in 1996. He also heads the SciPress editorial office, a communication service for the fields of technology, business, and science, and is the author of two books, Innovative Minds and Life in 2050 about the major trends of the coming decades. Contact: ulrich.eberl@siemens.com

**Professer Dr. Martin J. Eppler** is a full professor of media and communication management at the University of St. Gallen (HSG), where he is also a director of the institute for media and communication management. He conducts research on knowledge management, knowledge visualization, and knowledge communication. He has been a guest professor at various universities in Asia and Europe. He has been an advisor to organizations such as the United Nations, Philips, UBS, the Swiss Military, Ernst and Young, KPMG, Swiss Re, Daimler and others. Martin Eppler studied communications, business administration and social sciences at Boston University, the Paris Graduate School of Management, and the
Universities of Geneva and St. Gallen. He has published more than 80 academic papers (in journals such as Organization Studies, LRP, Harvard Business Manager, TIS, EMJ, IV, and others) and eight books, mostly on knowledge communication, management, and visualization.

**Dr. Sherry Devereaux Ferguson** (Ph.D., Indiana U.; M.A., U of Houston; B.A., L.S.U.) is a senior professor and former Chair and Director of Graduate Studies for the Communication Department, University of Ottawa, Canada. She has acted on the editorial boards of numerous journals and yearbooks, including the *Journal of Communication*, the *Communication Yearbook*, the *Communication Studies Journal*, the *International Journal of Strategic Communication*, and the *Communication, Culture and Critique Journal*. She chaired the Public Relations Division of the ICA and held the position of Executive Board Member-at-Large for the Americas. She also chaired the Internationalization Committee for that organization. While acting as chair of the PR division, she established the Global Task Force, a research initiative involving scholars from many countries. She is an honorary board member for the *Systems Theory and Complexity* book series (Aracne Publishing, Rome), in collaboration with the World Complexity Science Academy (WCSA). Publications include three books on organizational communication, two on public opinion and strategic planning in communication, two on public speaking, a book on civic discourse and cultural politics in Canada, and a book on interpersonal communication. Publishers include Oxford University Press (New York and Toronto), Sage, Greenwood, Transaction, and others. Ferguson has published 30 articles in refereed journals and made 45 conference presentations. Clients in an extensive consulting career have included the Department of Foreign Affairs (Canada), the Department of Justice, Transport Canada, Health Canada, the Canadian Space Agency, the National Research Council, Office of the Auditor General, CIDA, the Canadian Management Institute, Petro Canada, and others. She served on two major federal advisory boards, which oversaw the writing of a vision statement and defining of curriculum needs for government communicators. She trained more than a thousand government communication officers in public opinion analysis and strategic planning techniques, initially at the request of the Assistant Secretary of Communications to Cabinet. She also did professional speech writing for a former Prime Minister, government ministers, and top level bureaucrats.

**Dr. Simone Ferriani** is an Associate Professor of Management at the University of Bologna and Honorary Visiting Professor at Cass Business School, City University London. Simone received his Ph.D. from the Management Department of the University of Bologna. He has been a visiting scholar at the Wharton School, University of Pennsylvania and at the Stern School of Business, New York University. After obtaining his Ph.D. he was a Marie Curie Fellow at Cass Business School and at the Centre for Technology Management of the University of Cambridge. He is also an AIM Fellow and a lifetime member of Clare-Hall College in Cambridge. Since 2011 Simone has served as the Scientific Director of
the Green Energy and Sustainable Business MBA at Alma Graduate School, University of Bologna. His research interests include entrepreneurship, creativity, and social networks. His work has been published in various international journals, including Administrative Science Quarterly, Research Policy, Strategic Management Journal, Industrial and Corporate Change, Organization Science and Strategic Organization.

Dr. Simon Ford is a Research Associate at the Centre for Technology Management, University of Cambridge. After completing his Ph.D. in 2007 at the Centre for Technology Management on the subject of technological obsolescence, Simon remained with the centre, going on to conduct research into how established companies can improve their capacity for breakthrough innovation, the process of technology acquisition, the complex dynamics underlying industrial emergence, and how firms can better organize the front-end of innovation. Simon’s research has been published in Technology Forecasting and Social Change, R&D Management and Research-Technology Management. Since 2012 he has also been a Visiting Associate Professor at the Hong Kong Polytechnic University.

Friederike Hoffmann is a Ph.D. candidate at the University of St. Gallen, at the Institute for Media and Communication Management. She holds a degree in Political Science from Freie Universität Berlin. She also studied at Sabanci University, Istanbul, and worked as a research assistant at the San Francisco State University. After finishing her diploma thesis on agenda setting, she worked as a research assistant at the Herbert Quandt Foundation, Berlin, and later as a project manager for the Charité Foundation in Berlin. Her research focuses on the use of knowledge visualization tools in strategic management processes, and especially on business model innovation.

Mary T. Holden (BSA, MBS, H.Dip Stats, Ph.D.) has over 20 years of business experience. Her research interests involve the governance of inter-organisational relationships—especially the role of communication in governance, and frictionless knowledge transfer in inter-organisational networks. Mary is co-chair and co-founder of the Research in Innovation, Knowledge, and Organisational Networks (RIKON) Group in the School of Business, Waterford Institute of Technology. She is a member of several professional associations: Academy of Management, American Marketing Association, European Marketing Association, International Communication Association, and the Marketing Institute of Ireland. Mary has published in the Journal of Marketing Management, Marketing Review, Industrial Marketing Management and Irish Marketing Review. She has also presented her work at numerous national and international conferences and has been a reviewer for many international conferences as well as the journals Industrial Marketing Management and the European Journal of Marketing.
Radu Huculeci is a bio-engineer at Flanders Institute for Biotechnology (VIB) and research associate scientist at Vrije Universiteit Brussel (VUB). He studies the information transfer within protein domains and its implication for drug design. He obtained a masters degree in Management at VUB, where he completed a research on networks and knowledge transfer in the biotechnology industry.

Professor Dr. Michael Hülsmann studied Business Administration at the University of Bayreuth. Then he continued as a Research Assistant at the University of Bayreuth and at the University of Bremen. He earned a Ph.D. degree on the topic „Management im Orientierungsdilemma—Notwendigkeit eines Managements rationalitätsbezogener Widersprüche von Effizienz und Nachhaltigkeit“ (Orientational Dilemma in Management—The Need for a Rationality Driven Contradiction Between Efficiency and Sustainability in Management) with „summa cum laude“ and received the 2nd award for studies of the Förderverein für Mittelstandsforschung e.V. (Association for Scientific Development of Small and Medium Enterprises). In his business career Prof. Hülsmann worked for notable companies. Between 2003 and 2009 Prof. Hülsmann was in charge of the „Management nachhaltiger Systementwicklung“ (Management of Sustainable Systems Development) field of studies in the Economics department of the University of Bremen. Since January 2004 he has been in charge of sub-project A3 „Monitoring der Selbststeuerung“ (“Monitoring of Autonomous Control”) and a leading member of SFB 637 „Selbststeuerung logistischer Prozesse—ein Paradigmenwechsel und eine Grenzen“ (Autonomous Logistics Processes—a Change in Paradigm and Constraints) which is already in its second research level as the kernel of the scientific cluster “Dynamics in Logistics”. In 2007 Prof. Hülsmann was invited as a visiting researcher at the University of California, Los Angeles, USA. In March 2009 he took over the “System Management” field of studies at the School of Engineering and Science at Jacobs University Bremen. He focuses on Strategic Management of Logistics Systems. Prof. Hülsmann teaches and does research mainly in the fields of competence and technology based positioning, accomplishing of technological change in value-adding networks and setting-up of interorganizational coordination mechanisms.

Dr. Tim Kastelle is Senior Lecturer in Innovation Management at the University of Queensland Business School (UQBS). After graduating from Princeton University with a degree in economics, he worked for twelve years in senior positions in a variety of industries including radio, office equipment, industrial chemicals, higher education and software. Tim Kastelle’s broad research interests are the impact of innovation on firm and economic growth. His current projects include the evolution of national innovation systems, how internal structures influence innovation outcomes in project-based firms, and work on business model innovation and its impact on innovation diffusion. He is Managing Editor of the journal Innovation: Management, Policy and Practice. All of Tim Kastelle’s teaching is focused on innovation. He is the program leader for innovation courses
in the MBA program, and Executive Education. He is also the academic advisor for the UQBS teams that participate in the partnership with the Wharton Business School in their Global Consulting Practicum program. His Innovation for Growth Blog (timkastelle.org/blog/) targets practicing innovation managers, and is read by over 2,000 people daily.

Giordano Koch is the team lead of HYVE’s business division HYVE Open Government. Since 2010, he has been in charge of the consultancy of national and international clients in the area of politics, administration, and universities and offers with his team conception, realization, implementation, as well as evaluation services for online innovation as well as citizen participation projects. The latter include online dialogues, online consultations, online participatory budgets, internal idea management systems and specific collaboration solutions for universities. Besides his job at HYVE, he is currently working on his Ph.D. at the University Hamburg under the supervision of Prof. Dr. Dennis Hilgers (Institute for Public and Nonprofit Management, University of Linz). His research interests are open innovation and co-creation in the public as well as private sector including different forms of citizen participation. Furthermore, he is lecturer at the Johannes Kepler University of Linz (Austria) and an eligible speaker on topics of Open Government, Open Innovation within Public Administration, and Citizen Participation.

Niclas Kröger is a Project Manager in the HYVE Innovation Community GmbH, where he is implementing open innovation and crowdsourcing solutions for national and international corporate as well as governmental organizations. Working at HYVE since 2011 he has been focusing on Open Government projects in the public sector including civic participation and participatory budgeting platforms, as well as projects for regional associations and universities. Aside from working at HYVE Niclas Kröger is studying Technology and Management with focus on Innovation and Entrepreneurship and Engineering at the Technical University Munich.

Madeleine Kröper is a psychologist with a passion for user-centered design. She believes that creating successful and innovative products or services requires insights from the user perspective. Madeleine studied work—and organizational psychology in Potsdam and Madrid where she specialized in innovation processes and creativity methods. Furthermore she enrolled at HPI School of Design Thinking in Potsdam. As part of multidisciplinary teams, she solved real life design challenges applying user-centered design methods such as creating personas or prototypes in order to collect feedback. As Project Manager of the Innovation Research Team at HYVE, Madeleine is in charge of co-creation and innovation research projects in the early phases of new product development and conducted projects for companies such as BMW, Beiersdorf, Danone or Vorwerk.

Claudia Mast is a professor of Communication Science, Journalism Studies and Public Relations at the University of Hohenheim in Stuttgart. She qualified as a
university lecturer at the University of Munich with a postdoctoral thesis on the structural change of communication systems in our society. Claudia Mast was a lecturer at the universities of Munich and Eichstätt (Germany) and Zürich (Switzerland) for several years. Claudia Mast studied Communication Science, Political Science and Romance Languages at the University of Munich. She attended the German School of Journalism (Deutsche Journalistentenschule) in Munich where she got her training in press, radio and TV journalism. After some time working for newspapers and in broadcasting, she joined the international company Siemens and was responsible for management information and training. Her main areas of interest are professionalism and innovation in journalism. In this field, she is best known for her handbooks on media coverage of economic topics and techniques for handling news stories. She is the author of several other books—dealing with the principles and practice of journalism, corporate communication, especially crisis communication, and the role of values in communication strategies. Claudia Mast is a member of the advisory board of Germany’s international broadcaster Deutsche Welle. E-Mail: sekrkowi@uni-hohenheim.de

**Tim Mazzarol** is a Winthrop Professor in Entrepreneurship, Innovation, Marketing and Strategy at the University of Western Australia Groupe ESC Dijon, Bourgogne, France. He has around 20 years of experience of working with small entrepreneurial firms as well as large corporations and government agencies. This has included strategic management, marketing and support to commercialisation. He is the author of several books on entrepreneurship, small business management and innovation. His research into has been published internationally. He holds a Ph.D. in Management and an MBA with distinction from Curtin University of Technology, and a Bachelor of Arts with Honours from Murdoch University, Western Australia.

**Tim Minshall** is a Senior Lecturer at the University of Cambridge Centre for Technology Management. His researches, teaches, writes and consults on the topics of open innovation, technology enterprise, the financing of innovation, and university-industry knowledge exchange.

He is a non-executive director of St. John’s Innovation Centre Ltd, Cambridge and a Visiting Professor at Doshisha University Institute for Technology, Enterprise and Competitiveness in Japan. He has a BEng from Aston University, and a Ph.D. from Cambridge University Engineering Department. Prior to joining the University of Cambridge, he worked as an engineer, teacher, consultant, freelance writer and project manager in the UK, Japan and Australia.

**Kathrin M. Moeslein** is professor of information systems at the School of Business and Economics at the University of Erlangen-Nuremberg. She is also a professor of management and member of the team of directors at the Center for Leading Innovation and Cooperation (CLIC) at HHL Leipzig Graduate School of Management. In addition, she serves as member of the advisory boards of the Peter
Pribilla Foundation at the Technische Universität München (TUM) and the Cambridge Service Alliance (CSA) at the University of Cambridge. Amongst others she is a founding member and has been a Vice President of the European Academy of Management (2006–2012). Kathrin has been researching, teaching and consulting in the field of strategic innovation and innovation systems since the early 1990s. Her current research focuses on the implementation of innovation strategies and technologies as well as leading innovation in service organizations.

Letizia Mortara is a Senior Research Associate at the Centre for Technology Management at the Institute of Manufacturing, University of Cambridge (UK). Her current interests and expertise include Open Innovation, Additive Manufacturing and Technology Intelligence. Letizia has a first degree in Industrial Chemistry from the University of Bologna (Italy). After working as a process/product manager for the IVM group specialised in coatings, stains and primers for wood, she moved to the UK where she gained her Ph.D. in processing and process scale-up of advanced ceramic materials at Cranfield University.

Dr. Ralph-Christian Ohr has been working in several innovation, division and product management functions for international, technology-oriented companies. His research interest is aimed at organisational and personal capabilities for high innovation performance. Ralph-Christian Ohr is german citizen and resided in Switzerland. He authors the Integrative Innovation blog (integrative-innovation.net).

Dr. Thomas O’Toole is Head of the School of Business at Waterford Institute of Technology. His marketing teaching is, primarily, in business-to-business, marketing innovation, and in how small firms market. Dr. O’Toole’s research specialism is in the area of inter-firm relationships and networks with a specific focus on collaboration. Dr. O’Toole publication track record includes over 50 peer reviewed articles (including in Industrial Marketing Management, Journal of Marketing Management, Journal of Business and Industrial Marketing, European Journal of Purchasing and Supply, Marketing Intelligence and Planning, Journal of Customer Behaviour). The 2nd edition of his co-authored book entitled Strategic Market Relationships is published by Wiley, London. Dr. O’Toole is a current editorial board member of the European Journal of Marketing and is a director of numerous boards of organizations in the community and voluntary sector. He was elected Fellow of the Marketing Institute of Ireland in 2005 for his contribution to the advancement of the profession, and a Fellow of the Irish Academy of Management in 2012.

Sabine Patsch has been working in the field of communications and marketing at SAP AG in Walldorf, Germany, since 2008. She holds graduate degrees in Social Sciences from the University of Koblenz-Landau and in International Business Administration and Marketing from Baden-Wuerttemberg Cooperative State University Mosbach and Hogeschool Zeeland, Netherlands. She has gained experiences in marketing, corporate communications, consulting and operations in
several organizations across different sectors and industries, such as the automotive and electrical industries. Her academic field of interest is the interface between strategic communications and innovation collaborations.

Nicole Pfeffermann (Ph.D.) is a management consultant and senior researcher at ISEIC Consulting (http://www.iseic-consulting.com). Her research interest covers management—strategy, innovation, and methodologies; her research topics are innovation communication, strategic entrepreneurship and e-entrepreneurship; and arts, design and management. She is lecturer in E-Business, Information and Knowledge Management, Strategic Management and Methodologies. Nicole Pfeffermann is co-editor of the international book “Strategy and Communication for Innovation” (Springer Verlag) and (co-)author of international publications (online and offline). Nicole Pfeffermann holds an undergraduate degree (Diplom) in Business Economics and a Ph.D. from the University of Bremen. She was visiting scholar at UCLA Anderson, associate researcher at ESCP Europe Paris, and visiting doctoral student at GREDEG CNRS Université de Nice and SKEMA Business School. After her studies she gained international professional experience as a consultant (Vorwerk Group, Hamburg Mannheimer, DP DHL) and coach for IT and management seminars.

David Probert is a Reader in Technology Management at the Institute for Manufacturing, University of Cambridge. David pursued an industrial career for 18 years before returning to the Engineering Department in Cambridge in 1991. His experience covers a wide range of industrial engineering and management disciplines in the UK and overseas. He joined the Manufacturing Engineering Group as Royal Academy of Engineering/Lucas Industries Research Fellow, to develop a practical approach to the issues of make or buy and vertical integration in manufacturing industry, which has been widely applied and disseminated. Now Reader in Technology Management, he is a founding member and Head of the Centre for Technology Management within the Institute for Manufacturing. This is a team of around 40 research and academic staff, with an active consortium of collaborating companies. Current research interests of the Centre include technology and innovation strategy, technology management processes, technology intelligence, open innovation, new product development, industry and technology evolution, software sourcing and industrial sustainability. Books published include ‘Developing a make or buy strategy for manufacturing business’, ‘Technology management assessment procedure’, ‘T-Plan: The fast start to technology roadmapping’, and a guide to technology intelligence activities.

Maximilian Rapp is Project Manager since 2010 in the field of HYVE Open Government at HYVE Innovation Community GmbH in Munich. Moreover, he is consultant and central contact person in the scope of interactive citizen-participation platforms and innovative eGovernment-processes, e.g. implementation of projects dealing with participatory budgeting, government 2.0 campaigns or citizen-dialogues in municipality areas, for administration or governmental agencies.
Beside his work at HYVE, Maximilian Rapp wrote his doctoral thesis at the University of Augsburg, whereby he realized several doctoral research stays at the National University of Ireland in Galway and the Queens University in Belfast. In addition, since 2012 he is lecturer at the University of Innsbruck at the chair for Strategic Management and an eligible speaker on topics of Open Government, Open Innovation within Public Administration.

Eduardo Rodriguez-Montemayor is a Senior Research Fellow at INSEAD eLab in the Europe office. He leads, in partnership with global companies and policy makers, the intellectual approach and execution of eLab projects related to competitiveness, innovation and technology. One key area of his current research is the empirical exploration of the impacts of emerging information technologies on business performance. He has been actively involved in the European Commission Digital Agenda Assembly. Dr. Rodriguez-Montemayor holds a Ph.D. in Economics from the University of York in the United Kingdom and an MSc in Economics and Management from the University Pompeu Fabra in Spain. He consults for the OECD, the Inter-American Development Bank and the United Nations Environment Program on a number of strategic projects. He previously worked in the Mexican financial sector on regulation of pension systems (CONSAR) and in the Inter-American Conference of Social Security.

Nadine Roijakkers was a Master student of Innovation Management and Strategy/Organization at Maastricht University School of Business and Economics. She wrote her Ph.D. thesis at the United Nations University/MERIT on inter-firm collaborative innovation in the pharmaceutical biotechnology industry. During the period 2002–2007 she held a number of positions in research and academia. From 2007 to 2009 she was a senior strategy consultant to companies operating in various sectors of industry at KPMG Consulting. As of November 2009 she holds the position of assistant professor of Strategy and Innovation Management at Hasselt University in Belgium. Nadine Roijakkers published numerous articles and book chapters on alliance management and innovation management. Outlets for her work include among others Long Range Planning, Research Policy, Harvard Business History Review, British Journal of Management, European Management Journal, Technological Forecasting and Social Change, Small Business Economics, and California Management Review.

Rosalyn J. Rufer holds a Ph.D. with a focus on strategic management and global marketing from Rensselaer Polytechnic Institute, NY. This advanced degree completed the connection between her master degrees in Business Administration (RPI, 83) and chemistry (Cleveland State University, 78) and her fifteen years of experience in the chemical industry and management of innovation. Dr. Rufer served five years with Industrial Electronic Rubber Company, as a chemist and product manager, and ten years with GE Silicones, in several progressive marketing positions. Her extensive industrial experience included innovation management through internally developed technologies and through technology transfer from
partner organizations. Since earning her doctorate in 1999, Dr. Rufer has continued researching in the application of innovation in both academia (using technology to enhance management education) and in industrial applications with recognition as a co-author for best paper from the Academy of Management in 2007 and later from the International Academy of Management and Business in 2011. In addition to many conference presentations, Dr. Rufer has co-authored three book chapters in these areas. Most recently, Rosalyn Rufer co-designed and led the implementation of an advanced certificate degree in the Management of Innovation and Technology Transfer for the MBA program at SUNY-Empire State College.

Ilse Scheerlinck is associate professor at Vesalius College and Vrije Universiteit Brussel, where she teaches economics and business courses. She wrote her Ph.D. on industry trade preferences and EU policy. Her current research interests include technology education and life science management.

Gareth Dylan Smith is a drummer, teacher and scholar based in London, England. He plays mostly rock, punk, folk, blues and musical theatre, and has performed, recorded, taught, and presented his research on four continents. Gareth writes for DrDrumsBlog.com, Rhythm Magazine, and HorizonVu Music; he is Editor at SUS Music. His research interests include popular music, musical creativities, entrepreneurship, embodied experience in musical performance, Irish musicians in the UK, student experiences of higher music education, and autoethnographic, axiological explorations of his work. Current projects include a co-edited book on music and leisure, and a web-based archive of music learning practices.

Dr. Fee Steinhoff is Head of User Driven Innovation at Telekom Innovation Laboratories in Berlin. She is responsible for the development and implementation of user research tools along the innovation process (e.g. ethnographic research, user clinics). Fee Steinhoff studied Business Administration (Technical University Berlin), earned a Master of Business and Engineering (Steinbeis University Berlin) and received her Ph.D. from the Technical University Berlin. Her research interests are in the area of innovation marketing, customer orientation and radical innovation—topics which she also teaches in executive programs. She co-authored the book “Innovation Marketing” together with Prof. Dr. V. Trommsdorff.

Vera Stolarski is doctoral student at the European Business School (EBS), Oestrich-Winkel. Her research interests are in the area of cognitive diversity, innovation, and team dynamics. Within her Ph.D. thesis she focused on the complex and dynamically interacting effects of cognitive diversity in top management teams on innovation on firm level. Vera Stolarski studied psychology with a focus on “occupational and organizational psychology” at the University of Cologne. During her studies, she did various internships in the areas of human resource consulting and a research internship at the Max Planck Institute for Human Development, Berlin.
Professer Dr. Meike Tilebein, born 1966, is full Professor and Director of the Institute of Diversity Studies in Engineering at the University of Stuttgart, Germany, with an interdisciplinary background. She studied Engineering Cybernetics and earned a doctoral degree in Strategic Management with a thesis on principles of complex adaptive systems and their applications to firms and networks. She served as the DPD Endowed Assistant Professor of Innovation Management at the European Business School in Oestrich-Winkel, Germany before she joined the University of Stuttgart in 2009. She has published in the fields of Strategic Management, Complexity Science, Innovation, Team Diversity, and Service Science. Her current research interests focus on new business models, cooperative strategic foresight in firms and networks, and the effects of team diversity on innovation. Her research methods include agent-based and System Dynamics simulation. She has been teaching since 1995, covering topics like Project Management, Innovation Management, System Dynamics, and Diversity Management.
