Index

A
Abductor hallucis (AH), 86–88
Acceleration, 274, 277, 281–291, 301, 353
Accurate coordination, 303
Accurate hitting, 336, 351
Achilles tendon, 84, 192
α-Actinin-3 (ACTN3) polymorphisms, 106, 112–119
Actin-myosin interaction, 208
Action monitoring, 30
Activation coupling, 42–44, 46
Actual hitting accuracy, 343, 345–350
Adaptive method, 362
Aerobic exercise, 140
Aerobic fitness, 91–94, 96–99
Afferent feedback, 28
Afferent nerves, 84
African, 107, 109, 111–112
Afterdrop, 316, 321
Aging society, 229
Agonist–antagonist, 69
Alpha, 5–7, 15, 26–28, 32, 33, 154, 189, 231, 233, 235, 237, 238, 343
desynchronisation, 27, 33
rhythms, 6
synchronisation, 27, 28
Altered neuromuscular control, 82
American football, 126, 140–142, 144, 147, 178, 330
Anatomical cross-sectional area (ACSA), 176–182
Angiotensin I-converting enzyme (ACE), 106, 112–120
Angular momentum, 289, 290, 295–296, 298, 301
Anterior cingulate cortex (ACC), 7, 28–30
Athletic performance, 25–33, 106, 112, 117
ATP, 106, 107, 110, 111, 151, 152
Attached cross bridges, 201, 208
Automatically, 50, 56, 360, 362
Automaticity, 27, 50, 57
Automatic tracking, 353–365
Azimuth, 325, 326

B
Backspin, 329, 337, 349
Badminton players, 73, 75
Balance control, 26, 29–31, 33
Balance performance, 33
Balance-related brain dynamics, 29
Ball spin rate, 324, 327, 330, 332, 349
Baseball, ix, 4, 9, 49, 50, 323–332, 335–351
Bat, 335–343, 345, 348–350
Bat control, 336, 339, 341, 343–345, 347–349, 351
Batters’ abilities, 336
Batters’ intention, 348
Batting average, 336
Biarticular, 176, 181
Binarization, 354, 355, 357, 361–364
Biochemical assessment, 147

1-Skate technique, 248–260
2-Skate technique, 248–249
Skating technique, 248, 268–273
Ski reaction forces, 268–272, 275–277
Slider, 323, 325, 327, 328, 330–332
Sociological dimensions of health, 242
Sodium, 81, 317
Soleus, 84, 86, 87, 168, 214, 216, 217, 219
Spatial information, 26, 38, 43, 44
Spatial perception, 342–346, 350, 351
Specialized, 50, 52, 56, 367
Specificity, 54–57, 63, 113, 114, 167
Specificity of functional alterations, 55
Spinal cord, 18, 50, 52, 53, 69, 82–86
Spinal reflex, 18, 83, 84, 86
Spin axis, 324–332
Spin parameter, 324
Spin rate, 324–332, 337
Sport psychological research on coaching, 368–370
Sports nutrition, ix, x, 3–10, 26–29, 33, 135, 182, 183, 294, 374, 377
Sport-specific, 176, 182, 368
Sprinter, 54, 109, 116, 118, 169, 176–180, 192, 258
Stepping-like movements, 51, 53
Stereotypical movement patterns, 50, 56
Stimulation frequency, 201, 208
Stimulus – response compatibility, 93
Strain gage, 263, 264, 269
Stressors, 229, 230, 233
Stretching, 79, 188, 189, 191
Stretching to the muscle, 85
Stretch-shortening cycle (SSC), 188, 189, 192, 193, 195, 273
Stroke, 5, 68, 70, 305, 315–317, 321
Strongly-bounding state, 201
Stroop task, 93
Structure of expert coaches, 375
Subhaplogroups, 109, 112–114
Substantia nigra, 68
Sumo, 131, 141, 143, 147, 176–178, 180
Supplementary motor area (SMA), 14, 16, 72, 230
Swim, 55, 314, 315, 317, 318
Synergistic muscle, 180

T
Tacit knowledge of expert coaches, 368
Tactile, 18
Task difficulty, 30, 33, 91–99
Task-switching tasks, 98
Team sports, 4, 9, 242, 371, 373, 375
Tendon elasticity, 192, 193
Tendons, 18, 80, 82, 84, 188–195, 203
Theoretical integration across, 377
Theta power, 5, 6, 28, 30–32
Third person perspective imagery, 13
Three-dimensional (3-D) direct linear transformation method, 264, 338
Threshold frequency, 80–82, 84, 85
Throwing motion, 331, 332
Tibial nerve, 80, 86, 204
Timing accuracy, 336, 339, 341, 343, 345, 347, 348, 350, 351
Tonic vibration reflex, 84
Top-down sustained attention, 28
Top spin, 327
Track and field, 116, 118, 119, 142
Tracking score, 361–365
Tracking size, 361
Trail Making Test (TMT), 94–97
Training procedures, 54
Transcranial direct current stimulation (tDCS), 17
Transcranial magnetic stimulation (TMS), 3, 14–15, 17, 27, 53, 68–71
Transfered, 46, 56, 106, 259, 299, 360
Transverse relaxation time, 168
Triiodothyronine, 131
Triple piked somersault, 296, 298
T2-weighted magnetic resonance imaging, 218, 219
Twist, 294, 296, 301, 302
Twitch contractions, 200, 202–209
Two-seam, 325, 327–330, 332
Type of sport, 128, 132

U
Ultrasonography, 176, 178, 179, 188, 192, 193, 205
Ultrasound, 146, 205
Undersomersault, 294
Uniform color, 354, 357, 358
Unstable postures, 29
Upstart, 299, 300

V
Variability, 32, 38, 83, 117, 127, 293–303
Variant, 111–112, 119
Vasti, 159, 162, 176, 181
Vastus intermedius (VI), 159, 176–180, 182
Vastus lateralis (VL), 117, 159, 168, 176–181, 192
Vastus medialis, 159, 176, 179, 180, 182, 306–308
Vertical force, 282, 286–289
Vertical impulses, 288, 289
Video coordinates, 354, 355, 359, 361, 365
Video image, 264, 325, 327, 353–365
Viewing, 239, 251, 302, 303
Virtual environment, 6, 302
Virtual realities, 241, 303
Visceral fat, 140, 143, 144, 146
Visual, 5, 16, 18, 19, 29, 30, 38, 46, 339–341, 362
Visual information, 7, 9, 18–19, 46, 301, 339
Visual occlusion, 339, 340
Voluntary contraction, 80, 83, 84, 86–88, 201
VO2max, 108, 109, 269

Voxel-based morphometry (VBM), 8
V2 skating, 261–279

W
Walking, 49–56, 161, 176, 187, 188, 227, 249, 257, 269, 290, 294
Weightlifting, 142, 177, 178, 180, 192
World Health Organisation (WHO), 242

Z
Zero-gravity, 224, 227
