SUBJECT INDEX

A

Absolute specific deposit, 277
Adaptive
   Eulerian-Lagrangian method, 926
   grid refinement, 844
   local grid refinement (ALGR), 903
   mechanism, 935
Adiabatic temperature gradient, 167
Adjustment of particle concentration, 934
Adsorbed bacteria, 300
Adsorption of viruses, 297
Advection, 475
Advection-dispersion, 489, 497, 923, 927, 955
Advective mass flux, 24
Adverse mobility ratio, 992
Alternating direction techniques, 886
Americium colloids, 282
Anaerobic filters, 302
Analytical
   expressions, sensitivity coefficients, 761
   methods, 171, 844
   solution, 193, 302, 305
Anisotropic permeability, 172
Anisotropy of transverse dispersion, 676
Approximation, Schapery, 249, 252
Aquifer model, 242
Aquifers, 659
Aquitards, 243
Arbitrary elementary volume (AEV), 6
Areal fracture density, 558
Arrival
   distributions, 717, 723
   time, 716, 720
Average porosity, 318, 321, 371, 377
Averaging, 317
  interpolation, 974
  operators, 352
  rule, modified form of, 38

B

Bacterial
  growth, 298
  particles, 294
Balance equations, 350, 355
  a fluid constituent, 431
  energy, 438
  fluid mass, 422, 427, 429
  fluid momentum, 434
  multiphase, 355
Barenblatt analysis, 422, 571
Biomass transport, 296
Biot model, 242
Black oil
  type, 824
  models, 831, 839, 878, 884, 886
Block size, 500
Block-iterative methods, 886
Body feed, 316
Boiling, 151
  two-phase, 145
Boltzmann constant, 280
Boundary condition for a moving surface, 319
Boundary conditions, 80, 85, 128, 172, 498, 586, 592, 595, 598, 611, 754, 759, 780, 783
Boussinesq's approximation, 83, 84
Breakthrough curve, 736
Brine, 162
Brinkman model, 33, 129
Brownian diffusion, 280
Buckley–Leverett problem, 858, 868, 871, 872, 880, 904
Bulking factor, 285
Bouyancy
  driven thermal convection, 145
  effects, 79, 166
  flow, 192
  forces, 168
C

Cake
  blinding, 315
  filtration, 310
  interface, 312
  length, 374
  permeability, 312, 313, 315, 327
  pressure drop, 383, 384, 388, 394
  thickness, 313, 317, 320, 323, 326, 327
  volume, fractional, 372
Calibrated model, 710
Calibration, flow model, 705
Capillarity relationship, 869, 898
Capillary
  forces, 51, 568
  gravity ratio, 578
  influences, 880
  pressure, 63, 71, 568, 608, 857, 868, 878
  pressure curve, 601
  velocity, 583
Capture
  mechanisms, 278
  of suspended particles, 272
Carbon-14, 544
Carbonate chalk, 553
Carbonate reservoirs, fractured, 555
Carboxymethylcellulose, 365
Cation exchange capacity, 487
Cellulose fibers, 392
Cesium, 506, 543
Chalk, 553, 602, 610
Channelling, 475, 484, 504
  modelling, 491
Characteristic
  displacement, 966, 967
  function, 7
Chemical injections, 838
Chemical transport, 475
Chemotaxis, 295, 298
Chromatography, hydrodynamic, 280
Circular disk, 198
Circular region, 231
Circulation, hydrothermal, 148
Clapeyron curves, 151
Clogged interface, 393
Clogging, 283, 291, 293, 296, 390, 391, 392, 395
Coefficient of
  numerical diffusion, 968
  thermal expansion, 166
Collectors, 274, 281
Collocation, 853, 872, 904
Colmatage, 287
Compositional
  flows, 854, 875, 887, 896, 898
  reservoir simulators, 837, 875
Compressibility, 314, 561
Compression, 241
  permeability cell, 310, 316
Concentration
  of solid particles, 317, 320, 323
  profile, erroneous, 841
  variance, 682
Conceptual models, 146
Condensation, 168
Condition number, 794
Conditional flow simulations, 710
Conductive heat flux, 148
Conductivity, thermal, 166
Confidence intervals, 721, 753, 792, 794
Confined
  aquifer, 781
  porous media, natural convection, 109
Conjugate gradient method, 836, 887
Connate water, 147
Consolidation, 172, 245
Constitutive
  equations, 347, 349
  property, multiphase, 379
  relationship, 172, 446, 450
  theory, 350, 359
Contact angle, 573
Contaminant
  arrival distribution, 717
  response functions, 718
Continuity versus discretization, 839
Continuous forward particle tracking, 929
Continuum
  approach, 5, 23
  approach for dispersion, 744
  balance equations, 439
  coefficients, 451
  conceptualizations, 439
  hypothesis, 347, 411
  theory of mixtures, 350
Contrarotative rolls, 91
Convection
  one-dimensional, 171
  -diffusion equation, 955,956,957,987
  single-phase, 164
  two-phase, 145,164,168
Convective
  dispersion,300
  downward migration, 145
  movements, 91
Convergence of the pure moving point method, 977
Coordination number, 279
Cores, laboratory, 660
Corrected time variable, 277
Correlation scale, 663
Counterflow of steam and condensate, 156
Covariance, 637, 710
  function, 663
  matrix, 711
  generalized, 648,650,652
Cr-EDTA, 536
Critical
  density, 730
  point, 151,169
  pressure, 151
  Rayleigh number, 111,167
  temperature, 152
  threshold, 90
Crystalline rocks, 486,543
Cubic law fracture width, 510
Cylindrical
  cake, 223,225,228
  filtration, 371

D

Darcy's law, 32,129,167,320,374
Decay of microbial particles, 298
Declogging, 283,291,296
Deep bed
  filters, 271,275
  filtration, 274,301
Dendrides, 296
Density, 146
Deposition of particles, 293,317
Desorption, 283
Deviations, 354
Diatomite filtration, 316
Dietz steady state solution, 962
Diffusion, 617
  coefficient, 520
  equation, 535
  experiments, 475,518,542
  in rock matrix, 475
  in the field, 529
  in stagnant water, 475
  into porous matrix, 486
  mass transfer, 62
Diffusional model of dispersion, 740
Diffusive
  heat flux, 36
  mass flux, 33
  thermal front, 197,226,228
Diffusivity, 530
  effective, 522,523,525,530
Dimensional analysis, 363,368,380
Dimensionality of imbibition experiments, 589
Dimensionless numbers, 348,364,367,368,582
Discontinuous velocities, 711
Discrete fracture, 415, 732
Discretization, 834
Dispersion, 475,485,491,504,659,729,735
  by finite elements, 930
  coefficient, 433,485,493
  developing, 671
  explicit, 933
  Fickian, 543
  hydrodynamic, 877,896,897
  implicit, 933
  multiphase, 895
  numerical, 947,955,968
  tensor, 958
Dispersive momentum flux, 435
Displacement, 60,63
  drainage, 64
  immiscible, 71
  miscible, 59
Dissolved
  solids, 172
  species, 476
Distinct fronts, 831
Distributed parameter models, 171
Divergence theorem, generalized, 354,357
Double medium theory, 172
Double-blind prediction, 210
Downward migration, convective, 145
Drag
forces, 359
interfacial, 356
multiphase, 362
Drainage, 566
displacement, 64
Drawdown, 776
Dual porosity, 422, 449, 553
Dune, single, 637
Dyke convective model, 153
Dynamic
natural state, 146
viscosity, 166

E
Effective diffusivity, 522, 523, 525, 530
gneisses, 530
granites, 530
Effective hydraulic conductivity, 730
Effective hydraulic conductivity tensor, 668
Eigenvalue problem, 89, 115, 805
Ekofisk field, 554, 585
Electrical conductivity, 380
Electrical forces, 281, 287
Electron microscopy, 610
Empirical methods, 171
Emulsion, 60
End-point relative permeability, 961
Energy balance equation, 81, 97, 203, 838
Enhanced oil recovery (EOR), 824
  microbial, 295
Ensemble average, 637
Entrapment, 60
Entropy inequality, 359, 360, 363
Equation of state, 166
Equations of change, 347, 349
Equilibrium
  conditions, 359, 360, 361
  sorption isotherm, 282, 300
  state, 85
Equipresence, 359
Equivalent porous medium, 172, 419, 447
Ergodic, 8, 638, 641
  hypothesis, 684, 746
Error of estimation, 641
Essential network, 735
Estimated errors, 711, 793
Estimation, 636, 640
Eulerian
- Lagrangian finite elements, 923
- Lagrangian methods, 925
  methods, 924
Exchange capacity, 487
Exchange of stabilities, 89
Experimental studies, 103, 391, 504, 553, 576, 585

F
Faults, 408
Fibers, 391
Fibrous material, 392
Fickian
  dispersion, 543
  relationship, 433
Fick's law, 34
Field observations, 475, 685
Filter
  area, 394
  cake, 271, 275, 372, 373
  cake geometry, 394, 395
  coefficient, 284, 286, 289
  medium, 346, 373, 379, 381, 385, 394
  porosity, 285
  septum, 310, 311
Filtrate, 274
  discharge, 315
  rate, 372, 378, 380, 390, 394
  rate, initial, 381
  rate expression, 371
  volume, 374
Filtration
  axial, 378, 394
  circular leaf, 379
  cylindrical leaf, 378, 394
  equation, 277, 289
  equipment, 346
  one-dimensional, 372, 394
  radial, 395
Fingering, viscous, 893, 894, 901
Finite difference
  method, 824, 834, 853, 868, 886
  version of MMOC, 967
Finite element
  collocation, 861, 904
  Eulerian-Lagrangian, 923
  Galerkin, 853, 865, 903, 947
  mixed, 895, 900
  version of MMOC, 970
First order linear model, 283
First order sensitivity analysis, 754
Fissure, 408
zones, lineaments, 483
Fixed bed, 274
Fixed mesh
algorithm, 979
interpolation, 965
Flow field, varying, 500
Flow in fractures, 481
Flow model calibration, 705
Flow
compositional, 854, 875, 887, 896, 898
one-dimensional, 251
radial, 261
segregated, 962
two phase, 962
unsaturated, 851, 858, 860, 889
Fluctuations, 353, 354
Fluid cavity, 129
Fluid particle trajectories, 713
Flux of bacteria, 300
Forced convection, 190
Formation factor, 521, 528
Fourier's law, 36
Fractional cake volume, 372, 377
Fractional flow, 870, 871
Fractions, volume, 854
Fracture
aperture, 735, 736
attitudes, 735
conductivity, 454
density, 735
density, areal, 558
density, linear, 558
density, volumetric, 558
disks, 736
flow equation, 616
frequency, 483, 504
geometry, 452
lengths, 735
-matrix mass exchange, 423
networks, 730
opening, 558
orientation, 558
rectangular planes, 736
size, 558
systems, 479
transmissivity, 437
velocity, 437
width, cubic law, 510
widths, 504,511
Fractured
  media, 729
  porous media, 407
  reservoir models, 564
  reservoirs, 553,839
  rock, 146,409,414,446,475
  rocks, physical properties, 554
Fracturing, thermoelastic, 148
Freundlich isotherm, 282,540
Front
  tracking, 621,899,901,905
  velocity, 583
Functional dependence, 756

G

Galerkin finite elements, 303,853,865,903,947
Gardner, Peaceman and Pozzi (GPP), method of, 956
Generalized covariance, 648,650,652
Generalized design procedure, 346
Generalized increment, 647
Geostatistics, 635
Geothermal
  reservoir modeling, 171
  reservoirs, 145
  systems, submarine, 145
Gneiss, 486,530
  diffusivity, 530
Governing equations, 172
Granites, 486,530,543
  diffusivity, 530
Granular porous material, 411
Gravitational
  deposition, 279
  forces, 62,568
  segregation, 153
  velocity, 279,583
Grid orientation, 841,842,899
Grid refinement, adaptive, 903
Groundwater contamination, 685
Growth of microbial particles, 298
Growth rate, 299
Haines jumps, 64
Hamaker's constant, 284
Harmonic transmissibility, 995
Head
  realizations, 703
  variance, 667
Heat
  extraction, 145
  flux, conductive, 148
  flux, diffusive, 36
  flux, macroscopic, 37
  output, 148
  transfer, 80
  transfer coefficient, 98
Heterogeneity, 563,659
High temperature systems, 149
Histogram, 720
History match, 205
Holographic interferometry, Live fringe, 62
Horizontal spreading, 691
Hot groundwater systems, 146
Hybrid moving point method, 955,979,981
Hydraulic
  conductivity, 452,482,660
  head, 636,703
  radius, 31
  radius of void space, 9
Hydrodynamic
  action, 281
  chromatography, 280
  dispersion, 494,877,896,897,956
  instability, 63,64
Hydrostatic pressure, 222,225
Hydrothermal alteration, 150
Hydrothermal circulation, 148
Hysteresis, 659,692

I
Imbibition, 64,553,554,571,576,585,596,612
  cell, 590
  experiments, dimensionality, 589
Immiscible
  displacement, 71
  fluids, 33
IMPES, 834,882,902
Implicit dispersion, 933
Inertial impaction, 280
Infinite strip, 226
Initial conditions, 536
Injection
  pumping tests, 504
  velocity, 583
Inspectional analysis, 83
Instability mechanism, phase change, 145
Interaction terms, 620
Interception, 280
Interface, 190
Interfacial
  drag, 356, 368
  instability, 59, 66
  permeability, 385
  tension, 67, 69, 573, 891
Internal viscous resistance, 27
Intrinsic hypothesis, 638
Intrinsic random functions, 645
Inverse
  method, 711
  problem, 704, 760, 796, 810
  procedure, indirect, 789
  transmisivities, 708
Irreducible saturation, 569, 856
Isochoric flow, macroscopic, 29
Isothermal compressibility, 166
Isotherm
  Freundlich, 282
  Langmuir, 282
Isotopes, oxygen and hydrogen, 147
Isotropic tensor relations, 361
Iterative methods, 836
Iwasaki's equation, 284, 289

J
Jacquard-Seguier solution, 963, 992, 994
Joints, 408
Jump balance, 357
Juvenile water, 147

K
Kozeny-Carman, 293
Kriging, 635, 639, 648, 652, 705, 722
  universal, 643, 649
Laboratory experiments, 601
Lagrangian methods, 925
Langmuir isotherm, 282
Large-scale transport process, 695
Lattices, 391, 392
Layers
  horizontal, 87, 104
  non-constant properties, 125
  sloped, 102, 104, 114
Layered soils, 86, 116, 124, 241
Leakage, 249
  factor, 246, 252
Leaky aquifer, sensitivity coefficients, 798
Leaky confined aquifer, 762, 771
Least squares
  estimation, 754
  ordinary, 789
  weighted, 791
Length scales, 49, 53
Leverett J function, 581
Linear theory, 87
Liquid saturated, 145, 151
Local grid
  encroachment, 905
  refinement, 892
Local thermal equilibrium, 172
Log-transmissivity standard errors, 707
London forces, 281
Low interfacial tension, 59
Low temperature systems, 148, 153
Low-velocity body, 150
Lumped-parameter models, 171

Macrodispersivities, 659, 673
Macroscopic
  dispersion, 738
  heat flux, 37
  isochoric flow, 29
  level, 5, 23, 347
  momentum balance, 31
  uniform flow, 29
Magma bodies, 146
Magmatic water, 145, 147
Makus technique, 103
Mass balance equations, 81, 616, 831, 859, 936
Mass balance, fracture width, 510

Mass flux
  advective, 24
  diffusive, 33, 62

Mass transfer, 49, 59, 62, 63, 67
  coefficients, 302

Mathematical modeling, 145, 171, 488

Matrix block units, 559

Matrix blocks fractures, description, 621

Matrix diffusion, 497
  modeling, 495

Matrix flow equation, 616

Matrix-fracture transfer, 617

Maximum likelihood estimation, 791

Mean
  flow, 668
  heat transfer, 112
  transmissivities, 720
  value theorem, 349

Mechanism of particle capture, 278

Mechanistic processes, 50

Mercury porosimetry, 610

Mesh
  interpolator, 965
  Peclet number, 968
  refinement, 987

Metamorphic water, 147

Meteoric water, 147

Method of characteristics, 925, 926
  modified, 923, 955, 965, 978

Micro fractured matrix block, 596, 600

Microbial
  enhance oil recovery, 295
  growth parameters, 301
  particles, 271, 272, 294

Micromodel studies, 49, 53, 54, 59, 62, 71

Microscopic
  behavior, 51, 843
  level, 5, 23, 59, 347, 348, 350
  momentum balance, 24
  observations, 59, 72

Migration parameters, 539

Mint's equation, 287, 290

Miscible displacement, 59, 837
  equation, 955, 956, 959, 964
Mixed

explicit-implicit scheme, 947
finite difference method, 993
finite element method, 893, 996
implicit-explicit dispersion, 933
method, 895, 900

Mixing, 735

Mixture

heterogeneous, 350
homogeneous, 350
multiphase, 854
multispecies, 854
theory, 440, 853, 897

MMOC, finite difference version, 967
MMOC, finite element version, 970
Mobility, 856, 857, 869, 894, 961
ratio, adverse, 992

Močel

aquifer, 242
Biot, 242
black-oil, 831, 839, 878, 884, 886
channelling, 495
conceptual, 52, 146
mathematical, 145, 171
matrix diffusion, 495
parameters, 301, 302, 304, 323
physical, 49
pore level, 50
pseudo-exact, 244
random walk, 744
second order, 244
sensitivity, 753
three dimensional, 574
verification, 745

Modified method of characteristics, 923, 955, 965, 978
Moisture capacity, specific, 859
Molecular diffusion, 34, 35, 485, 956
Momentum balance

macroscopic, 31
microscopic, 24

Momentum conservation equation, 81

Monod equation, 299
Monte Carlo simulations, 675
Motion equations, 358
Moving combustion front, 842
Moving co-ordinate system, 959
Moving fronts, 824, 831
Moving point
  interpolation, 974
  method, hybrid, 955,979,981
  method, pure, 955,975,978
  methods, implementation, 983
  refinement, 991
Multi-fracture parameter, 558
Multilayered system, 120
Multiphase
  balance equation, 355
  constitutive property, 379
  continuity, 358
  continuum theory, 346
  drag, 362
  flow, 553
  flow, naturally fractured reservoirs, 613
  fracture flow, 573
  mixtures, 853,854
  rate of deformation tensor, 366
  stress tensor, 361,362,366
  theory, 315
Multispecies mixtures, 854
Multivariate normal distribution, 711

N
NAPL, 897
Natural convection, 77,109
Neighborhood, 641,651
Network, 49,53,58,60
Newtonian fluid, 366,368,370
Newton's law of viscosity, 349
NGP interpolation, 974
Non-iterative methods, 836
Non-newtonian fluid, 365,369
Non-stationary, 636,642
Normal probability plot, 719

    hydraulic conductivity, 689
    zone, 858
Upstream weighting, 872, 892
Uranine, 536

V

Vacuum filtration, 394
Van der Waals forces, 281, 287
Vapor dominated systems, 146
Vaporsaturated, 145, 151
Variable
    block size, 500
    flow field, 500
Variance, 493, 790
Variogram, 638, 639
Velocity
    discontinuous, 711
    -Pressure equations, 993
    realizations, 713
Vertical thermal front, 222, 223
Viral particles, 294
Viruses, 279, 301
Viscosity, reduced, 370
Viscous resistance, internal, 27
Void ratio, 312
Void space, hydraulic radius of, 9
Volatile oil reservoirs, 837
Volume averaging, 413, 441
    local, 350
Volume fractions, 854
Volume saturation, 167
  of phases, 146

W
Waste disposal, 691
Water
  advancement, 581
  CO$_2$ fluid, 169
  magmatic, 145
  oil displacement, 572
  penetration, 145
  saturation, 518
Wave number, 102, 124
Wavelength, 107
Well constraints, 833
Wellbore model, 212
Wettability, 53
Wetting front, 860
Wetting properties, 553

Y
Yield coefficient, 300
