2.4	Semantic history	69
4.1	From formal bureaucracy to polycentry	95
4.2	Administrative forms of reality	98

Acknowledgements

This book began as a collaborative work for an article with Hanne Knudsen, and a number of the basic ideas in this book have been developed together with her. Hanne Knudsen is currently writing her PhD dissertation at the Danish School of Education (DPU) about the cross field of school management and home-school cooperation. When it became clear that the article was to expand into a book, I continued the project on my own while she devoted her time to her dissertation. In the last part of the book I discuss a number of games played within a school environment. These are taken from Hanne's dissertation work and could not have been written without her collaboration. Therefore, I would like to express my gratitude to her.

In addition, I would like to thank Christina Thyssen who has translated the book into English. Also thanks to Gorm Madsen, Joakim Kromann Rasmussen and Helene Ratner who have assisted me generally and in obtaining the material for the book. Thanks to Liv Bjerge, my contact at the Copenhagen Business School Library. She has been an invaluable help. I would also like to thank my colleagues for many good discussions and a number of course participants, students, and others with whom I have discussed this project and who were often able to share examples and contexts that I had not been aware of. My thanks also extend to the Velux Foundation who supported our large project Management of Self-Management at the Department of Management, Politics and Philosophy, Copenhagen Business School.

Finally, I would like to thank Asmund Born, who is the best reader I know. Like so many times before, he has provided me with critical and inspiring arguments and compelled me to do my best.

This book has proven a rather enjoyable project because it has led to travels into both empirical and theoretical corners, of which I was not aware, and as the project progressed an increasing number of doors have opened. Although my understanding of play and organization has clearly increased significantly with this work I believe that I have only started to scratch the surface of this field, which calls for future studies.

NIELS ÅKERSTRØM ANDERSEN
