USD	US Dollar

Acknowledgements

First of all, it is my great pleasure to thank Birgit Hoffmeyer, occasionally my reluctant tennis partner in the distant past, for her patience and forbearance. Without her constructive criticism at the early stages of this project, it would never have materialized. Gustav Wedell-Wedellsborg, another friend since time immemorial, had the arduous task of reading some early drafts and saved me from embarrassing errors.

Secondly, I owe many thanks to all the colleagues and customers I have met during nearly 30 years of banking in the Nordic region. They include CFOs from the 200 largest Nordic corporations as well as fellow bankers from inside and outside the Nordic region, but they are too numerous to mention individually. They have all contributed to my knowledge of banking and corporate finance, and many of them have also stimulated my interest in the historical background and development of their respective institutions.

Thirdly, I am fortunate to have been assisted by a number of individuals and institutions, each of whom deserves my special thanks:

On the Danish mortgage institutions, I have received invaluable help from Realkredit Danmark (Karin Havers and Mogens Holm) and BRFKredit (Sickan Rasmussen). On Danish stock exchange matters, I am deeply grateful for the assistance given to me by the Copenhagen Stock Exchange, Ellen-Margrethe Soelberg and her colleagues, who found some delightfully illustrative specimens of information in the cellars of the Exchange. I am deeply grateful for the patience and help I have received from all of them.

On the role of central banks in the most recent crisis, I have benefited greatly from discussions with Jesper Berg, until recently Head of Department in Danmarks Nationalbank, and co-author of a book on the financial crisis (*Finansernes Fald*, 2009).

On banking matters, I am grateful to each of the Nordic Bankers' Associations, all of which have been most helpful. It was particularly illuminating to discuss the Swedish banking crisis experience with Mats Stenhammar and Christian Nilsson of the Svenska Bankföreningen.

In the Danish Bankers Association (Finansrådet) I have benefited from invaluable help from Klaus Willerslev-Olsen, Senior Vice President, and some of his colleagues, notably Birte Hansen, head of the library.

On Finnish financial history, I have been helped particularly by Professor Antti Kuusterä and Juha Tarkka, Advisor to the Board of the Bank of Finland. Their kind advice and the access they gave me to certain sections of the archives of the Bank of Finland has been invaluable. Kaija Erjanti, The Finnish

Bankers Association, has patiently answered several questions for me, for which I am deeply grateful.

Also, I should express sincere thanks to Aapo Nikunen, Timo Nyman, and Heikki Rätty, my Finnish friends, all in various ways connected to the Finnish corporate and financial world. They have all assisted me in their own ways, not least by their interest and inspiration, as well as occasional translations from the not-so-easy Finnish language.

Monica Bergström, of the Helsinki Stock Exchange, deserves my deeply felt thanks for the statistical information she has provided to me.

In Norway, Norges Bank (Turid Wammen) helped me in several ways, for which I am seriously grateful.

To Søren Weis Dahl I am eternally grateful for his assistance with technical matters. Without his deep knowledge of text processing, this book would never have appeared. In addition, the long walks he has allowed me to take with Rolf, his dog, have provided me with opportunities to have long and almost uninterrupted philosophical discussions about the project.

Last, but not least, I must express a deeply felt gratitude to Vibeke, my wife for 38 years. She not only took upon herself to read through hundreds of pages, which were, eventually, never included in the book, but more importantly, she has bravely put up with all the inconveniences resulting from my preoccupation with the production of this book. Her understanding for my preoccupation has been truly remarkable.

Deeply felt thanks are also due to my late father, Svend Andersen, employed in Danmarks Nationalbank from 1942 to 1982, member of the Board of Governors 1963–1982, and president of the Copenhagen Stock Exchange, 1982–1985. My father greatly stirred my interest in history as well as economics and banking.

Any errors, misrepresentations, or misunderstandings are, of course, my sole responsibility.

Steffen E. Andersen
