Contents

<i>Acknowledgements</i>	ix
General Introduction	1
Knowledge and its influence on technological innovation and development	3
The theoretical foundation: approaching the study of science and technology through the lens of ‘ <i>neuro-rational physicalism (NRP)</i> ’	7
An overview of this book	10
Part I Emerging Strategic Technologies: Geopolitical Implications	
1 Introduction	15
2 Information and Communications Technology (ICT)	18
General overview	18
The global ICT industry	18
Relevant technologies	19
Regulatory structures	25
Challenges	31
Geopolitical implications of ICT	35
An overview of key trends and developments in ICT	45
3 Energy and Climate Change	47
General overview	47
Climate change: the nature of the threat	47
The global energy industry: challenges and trends	51
The intersection of climate and energy: relevant strategic technologies	52
Governance and regulation	62
Geopolitical implications of technology for energy and the environment	67
An overview of key trends and developments	71
4 Health Care	73
General overview	73

	The global health care industry	74
	Key technological drivers in health care and medicine	75
	Geopolitical implications of health care technologies	79
5	Biotechnology	88
	General overview	88
	The biotechnology industry	90
	The different areas of biotech research	91
	Biotechnology, the dual-use dilemma and research governance	95
	Geopolitical implications of biotechnology	99
	An overview of the key trends and developments in biotechnology	104
6	Genomics	106
	Genomics: a general overview	106
	The genomics industry: past, present and future	107
	Different areas of genetic research	108
	Proteomics: a complementary science	112
	Metabolomics	113
	Epigenetics	114
	International governance and regulation	115
	Geopolitical implications of genomics	115
	An overview of key trends and developments in genomics	122
7	Nanotechnology	123
	General overview	123
	Regulating nanotechnology: risks and opportunities	126
	Nanoconvergence: combining nanotechnology with other technologies	129
	Geopolitical implications of nanotechnology	132
8	Materials Science	139
	General overview	139
	The materials science industry and relevant technologies	139
	The regulation of materials science	145
	Geopolitical implications of materials science	146
	An overview of key trends and developments	150
9	Artificial Intelligence	152
	Artificial intelligence: a general overview	152

Relevant technologies: AI	155
Regulatory structures	159
Geopolitical implications of artificial intelligence	162
An overview of key trends and developments in artificial intelligence	171
10 Conclusions of Part I	172
Part II Emerging Strategic Technologies: Human Enhancement, Dignity and Destiny Implications	
11 Introduction: Definitions, Terms and Concepts	177
General overview	177
Definitions	178
Conclusion	193
12 Human Enhancement: The Nature of the Debate	194
The case against enhancement	194
The case for enhancement	198
Technodemocrats	203
My view: the inevitability of human enhancement	204
<i>'Inevitable transhumanism'</i> and a framework for the human enhancement debate	206
13 The Science and Technology of Human Enhancement	208
Physical enhancements	208
Reproductive enhancements	212
Mental and cognitive enhancements	216
Neuroscience and human enhancement	219
Conclusion	223
14 The Geopolitics of Human Enhancement: Applying the <i>'Multi-Sum Security Principle'</i>	224
The <i>'multi-sum security principle'</i>	224
Human enhancement in the framework of the <i>'multi-sum security principle'</i>	229
Moving beyond the <i>'multi-sum security principle'</i> : human enhancement as an existential threat	241
15 Criteria for a Regulatory Framework of Human Enhancement	245
The United Nations	245
The major technological players	246
Relevant agencies	247

What should be permissible?	249
Who should decide what is permissible?	254
16 Conclusions of Part II	256
General Conclusions	260
<i>Notes</i>	273
<i>Index</i>	333

Acknowledgements

The author would like to thank the following people for their help: Amber Stone-Galilee, Liz Blackmore, Andrew Marsh, Bethany Reichenmiller, Lyubov Nazaruk, Christina Lycke, Beatrice Fihn and Julia Knittel.

He also would like to thank his colleagues at St Antony's College, Oxford University, and the Geneva Center for Security Policy, Geneva, Switzerland for their help and support.

The author and publishers wish to thank the following for permission to reproduce copyright material: LIT Publishers, for Figures 1–3, from Nayef R.F. Al-Rodhan (2009) *Sustainable History and the Dignity of Man: A Philosophy of History and Civilisational Triumph* (Berlin: LIT) and for Figure 4 from Nayef R.F. Al-Rodhan (2007) *The Five Dimensions of Global Security: Proposal for a Multi-sum Security Principle* (Berlin: LIT).

Every effort has been made to trace all copyright-holders, but if any have been inadvertently overlooked the publishers would be pleased to make the necessary arrangements at the first opportunity.

The views expressed in this book are entirely those of the author and do not necessarily reflect those of St Antony's College, Oxford University, or the Geneva Center for Security Policy.
