7.2	Labour force participation rates, 1960, 1973 and 1999	149
7.3	Expenditure on social protection as a percentage of GDP in European Union nations, 1993 and 1998	152
8.1	The polarisation of employment between households, OECD Nations, 1983–94	172
9.1	The 12 steps to formalisation of cash-in-hand work of Street (UK)	186

Acknowledgements

This book reports the findings of five separate but inter-related research projects conducted over the past five years. The English Localities Survey reported in this book that examines cash-in-hand work in deprived and affluent English urban and rural localities is the cumulative result of three grants. The Joseph Rowntree Foundation funded the study of urban lower-income neighbourhoods as part of its programme of research and innovative development projects, which it hopes will be of value to policy makers and practitioners. The facts presented and views expressed in this book, however, are those of the author and not necessarily those of the Foundation. The author would also like to thank Jan Windebank who co-authored the final report on this project as well as Stephen Hughes who provided the research assistance to bring this study to fruition.

The data set on higher-income urban neighbourhoods, meanwhile, was funded in part by the European Commission's DG12 under its Targeted Socio-Economic Research (TSER) programme. This evidence was collected as part of a project entitled 'Inclusion through Participation' (INPART). In this regard, the author would like to thank Rik van Berkel who managed the six-nation project team as well as the other European partners. In particular, I would like to thank my UK colleagues, namely Maurice Roche and Jo Cooke, without whom this data could not have been collected.

The third data set on rural localities arose out of a project funded by The Countryside Agency. I would like to take this opportunity to thank them for funding this project on mutual aid in rural areas as well as to display my gratitude to Richard White and Theresa Aldridge for their energetic and enthusiastic research assistance.

Many of the ideas on cash-in-hand work developed in this book were first tried and tested in the context of a twelve-nation project funded by the European Commission's Targeted Socio-Economic Research programme entitled 'Comparative Social Inclusion Policy and Citizenship in Europe: towards a new social model'. The regular and enjoyable meetings with the partners from other European Union nations enabled me to forge my ideas in a way that would not otherwise have been possible. In this regard, I would like to thank the following people in particular

for their inputs: Claire Ainesley, Rik van Berkel, Soledad Garcia, Henning Hansen, Pedro Hespanha, Iver Hornemann-Møller, Angelika Kofler, Jens Lind, Enzo Mingione, Maurice Roche, David Smith, Ben Valkenburg, Jacques Vilrocx and Enid Wistrich. Although they will doubtless take issue with many of the ideas in this book, their interventions and inputs have played a large part in helping me develop the ideas conveyed herein.

The fifth and final source of funding that has fuelled the ideas expressed here was the Economic and Social Research Council (ESRC) grant 'Evaluating Local Exchange and Trading Schemes as a tool for combating social exclusion' (R000237208). This was carried out in collaboration with Theresa Aldridge, Roger Lee, Andrew Leyshon, Nigel Thrift and Jane Tooke. I would like to take this opportunity to thank all of my co-partners in this project as well as the respondents who gave their time freely and committed far more to this project than could have been expected.

This book was completed during a period of study leave from the University of Leicester, for which I am very grateful to the University. As always, however, the normal disclaimers apply.
