## Preface

In the 20 years since our first collaboration Jean Besson has moved from Aberdeen to London and Janet Momsen from Newcastle upon Tyne to California. However, new electronic communication has bridged the spatial distance. Face to face work was made possible by Jean's leave from Goldsmiths College and Janet's sabbatical leave in the United Kingdom in spring 2006. This meant that we could spend long hours working in Jean's conservatory jointly editing and making decisions about the shape of the book. We thank John Besson for his patience and practical help while we worked on the book. Janet's children, Rick and Magnus, are now grown-up, but they continue to be supportive of her work for which she is very grateful.

We also thank John's sister Daphne Besson for so willingly taking on the translation of the paper submitted by a French author. This was an enormous help to progress on the book. We are also grateful to Peggy Hauselt of the University of California, Davis for drawing the Frontispiece and Maps 13.1 and 13.2.

Our Editor at Palgrave Gabriella (Ella) Georgiades has been consistently responsive to our queries while preparing the manuscript. We appreciate her help. We also thank James Dunkerley, Director of the Institute for the Study of the Americas (ISA), University of London School of Advanced Study, and General Editor of ISA's Studies of the Americas Series for his enthusiastic support of our book.

This sequel to our 1987 *Land and Development in the Caribbean* (Macmillan) has only David Lowenthal and the editors who also contributed to the earlier book. We now have a much wider coverage of the region and of issues related to land and development. This completely new volume includes both well-established scholars as well as those who have only recently finished their PhDs. We thank them all for their contributions.
