This book is dedicated to Miss Caragh Brien, my wonderful daughter.

Colin R. Martin
Foreword

The Editors are to be commended for bringing together what is arguably the best and most comprehensive text book on the complex interrelationships between the brain, behaviour, food selection and choice. There are more than 200 chapters describing not only how behaviour affects our food selection but also how what we eat affects how we behave. Content covers genetics, sensory factors, endocrine and neuro-endocrine processes, neurology, behaviour, psychology, physiology, the act of eating, food choice, selection, preferences, appetite, pregnancy, human development, children and adolescents, ageing, anorexia nervosa, bulimia nervosa, obesity, nutrient excess and toxicity, alcoholism, quality of life, body image and much more. The authors have helpfully included chapters on changing eating behaviour and attitudes. The International Handbook of Behavior, Food and Nutrition can truly be said to be research based, theoretical, factual, scientific, academic and practical.

The International Handbook of Behavior, Food and Nutrition is without doubt a quality text attractive to the wide range of practitioners and intelligent readers with an interest in these areas. These contributions are a testament not only to the skills of the authors, but the Editorial attributes of Professor Preedy, Watson and Martin. They have marshalled together a truly international team of experts. I especially like the structuring of the chapters. Each contribution has a mini-dictionary, “key facts” and “summary points” to facilitation the navigation across fields of interest.

This is a cross-disciplinary book of tremendous importance to the health of individuals and society at large and deserves wide dissemination.

The Editors and all the authors are to be congratulated.

Prof Betty Kershaw DBE FRCN
Emeritus Dean
The School of Nursing and Midwifery
The University of Sheffield
United Kingdom
Preface

In this book the Editors aims to disseminate important data pertaining to the modulatory effects of foods and nutritional substances on behavior and neurological pathways and visa versa. This ranges from the neuroendocrine control of feeding to the effects of disease on the brain. The importance of this book pertains to the fact that food is an essential component of cultural heritage but the effects of perturbations in the food-cognitive axis can be quite profound. The complex inter-relationship between neuropsychological processing, diet and behavioural outcome is explored within the context of the most contemporary psychobiological research in the area. This comprehensive psychobiologically and pathology-themed text examines the broad spectrum of diet, behavioural and neuropsychological interactions from normative function to occurrences of severe and enduring psychopathology. The Editors have taken a scientific and objective stand and included chapters that scrutinize the relationships between the brain, behaviour, food and nutrition in a scientific and rational way.

In very simple terms this books addresses limitations in other works that may individually look at the one-way-traffic of either food and behavior. This book examines via two-way-traffic at multiple levels. For example, it examines at both preclinical and clinical levels, genes and populations, and how (a) components in food will affect our sensory responses and (b) how our behavior and sensory responses affect what foods we eat, their pattern of consumption and so on. This book consists of over 200 chapters, and is conveniently divided into 5 main sections to represent the various specialty areas, namely:

- General, normative aspects and overviews
- Pathological and abnormal aspects
- Specific conditions and diseases
- Changing eating behaviour and attitudes
- Selective methods

The Editors recognize the difficulty in assigning chapters to specific sections. For example in order to describe normative features, abnormal aspects of diet and behavior may also be described. Chapters on food choice may have coverage on the developing brain, behavior and neuroendocrinology. Thus, some chapters can potentially be assigned to several sections. However, this is resolved with the excellent indexing systems that Springer is renowned for. The chapters are well illustrated with numerous tables and figures.

This book represents a multidisciplinary “one-stop-shop” of information with suitable indexing of the various pathways and processes. The chapters are written by
national or international experts or specialists in their field. The Editors recognize that very often experts in one field may be novices in another. To bridge this knowledge-divide the authors have incorporated sections on “Applications to other areas health and disease”, “Key Facts or Features” and “Summary Points” This reference book is for nutritionists, dietitians, food scientists, behavioral scientists, psychologists, doctors, nurses, physiologists, health workers and practitioners, college and university teachers and lecturers, undergraduates and graduates.
Contents

Volume 1

Part I:  General and Normative Aspects: Evolutionary and Genetic

1  Diet and Brain Evolution: Nutritional Implications of Large Human Brain Size ....................................................... 3
   William R. Leonard, J. Josh Snodgrass, and Marcia L. Robertson

2  Epigenetics, Phenotype, Diet, and Behavior ........................................ 17
   Patrick O. McGowan, Michael J. Meaney, and Moshe Szyf

3  The Michigan State University Twin Registry (MSUTR): Genetic, Environmental, and Neurobiological Influences on Food and Diet-Related Behavior ................................................. 33
   Sarah E. Racine, Kristen M. Culbert, S. Alexandra Burt, and Kelly L. Klump

Part II:  General and Normative Aspects: Sensory

4  Cerebral Activity to Visual Presentation of Food ............................. 47
   Jyrki T. Kuikka

5  Infant Visual Acuity and Relationships with Diet and Nutrition ..... 59
   Michelle P. Judge, Carol J. Lammi-Keefe, and Holiday Durham

6  Acquired Tastes: Establishing Food (Dis-)Likes by Flavour–Flavour Learning ......................................................... 73
   Remco C. Havermans and Anita Jansen

7  Personality Traits in the Context of Sensory Preference:
   A Focus on Sweetness ................................................................. 85
   Paul Richardson and Anthony Saliba
8 Changes to Taste Perception in the Food Industry: Use of Cyclodextrins
Giani Andrea Linde, Antonio Laverde Jr, and Nelson Barros Colauto

9 Infantile Olfactory Learning
Katsumi Mizuno

10 Texture and Diet Related Behavior: A Focus on Satiation and Satiety
Annette Stafleu, Nicolien Zijlstra, Pleunie Hogenkamp, and Monica Mars

11 Sensory Education: French Perspectives
Caroline Reverdy

Part III: General and Normative: Endocrine and Neuroendocrine

12 The Role of Cholecystokinin (CCK) in Eating Behavior
Mihai Covasa and Timothy Swartz

13 The Role of Ghrelin in Eating Behavior
Mihai Covasa and Timothy Swartz

14 The Role of Glucagon-Like Peptide-1 (Glp-1) in Eating Behavior
Mihai Covasa and Timothy Swartz

15 The Role of PYY in Eating Behavior and Diet
Jennifer L. Scheid and Mary Jane De Souza

16 The Role of Enterostatin in Eating Behavior and Diet
Charlotte Erlanson-Albertsson

17 The Paradoxical Role of Glucose-Dependent Insulinotropic Polypeptide (GIP) in Diet and Eating Behaviour in Health and Disease
L.R. Ranganath and J. Pinkney

18 The Relationship between the IGF System, Nutrition, and Behavior
Moira S. Lewitt

19 Leptin and the CNS
Jenni Harvey

20 Oxytocin and Appetite
Céline Caquineau and Gareth Leng

   Control over Motor, Cognitive, and Emotional Responses 
   in Women with Bulimia Nervosa............................................................ 2549  
   Sonia Rodríguez-Ruiz, Silvia Moreno, M. Carmen Fernández, Antonio 
   Cepeda-Benito, and Jaime Vila
162 Experiences of Women with Bulimia Nervosa ................................... 2565
Kathryn Proulx

163 The Night Eating Syndrome: An Overview ........................................ 2583
Jennifer D. Lundgren

Part XXVII: Metabolic Syndrome and Non-obese Overweight

164 Metabolic Syndrome as a Disorder of the Brain
with Its Origins in the Perinatal Period .............................................. 2597
Undurti N. Das

165 Schizophrenia and the Metabolic Syndrome ...................................... 2617
Jared Edward Reser

166 Nutrition, Behavior, and the Developmental Origins
of the Metabolic Syndrome ............................................................... 2627
Jared Edward Reser

Part XXVIII: Obesity

167 The Relationship Between Television Viewing and Overweight
and Obesity in Young Children: A Review of Existing
Explanations .................................................................................. 2641
Vickii B. Jenvey

168 The Dopamine Transporter Gene (DAT1) in Obesity
and Binge Eating Disorders ........................................................... 2659
Karen Wight, Caroline Reid-Westoby, and Caroline Davis

169 Feeding and Satiety Signals in Prader-Willi Syndrome:
Relation to Obesity, Diet, and Behavior ........................................ 2673
Maithe Tauber, Emmanuelle Mimoun, Patrick Ritz, and
Gwenaelle Diene

Part XXIX: Diabetes

170 Insulin and Clinical Eating Disorders in Diabetes ......................... 2693
Masato Takii

171 Comparing Abnormal Eating Behavior
in Type 1 and 2 Diabetic Patients ...................................................... 2713
Patrick Ritz, Monelle Bertrand, and Hélène Hanaire

172 Binge Eating in Overweight and Obese Individuals with
Type 2 Diabetes ........................................................................... 2721
Amy A. Gorin, Heather M. Niemeier, and Anna Schierberl Scherr
## Part XXX: Nutrient Excess and Toxicity

173 **High Blood Glucose and Damage to Neuronal Tissue** ........................................ 2733  
Robert R. Miller Jr.

174 **Neurological Aspects of Dietary Lead** ............................................................... 2755  
Kim M. Cecil and Diana M. Lindquist

175 **Diet- and Mercury-induced Visual Loss** .............................................................. 2775  
Cian E. Collins

## Part XXXI: Aging and Dementia

176 **Soy, Tofu and Brain Function in the Elderly** ..................................................... 2783  
Amina Yesufu-Udechuku, Tri Budi W. Rahardjo, and Eef Hogervorst

177 **Nutritional Risk in the Elderly with Cognitive Impairment:**  
**A Far Eastern Perspective** ................................................................................. 2817  
Kang Soo Lee and Chang Hyung Hong

178 **Aluminium in the Diet, Cognitive Decline and Dementia** ................................. 2829  
Vincenza Frisardi, Vincenzo Solfrizzi, Patrick G. Kehoe,  
Bruno P. Imbimbo, Gianluigi Vendemiale, Antonio Capurso,  
and Francesco Panza

179 **Dietary Fatty Acids, Cognitive Decline, and Dementia** ....................................... 2851  
Vincenzo Solfrizzi, Vincenza Frisardi, Cristiano Capurso,  
Alessia D’Introno, Anna M. Colacicco, Gianluigi Vendemiale,  
Antonio Capurso, and Francesco Panza

180 **Nutritional Issues for Older People and Older People**  
**with Dementia in Institutional Environments** ......................................................... 2885  
Angela B. Kydd

## Volume 5

## Part XXXII: Alcohol

181 **Diffusion Tensor Imaging of the Brain in Fetal Alcohol Spectrum Disorder** ........ 2897  
Catherine Lebel, Carmen Rasmussen, and Christian Beaulieu

182 **Neuronal Cell Migration in Fetal Alcohol Syndrome** ......................................... 2915  
Tatsuro Kumada, Yutaro Komuro, Ying Li, Yoav Littner,  
and Hitoshi Komuro

Ana I. Esquifino, Ph.D.
Departamento de Bioquímica y Biología Molecular III, Universidad Complutense,
28040 Madrid, Spain

Christine Feinle-Bisset
Discipline of Medicine, Royal Adelaide Hospital, Adelaide, South Australia, Australia

Dorianne Feldman, M.D., MSPT
Department of Physical Medicine and Rehabilitation, School of Medicine, Johns
Hopkins University, Baltimore, MD

Marlís González Fernández, M.D., Ph.D.
Department of Physical Medicine and Rehabilitation, School of Medicine,
Johns Hopkins University, Baltimore, MD

M. Carmen Fernández
Departamento de Personalidad, Evaluación y Tratamiento Psicológico, Facultad de
Psicología, Universidad de Granada, Granada, Spain

Elizabeth Ferris
University of Arizona, Mel & Enid Zuckerman College of Public Health, Tucson,
AZ, USA
and
Department of Psychiatry, Center for Weight and Eating Disorders,
University of Pennsylvania School of Medicine, Philadelphia, PA, USA

Mick P. Fleming
School of Health, Nursing and Midwifery, University of the West of Scotland,
Beech Grove, Ayr, UK
Eduardo Fonseca-Pedrero
Department of Psychology, University of Oviedo, Centro de Investigación Biomédica en Red de Salud Mental, CIBERSAM, Plaza Feijoo, s/n, Oviedo, 33003, Spain

Georg Förster
Department of Psychology, University of Würzburg, Würzburg, Germany

Joanna S. Fowler, Ph.D.
Medical Department, Brookhaven National Laboratory, Upton, New York, USA

Vincenza Frisardi, M.D.
Department of Geriatrics, Center for Aging Brain, Memory Unit, University of Bari, Bristol, UK

Gilles Fromentin
INRA, CNRH-IdF, UMR914 Nutrition Physiology and Ingestive Behavior, F-75005 Paris, France and AgroParisTech, CNRH-IdF, UMR914 Nutrition Physiology and Ingestive Behavior, F-75005 Paris, France and UMR 914 INRA/AgroParisTech, 16 rue Claude Bernard, 75231 Paris Cedex 05, France

Toshikatsu Fujii
Department of Behavioural Neurology and Cognitive Neuroscience, Tohoku University Graduate School of Medicine, Sendai, Japan

Tahany M. Gadalla, Ph.D., M.Sc., MMath
Factor-Inwentash Faculty of Social Work, University of Toronto, 246 Bloor Street West, Toronto, Ontario, Canada, M5S 1V4

Salah Gariballa, M.D., FRCP
Department of Internal Medicine, Faculty of Medicine and Health Sciences, UAE University, Al-Ain, United Arab Emirates

Michael K. Georgieff, M.D.
Department of Pediatrics, Neonatology Division & Center for Neurobehavioral Development, School of Medicine, University of Minnesota, 420 Delaware St. SE, MMC 39 (for mail), D-136 Mayo Building (for courier), Minneapolis, MN 55455, USA

E.L. Gibson
Clinical and Health Psychology Research Centre, Department of Psychology, Whitelands College, Roehampton University, Holybourne Avenue, London SW15 4JD, UK

Giuseppe Derosa, M.D., Ph.D.
Department of Internal Medicine and Therapeutics, University of Pavia, Pavia, Italy

Cheryl Glover
School of Health, Nursing and Midwifery, University of the West of Scotland, Ayr Campus, Beech Grove, Ayr, UK
Bertrand Godet
Service de Neurologie, Centre Hospitalier Universitaire, Limoges, France

Dina Gohar
Department of Psychology, University of Pennsylvania, Philadelphia, PA, USA

Iratxe Gonzalez

Oscar Gonzalez-Perez, M.D., Ph.D
Laboratory of Neuroscience, School of Psychology, University of Colima,
Av. Universidad 333, Colima, Col 28040, México
and
Neuroscience Department, Centro Universitario de Ciencias de la Salud,
University of Guadalajara, Guadalajara, Jal 44340, México

E. González-Reimers
Servicio de Medicina Interna, Hospital Universitario de Canarias, Ofra s/n 38320,
La Laguna, Tenerife, Canary Islands, Spain

S.A. van Goor
University Medical Center Groningen, Nijlandspark 26, 9301 Bz Roden,
The Netherlands

Amy A. Gorin, Ph.D.
Department of Psychology, Center for Health, Intervention, and Prevention,
University of Connecticut, 2006 Hillside Road, Storrs, CT 06269-1248, USA

Alja Gössler
Department of Pediatric and Adolescent Surgery, General Hospital Klagenfurt,
St.Veiter Str. 47, 9020 Klagenfurt, Austria

Reiko Graham
Department of Psychology, Texas State University, San Marcos, TX, USA

Riccardo Dalle Grave, M.D.
Department of Eating and Weight Disorder, Villa Garda Hospital,
Via Montebaldo 89, I-37016 Garda (VR), Italy

Michael W. Green
Nutrition and Behaviour Laboratory, Psychology Department, School of Life and
Health Sciences, Aston University, Birmingham, UK, B4 7ET

Melinda A. Green
Department of Psychology, Cornell College, 106E Law Hall,
600 First Street West, Mt. Vernon, IA 52314

G. Grugni
Department of Auxology, IRCCS ‘S. Giuseppe Hospital’-Verbania, Roma, Italy

Rubem Carlos Araújo Guedes, M.D., Ph.D.
Departamento de Nutrição, Universidade Federal de Pernambuco,
BR-50670901, Recife, PE, Brazil
Matthieu J. Guitton, Ph.D.
Centre de Recherche Université Laval Robert-Giffard (CRULRG), 2601 Chemin de la Canadière F-6517, Québec, QC, G1J 2G3, Canada
and
Faculty of Pharmacy, Laval University, Quebec City, QC, Canada

Alissa A. Haedt, M.A.
Department of Psychiatry, University of Iowa, Iowa City, IA, USA

Jason C.G. Halford
Kissileff Laboratory for the Study of Human Ingestive Behaviour,
School of Psychology, University of Liverpool, Liverpool, UK

John Hall, Ph.D.
Deakin Business School, Deakin University, Melbourne, Victoria, Australia

Hélène Hanaire
Unité de Nutrition, CHU Larrey, Toulouse cedex

Rhona M. Hanning, Ph.D., RD
Department of Health Studies and Gerontology, University of Waterloo, Waterloo, Ontario, Canada

Joanne A. Harrold
Kissileff Laboratory for the Study of Human Ingestive Behavior, School of Psychology, University of Liverpool, Liverpool, UK

Sybil L. Hart, Ph.D.
Texas Tech University, Department of Human Development and Family Studies, Lubbock, TX 79409-1230

Jenni Harvey
Division of Medical Sciences, Centre for Neuroscience, Ninewells Hospital and Medical School, University of Dundee, Dundee DD1 9SY, UK

Kenji Hashimoto
Division of Clinical Neuroscience, Chiba University Center for Forensic Mental Health, 1-8-1 Inohana, Chiba 260-8670, Japan

Michio Hashimoto
Department of Environmental Physiology, Shimane University Faculty of Medicine, Izumo, Shimane 693–8501, Japan

Remco C. Haermans
Department of Clinical Psychological Science, Maastricht University, Maastricht, 6200 MD, The Netherlands

Narasimha Hegde, Ph.D.
Department of Nutritional Sciences, Pennsylvania State University, University Park, PA, USA

Christopher Herrera
Delta Sleep Research Unit, Discipline of Exercise and Sport Science, The University of Sydney, Lidcombe, Australia
Marion Hetherington
Institute of Psychological Sciences, University of Leeds, Leeds, West Yorkshire, UK

Takashi Higuchi
Department of Integrative Physiology, University of Fukui, Eiheij-cho, Matsuoka, Fukui, 910-1193, Japan

Anke Hinney
Klinik für Psychiatrie und Psychotherapie des Kindes- und Jugendalters, LVR-Klinikum Essen, Kliniken und Institut der Unisitat Duisburg-Essen, Essen, Germany

Angelica Lindén Hirschberg, M.D., Ph.D.
Department of Obstetrics and Gynaecology, Karolinska University Hospital, Stockholm, Sweden

Claude Marcel Hladik
UMR CNRS/MNHN 7206, Eco-Anthropologie et Ethnobiologie, Brunoy, France

Bartley G. Hoebel
Department of Psychology, Princeton University, Princeton, NJ, USA

Wilhelm Hofmann
University of Chicago, Booth School of Business, 5807 South Woodlawn Avenue, Chicago, IL 60615

Pleunie Hogenkamp
Division of Human Nutrition, TI Food and Nutrition, Wageningen University and Research Centre, Wageningen, the Netherlands

Eef Hogervorst, Ph.D.
School of Sport, Exercise and Health Sciences, Loughborough University, Ashby Road, Loughborough, Leicestershire, United Kingdom

R.H. Holloway, B.Sc. (Med), M.B.B.S., M.D., FRACP
Discipline of Medicine, University of Adelaide, Adelaide, Australia

Chang Hyung Hong
Department of Psychiatry and Ajou Institute of Aging, Ajou University School of Medicine, San 5, Wonchun-dong, Youngtong-gu, Suwon-si, 443-749, Korea

Mary Hostler
Program Secretary, Cancer Research Center Hawaii, Prevention and Control Program, University of Hawaii at Manoa, Honolulu, HI, USA

Jonathan O’B. Hourihane, M.B., D.M., MRCPI, FRCPCH
Clinical Investigations Unit, Department of Paediatrics and Child Health, Cork University Hospital, University College Cork (UCC), Wilton, Cork, Ireland

Alexa Hoyland
Human Appetite Research Unit, Institute of Psychological Sciences, University of Leeds, Leeds, UK

Wallace Huffman, Ph.D.
Department of Economics, Iowa State University, Ames, IA 50011, USA
Ethan E. Hull, Ph.D.
Children’s Hospital of Pittsburgh, Pittsburgh, PA

Michael Huncharek, MD, MPH
Meta-Analysis Research Group, 10 Sasanqua Circle, Columbia, SC 29209, USA

Teresa Iannaccone
Department of Experimental Medicine, Section of Human Physiology, and Clinical Dietetic Service, Second University of Naples, Naples, Italy

Melinda J. Ickes, Ph.D.
Health Promotion & Education, University of Cincinnati, Cincinnati, OH, USA

Bruno P. Imbimbo, Ph.D.
Research and Development Department, Chiesi Farmaceutici, Parma, Italy and Department of Geriatrics, University of Foggia, Foggia, Italy

Syed A. Imran
Department of Physiology & Biophysics, Dalhousie University, Halifax, NS, Canada

Sheila M. Innis
Department of Paediatrics, Child and Family Research Institute, University of British Columbia, 950 West 28th Avenue, Vancouver, BC V5Z 4H4, Canada

Akio Inui
Department of Psychosomatic Internal Medicine, Kagoshima University Graduate School of Medical and Dental Sciences 8-35-1 Sakuragaoka, Kagoshima 890-8520, Japan

Shera C. Jackson, M.S., CLC
Department of Human Development and Family Studies, Texas Tech University, Lubbock, TX, USA

Sanjay Jaju, M.D. M.Phil.
Directorate of Research & Studies, DG Planning, Ministry of Health (HQ), Muscat, Sultanate of Oman

Anita Jansen
Department of Clinical Psychological Science, Maastricht University, P.O. Box 616, 6200 MD Maastricht, The Netherlands

Margaret Jastran
Division of Nutritional Sciences, Cornell University, Ithaca, NY, USA

Aminah Jatoi, M.D.
Department of Oncology, Mayo Clinic, 200 First Street SW, Rochester, Minnesota, USA

Vickii B. Jenvey
School of Psychology, Psychiatry, Monash University, Building 17, Clayton, Victoria 3800, Australia
Amanda Jepson  
Department of Psychology, Cornell College, Mt. Vernon, IA, USA  
and  
Neuroscience Department, Centro Universitario de Ciencias de la Salud, University of Guadalajara, Guadalajara, Jal, México

Amy R. Johnson  
Department of Nutrition, University of North Carolina at Chapel Hill, Chapel Hill, NC, USA

Fiona Jones  
Department of Psychology, University of Bedfordshire, Luton, LU1 3JU, UK

Michelle P. Judge, Ph.D., RD  
School of Nursing, University of Connecticut, 231 Glenbrook Rd, Unit 2026, Mansfield, CT, USA

Alexei B. Kampov-Polevoy, M.D., Ph.D.  
Department of Psychiatry, University of North Carolina at Chapel Hill, 237 Medical School Wing B, Campus Box 7160, Chapel Hill, NC 27599-7160

Natalie Kanakam  
Institute of Psychiatry, King’s College London, London, UK  
and  
Department of Academic Psychiatry, Eating, Disorder Research Unit, Guy’s Hospital, London, UK

Masanori Katakura  
Department of Environmental Physiology, Shimane University Faculty of Medicine, Izumo, Shimane, Japan  
and  
Meta-Analysis Research Group, Columbia, SC, USA

Patrick G. Kehoe, Ph.D.  
Dementia Research Group, Institute of Clinical Neurosciences, The John James Building, Frenchay Hospital, University of Bristol, Bristol, UK

A.R. Kelles, Ph.D.  
Department of Nutrition, New York Chiropractic College, Seneca Falls, New York, USA

Eva Kemps  
School of Psychology, Flinders University, GPO, Adelaide, SA 5001, Australia

Alexandra P.F. Key, Ph.D.  
Vanderbilt Kennedy Center for Research on Human Development, 230 Appleton Place, Peabody Box 74, Vanderbilt University, Nashville, TN 37203

Joan Khoo  
Discipline of Medicine, Royal Adelaide Hospital, Adelaide, South Australia, Australia

Hiroe Kikuchi  
Educational Physiology Laboratory, Graduate School of Education, The University of Tokyo, Tokyo, Japan
Atsushi Kimura
Sensory & Cognitive Food Science Laboratory, National Food Research Institute, Kannondai, Tsukuba, Ibaraki, Japan

Neil King
Human Movement Studies & Institute of Health and Biomedical Innovation, Queensland University of Technology, Brisbane, Queensland, Australia

Kelly L. Klump, Ph.D.
Department of Psychology, Michigan State University, East Lansing, MI, USA

Y. Kodra
National Centre for Rare Diseases, Istituto Superiore di Sanità, Roma, Italy

Anna Kokavec, Ph.D.
School of Psychological Science, La Trobe University, Bendigo, Australia, 3552

Hitoshi Komuro
Department of Neurosciences/NC30, Lerner Research Institute, The Cleveland Clinic Foundation, 9500 Euclid Avenue, Cleveland, OH 44195, USA

Yutaro Komuro
Department of Neurosciences/NC30, Lerner Research Institute, The Cleveland Clinic Foundation, Cleveland, OH, USA

Takashi Kondoh, Ph.D.
Institute of Life Sciences, Ajinomoto Co., Inc., Kawasaki, Japan and AJINOMOTO Integrative Research for Advanced Dieting, Graduate School of Agriculture, Kyoto University, Kyoto, Japan and Institute of Psychiatry, King’s College London, London, UK and Department of Academic Psychiatry, Eating Disorders Research Unit, Guy’s Hospital, London, UK

Karel Krafa
Department of Pediatric and Adolescent Surgery, General Hospital Klagenfurt, Klagenfurt, Austria

David Kugler
Department of Psychology, Cornell College, Mt. Vernon, IA, USA
