

Decoding Modern Consumer Societies

Worlds of Consumption

Published in association with the German Historical Institute,
Washington, D.C.

Series Editors: Hartmut Berghoff and Uwe Spiekermann

Worlds of Consumption is a peer-reviewed venue for the history of consumption and consumerism in the modern era, especially the twentieth century, with a particular focus on comparative and transnational studies. It aims to make research available in English from an increasingly internationalized and interdisciplinary field. The history of consumption offers a vital link among diverse fields of history and other social sciences, because modern societies are consumer societies whose political, cultural, social, and economic structures and practices are bound up with the history of consumption. *Worlds of Consumption* highlights and explores these linkages, which deserve wide attention, since they shape who we are as individuals and societies.
