

## *International Political Economy Series*

Series Editor: **Timothy M. Shaw**, Visiting Professor, University of Massachusetts Boston, USA and Emeritus Professor, University of London, UK

The global political economy is in flux as a series of cumulative crises impacts its organization and governance. The IPE series has tracked its development in both analysis and structure over the last three decades. It has always had a concentration on the global South. Now the South increasingly challenges the North as the centre of development, also reflected in a growing number of submissions and publications on indebted Eurozone economies in Southern Europe.

An indispensable resource for scholars and researchers, the series examines a variety of capitalisms and connections by focusing on emerging economies, companies and sectors, debates and policies. It informs diverse policy communities as the established trans-Atlantic North declines and ‘the rest’, especially the BRICS, rise.

### *Titles include:*

Kobena T. Hanson, Cristina D’Alessandro and Francis Owusu (*editors*)  
MANAGING AFRICA’S NATURAL RESOURCES  
Capacities for Development

Daniel Daianu, Carlo D’Adda, Giorgio Basevi and Rajeesh Kumar (*editors*)  
THE EUROZONE CRISIS AND THE FUTURE OF EUROPE
