TECHNOLOGY, WORK AND GLOBALIZATION

The Technology, Work and Globalization series was developed to provide policy makers, workers, managers, academics and students with a deeper understanding of the complex interlinks and influences between technological developments, including information and communication technologies, work organizations and patterns of globalization. The mission of the series is to disseminate rich knowledge based on deep research about relevant issues surrounding the globalization of work that is spawned by technology.

Also in the series:

MATERIALITY AND SPACE
Organizations, Artefacts and Practices
Francois-Xavier de Vaujany and Nathalie Mitev

HUMANIZING THE WEB
Harri Oinas-Kukkonen and Henry Oinas-Kukkonen

MANAGING CHANGE IN IT OUTSOURCING
Albert Plugge

ADVANCED OUTSOURCING PRACTICE
Mary C. Lacity and Leslie P. Willcocks

ENTERPRISE MOBILITY
Carsten Sørensen

GLOBAL SOURCING OF BUSINESS AND IT SERVICES
Leslie P. Willcocks and Mary C. Lacity

ICT AND INNOVATION IN THE PUBLIC SECTOR
Francesco Contini and Giovan Francesco Lanzara

EXPLORING VIRTUALITY WITHIN AND BEYOND ORGANIZATIONS
Niki Panteli and Mike Chaisson

KNOWLEDGE PROCESSES IN GLOBALLY DISTRIBUTED CONTEXTS
Julia Kotlarsky, Ilan Oshri and Paul C. van Fenema

GLOBAL CHALLENGES FOR IDENTITY POLICIES
Edgar Whitley and Ian Hosein

E-GOVERNANCE FOR DEVELOPMENT
A Focus on India
Shirin Madon

OFFSHORE OUTSOURCING OF IT WORK
Mary C. Lacity and Joseph W. Rottman

OUTSOURCING GLOBAL SERVICES
Ilan Oshri, Julia Kotlarsky and Leslie P. Willcocks

BRICOLAGE, CARE AND INFORMATION
Chrisanthi Averou, Giovan Francesco Lanzara and Leslie Wilcocks

e-GOVERNANCE FOR DEVELOPMENT
Shirin Madon

CHINA’S EMERGING OUTSOURCING CAPABILITIES
Mary C. Lacity, Leslie P. Willcocks and Yingqin Zheng
Materiality and Time

Historical Perspectives on Organizations, Artefacts, and Practices

*Notes on Contributors* viii  
*List of Acronyms* xi  

Introduction: Time and Materiality: What Is at Stake in the Materialization of Time and Time as a Materialization? 1  
*François-Xavier de Vaujany, Nathalie Mitev, Pierre Laniray, and Emmanuelle Vaast*  

**Part I**  
**Materializing Time and History in Organizations: What Is at Stake?** 15  

1  Time, History, and Materiality 17  
*JoAnne Yates*  

2  Dual Iconographies and Legitimation Practices in Contemporary Organizations: A Tale of the Former NATO Command Room 33  
*François-Xavier de Vaujany and Emmanuelle Vaast*  

3  Evolution of Non-Technical Standards: The Case of Fair Trade 59  
*Nadine Arnold*  

**Part II**  
**Temporal Dynamics of Artefacts and Materiality in Organizations: The Importance of Material Traces** 79  

4  Making Organizational Facts, Standards, and Routines: Tracing Materialities and Materializing Traces 81  
*Christine McLean and Jeremy Aroles*  

5  Management Control Artefacts: An Enabling or Constraining Tool for Action? Questioning the Definition and Uses of the Concept of Affordances from a Management Control Perspective 99  
*Émilie Bérard (transl. Andrew Beresford)*  

6  Clocks, Clerks, Customers: Queue Management Systems, Post-Socialist Sensibilities, and Performance Measurement at a Retail Bank 124  
*Zsuzsanna Vargha*
7 When the *Omerta* is Broken: Sociomateriality and the History of Hazing in French Universities 145

*Hélène Lambrix*

**Part III  Stretching Out Time and Materiality in Organizations: From Presentism to *Longue Durée*** 171

8 The Historian's Present 173

*François Hartog*

9 The Role of History in Information Systems Research: Beyond Presentism 184

*Nathalie Mitev*

10 The Principles of Campus Conception: A Spatial and Organizational Genealogy. What Knowledge Can We Use from a Historical Study in Order to Analyse the Design Processes of a New Campus? 204

*Caroline Scotto*

Conclusion: Understanding Materiality and the Material Underpinnings of Organizations through a *Longue Durée* Approach 225

*Nathalie Mitev, François-Xavier de Vaujany, Emmanuelle Vaast, and Pierre Laniray*

Epilogue: Strategic Coordination Information Technologies and Europe-USA’s Organizations. Time-and-History Regimes and Information Technologies in Refolding Long-Term Elective Affinities 230

*Peter Clark*

*Index* 241

7.3 Number of online press comments before and after the event 161
10.1 Differences of the concept of campus 214
10.2 The components of the French campus example in the 1960s and the current Campus Paris-Saclay project 220
Notes on Contributors

Nadine Arnold is a PhD candidate in sociology at the University of Lucerne in Switzerland. Her research focuses on the dynamics of standardization, especially at the field level of analysis. Her doctoral dissertation explores standards as material devices that trace and influence the development of organizational fields.

Jeremy Aroles is a PhD student at the University of Manchester in the United Kingdom. He has a broad interest in organization theory. His research explores organizational processes and practices through the development of nonrepresentational approaches, based around the work of various post-structuralist philosophers.

Émilie Bérard has 15 years of experience in healthcare management. She is currently an affiliate professor at the Instituto Técnico de Estudios Superior de Occidente in Mexico. She is also an associate researcher at the Healthcare Management Innovation Centre of the Ecole Supérieure de Commerce in Paris. Her research interests focus on the role of management devices in the transformation of organizational practices.

Peter Clark is an honorary professor in organization theory at Queen Mary University in London and previously was a professor at Birmingham University. He is also a fellow at the Netherlands Institute for Advanced Studies. He is the author of the following books: Organisations in Action & Competition between Contexts in 2000 and Organisation Innovations in 2003. He has also written many articles on time, the history turn, American market empire, long-term innovations in technology and organization, and superfactuals.

François-Xavier de Vaujany is Professor of Management and Organization Studies at the Université Paris-Dauphine. His research deals with the relationship between space, artefacts, and practices in organizations, in particular (but not exclusively) in the context of ICT-related practices. His main ongoing research explores the relationship between spatial practices and legitimacy (in particular for global universities or business schools), information and socio-material practices, or fashion cycles in the adoption of IT by organizations (through the ethnographic analysis of tradeshows in France and Spain). With Nathalie Mitev, he recently co-edited a book about space in management and organization studies, Materiality and Space, published by Palgrave Macmillan.

François Hartog is Professor in Historiography and Director of Studies at the Ecole des Hautes Etudes en Sciences Sociales in Paris. A graduate from the Ecole Normale Supérieure, he contributed the concept of “historical regime” which
expresses how the categories of past, present, and future are variously articulated in different times and places. He contends that contemporary societies are characterized by “presentism” that emphasizes memory over history which entails a reconstruction and a distancing from the past.

Hélène Lambrix is preparing a PhD at Université Paris-Dauphine and is a member of the Intelligence Economique et Stratégique des Organisations research centre. Her research deals with institutional theories with a particular focus on articulating institutional logics with material practices of professionals.

Pierre Laniray is a PhD candidate at the Université Paris-Dauphine after having obtaining a master’s in Political Science and a master’s in Business Consulting and Information Technologies. Grounded in organization theory and information systems, his current research looks at the sociomaterial aspects of professional identity (or workplace identity). His teachings relate to the management of information systems and strategizing with information and communication technologies.

Chris McLean is a senior lecturer in social studies at Manchester Business School in the United Kingdom. She has conducted research projects using an ethnographic style of investigation within the newspaper printing industry, mental health care, and the UK education sector. This research has included exploring the processes and practices by which subjects and objects are repeated into action by drawing on concepts from the actor-network theory and Deleuzian thinking.

Nathalie Mitev is an associate professor at the London School of Economics’ Information Systems and Innovation Group in the Department of Management. Her research focuses on the organizational aspects of information systems from a sociological and political perspective. She carries out in-depth qualitative research and has published critical work on management studies and information systems. She is co-editor of “Materiality and Space” published in 2013 by Palgrave Macmillan.

Caroline Scotto is a PhD candidate at the Centre de Recherche en Gestion in Mines Paris-Tech. Her thesis analyses the design processes of a university campus in France. She also teaches in the School for Design, Arts and Crafts at the École Boulle. Her goal is to give the students an organizational perspective of design processes.

Emmanuelle Vaast is an associate professor of information systems in the Desautels Faculty of Management at McGill University in Montreal, Canada. She received her PhD from the Ecole Polytechnique in France. Her research questions practices and their transformations at the individual, community, network, organizational, and field levels, especially as they relate to innovations and the introduction of new technologies.
Zsuzsanna Vargha is a lecturer in accounting and organization in the School of Management at University of Leicester, United Kingdom. After receiving her PhD in sociology from Columbia University, she became a postdoctoral researcher at the Max Planck Institute for the Study of Societies in Germany and fellow in accounting at the London School of Economics.

JoAnne Yates is Sloan distinguished professor of management at the MIT Sloan School of Management. She researches communication and information as they shape and are shaped by technology over time, today and in the past. She is currently studying the history of setting industrial standards from 1900 to the present.
