

Palgrave Macmillan Studies in Banking and Financial Institutions

Series Editor: **Professor Philip Molyneux**

The Palgrave Macmillan Studies in Banking and Financial Institutions are international in orientation and include studies of banking within particular countries or regions, and studies of particular themes such as Corporate Banking, Risk Management, Mergers and Acquisition. The books' focus is on research and practice, and they include up-to-date and innovative studies on contemporary topics in banking that will have global impact and influence.

Titles include:

Elena Beccalli and Federica Poli (*editors*)

BANK RISK, GOVERNANCE AND REGULATION
LENDING, INVESTMENTS AND THE FINANCIAL CRISIS

Domenico Siclari (*editor*)

ITALIAN BANKING AND FINANCIAL LAW
SUPERVISORY AUTHORITIES AND SUPERVISION
INTERMEDIARIES AND MARKETS
CRISIS MANAGEMENT PROCEDURES, SANCTIONS, ALTERNATIVE DISPUTE
RESOLUTION SYSTEMS AND TAX RULES

Dr. Fayaz Ahmad Lone

ISLAMIC FINANCE
Its Objectives and Achievements

Valerio Lemma

THE SHADOW BANKING SYSTEM
Creating Transparency in the Financial Markets

Imad A. Moosa

GOOD REGULATION, BAD REGULATION

Elisa Menicucci

FAIR VALUE ACCOUNTING
Key Issues Arising from the Financial Crisis

Anna Omarini

RETAIL BANKING
Business Transformation and Competitive Strategies for the Future

Yomi Makanjuola

BANKING REFORM IN NIGERIA FOLLOWING THE 2009 FINANCIAL CRISIS

Ted Lindblom, Stefan Sjogren and Magnus Willeson (*editors*)

GOVERNANCE, REGULATION AND BANK STABILITY
FINANCIAL SYSTEMS, MARKETS AND INSTITUTIONAL CHANGES

Gianluca Mattarocci

ANOMALIES IN THE EUROPEAN REITS MARKET
Evidence from Calendar Effects

Joseph Falzon (*editor*)

BANK PERFORMANCE, RISK AND SECURITIZATION
BANK STABILITY, SOVEREIGN DEBT AND DERIVATIVES

Josanco Floreani and Maurizio Polato
THE ECONOMICS OF THE GLOBAL STOCK EXCHANGE INDUSTRY

Rym Ayadi and Sami Mouley
MONETARY POLICIES, BANKING SYSTEMS, REGULATION AND GROWTH IN
THE SOUTHERN MEDITERRANEAN

Gabriel Tortella, Ruiz García and Luis José
SPANISH MONEY AND BANKING
A History

Caner Bakir
BANK BEHAVIOR AND RESILIENCE

Jill M. Hendrickson
FINANCIAL CRISIS
The United States in the Early Twenty-First Century

Dimitris N. Chorafas
HOUSEHOLD FINANCE
Adrift in a Sea of Red Ink

Mario Anolli, Elena Beccalli and Tommaso Giordani (*editors*)
RETAIL CREDIT RISK MANAGEMENT

To my family, Anthi, Olympia and George, for their ever-present love but also for their patience of endlessly listening about the crisis and always responding, “cheer up, it’s the economists’ limelight!”.

Dimitris

To my lovely parents and sister, my nieces Lydia and Kyveli and to Lilian for all the love and encouragement they have given me in editing this volume.

Platon

To Nina, Ilias, Polyanna and Spyros for all the time I’ve stolen from them; and for all the love and inspiration they have given me.

Kostas

Introduction	1
<i>Dimitrios D. Thomakos, Platon Monokroussos and Konstantinos I. Nikolopoulos</i>	

Part I The Industry Perspective

1 A Retrospective on the Great Recession: Causes, Effects and Prospects <i>Inachos Lazos</i>	11
2 European Public Finances through the Crisis <i>Fabrice Montagné</i>	24
3 ECB Monetary Policy and the Euro during the Crisis <i>Athanasios Vamvakidis</i>	39
4 The Repression of Financial Markets <i>Ralph Sueppel</i>	58
5 Chasing the Tail of Financial Stability? Solutions to the Last Crisis Are the Seeds for the Next One <i>Marcel Kasumovich</i>	81

Part II The Case of Greece

6 An Empirical Study on Greece's Current Account Determinants Before and After the Outbreak of the Global Financial Crisis <i>Platon Monokroussos and Dimitrios D. Thomakos</i>	105
--	-----

7	Greek Fiscal Multipliers Revisited: Government Spending Cuts vs. Tax Hikes and the Role of Public Investment Expenditure <i>Platon Monokroussos and Dimitrios D. Thomakos</i>	130
8	The Challenge of Restoring Debt Sustainability in a Deep Economic Recession: The Case of Greece <i>Platon Monokroussos</i>	170
9	The Case for a New Refinancing of Greek Public Debt and Why a Relaxation of the Bailout Program's Future Fiscal Targets May Prove to Be a Self-Financing Policy Shift <i>Fokion Karavias and Platon Monokroussos</i>	189
10	External Debt Evolution When Global Financial Markets Are Incomplete <i>Alexis Anagnostopoulos and Gregorios D. Siourounis</i>	201
11	Foreign Direct Investment, Innovation and Brain Drain in Greece: Turning a Problem into an Opportunity <i>Constantina Kottaridi</i>	225
Part III Crisis Economics and the Road Ahead		
12	Globalized Finance in Disarray <i>Shanti P. Chakravarty</i>	257
13	The Elephant in the Euro Room <i>Alex Patelis</i>	281
14	From the Euro-Crisis to a New European Economic Architecture <i>Michael G. Arghyrou</i>	308
	Afterword: The road Ahead <i>Dimitrios D. Thomakos, Platon Monokroussos and Konstantinos I. Nikolopoulos</i>	329
	<i>Index</i>	331

List of Figures

2.1	Levels and changes in spending composition across countries (% of GDP)	31
2.2	(a) Public sector investment (% of GDP) and (b) private sector investment (% of GDP)	33
3.1	Eurozone monetary policy stance (policy rate – Taylor rule)	42
3.2	Monetary policy stance: spread from a Taylor rule (policy rate – Taylor rule)	43
3.3	Monetary policy stance (policy rate – Taylor rule)	44
3.4	Performance since the global crisis and inflation in G10 economies	45
3.5	Eurozone 5y5y inflation swap rate	45
3.6	Unemployment and the euro	49
3.7	Core inflation and the euro	49
3.8	FED vs. ECB balance sheet and EUR/USD	50
3.9	ECB vs. Fed monetary policy stance and EUR/USD	50
3.10	Eurozone current account balance (€bn)	51
3.11	Eurozone trade of goods and services with the rest of the world (€bn)	52
3.12	Eurozone current account balance (four-quarter moving sum, €bn)	53
3.13	Eurozone balance of payments (6M moving sum, €bn)	53
3.14	Share of EUR reserves and EUR/USD	54
3.15	Bank sector claims (BIS data, % of EZ GDP)	55
3.16	EZ equity flows from non-EZ (four-week average, % of AUM)	56
5.1	US financial integration much deeper than trade	84
5.2	Bank deleveraging substantial and ongoing	86
5.3	China-led EM V-shaped recovery	89
5.4	Rapid capital inflows into emerging markets (\$bn)	90
5.5	US Treasury buying dominated by central banks	92
5.6	US corporate financing needs low, debt issuance surges	93
5.7	Fixed income demand much stronger in this cycle	94
5.8	EM bond funds have a steep discount to asset value	96
6.1	Greece's current account (CA) deficit (ppts of GDP)	115

6.2	Greece's CA as a savings-investment imbalance (ppts of GDP)	116
7.1	(a) (G_t, T_t, Y_t) – negative G_t shock (–1.5% YoY) in regime 1 (lower) and regime 2 (upper); (b) (G_t, T_t, Y_t) – positive G_t shock (+1.5% YoY) in regime 1 (lower) and regime 2 (upper)	160
7.2	(G_t, T_t, Y_t) – negative G_t shock (–3 YoY) in regime 1 (lower) and regime 2 (upper); (b) (G_t, T_t, Y_t) – positive G_t shock (+3 YoY) in regime 1 (lower) and regime 2 (upper)	161
7.3	(G_t, T_t, Y_t) – negative G_t shock (–5 YoY) in regime 1 (lower) and regime 2 (upper); (b) (G_t, T_t, Y_t) – positive G_t shock (+5 YoY) in regime 1 (lower) and regime 2 (upper)	162
7.4	Critical threshold for TVAR model specification $y_t = (G_t, T_t, Y_t)$	163
7.5	(a) (G_t, T_t, Y_t) – negative T_t shock (–1.5% YoY) in regime 1 (lower) and regime 2 (upper); (b) (G_t, T_t, Y_t) – positive T_t shock (+1.5% YoY) in regime 1 (lower) and regime 2 (upper)	163
7.6	(a) (G_t, T_t, Y_t) – negative T_t shock (–3% YoY) in regime 1 (lower) and regime 2 (upper); (b) (G_t, T_t, Y_t) – positive T_t shock (+3% YoY) in regime 1 (lower) and regime 2 (upper)	164
7.7	(a) (G_t, T_t, Y_t) – negative T_t shock (–5% YoY) in regime 1 (lower) and regime 2 (upper); (b) (G_t, T_t, Y_t) – positive T_t shock (+5% YoY) in regime 1 (lower) and regime 2 (upper)	165
7.8	Critical threshold for TVAR model specification $y_t = (G_t, T_t, Y_t)$	166
8.1	Debt-to-GDP ratio evolution, under different fiscal adjustment scenarios using potential GDP growth as the baseline	178
8.2	Debt-to-GDP ratio evolution, under different fiscal adjustment scenarios using the GDP growth of the revised Greek adjustment program as baseline	181
8.3	Response of GDP to one-off cyclical adjustment	186
10.1	Calibrated Impulse Response Functions to a one period one standard deviation positive productivity shock in an economy with external debt option	216

11.1	Crisis and recovery paths of the US and Greece (years since start of contraction)	227
11.2	Future plans of respondent, migration survey	238
11.3	The interrelationships among innovation, human capital, FDI and growth and the effect of brain drain on economic growth via its leakages from key growth- enhancing factors and growth itself	243
13.1	Current account balance	282
13.2	Current account balance – 2	283
13.3	Unemployment rate	285
13.4	Germany	286
13.5	Unit labor costs	287
13.6	Unit labor costs – 2	288
13.7	HICP	289
13.8	Germany house prices	289
13.9	MFI loans to households	290
13.10	MFI loans to nonfinancial corporates	291
13.11	Trade balance, 12m total	292
13.12	2014 current account balance	297
13.13	Germany's international investment position	298
13.14	Germany's exports	299
13.15	German trade balance, changes since March 2008	300
13.16	Germany's trade balance	301
13.17	Germany's gross external assets, by type of holder	301
13.18	Germany's gross external assets, change 2009–2013	302
13.19	Germany's gross external assets, by type of asset	302
13.20	Germany's net investment abroad, 2009–2013	303
13.21	Germany's banks: foreign claims, end 2013	305

List of Tables

2.1	Impact of lower interest rates on debt servicing costs	26
2.2	Fiscal multipliers vary across spending and revenues	35
6.1	Current account determinants and sign of theoretical relationship	113
6.2	Determinants of Greece's current account balance: alternative VECM specification	120
6.3	Data and notation	126
6.4	Unit root test results for current account-to-GDP, <i>ca</i> (in levels)	127
6.5	Unit root test results for the first differenced series of <i>ca</i> variable	127
6.6	Cointegration tests	127
7.1	Greece: general government revenues and expenditures compared to EU average	144
7.2	Package of new austerity measures 2013–2016/1	146
7.3	Raw data and definition of variables	148
7.4	Output response to government current expenditure shocks	152
7.5	Output response to government net revenue shocks	153
7.6	Output response to government current expenditure shocks – 2	155
7.7	Output response to government net revenue shocks – 2	156
7.8	Output response to public investment expenditure shocks	157
8.1	Evolution of gross public debt ratio and underlying assumptions	185
9.1	Impact of EU bailout loan restructuring on Greece's general government debt ratio	193
9.2	Cumulative impact of EU bailout loan restructuring on Greece's general government net borrowing requirement in billion euros (negative sign indicates cash-flow relief)	193
9.3	Impact of EU bailout loan restructuring and relaxation of the primary surplus target on the debt ratio	195

10.1	Summary statistics	209
10.2	The MADF test	211
10.3	The Levin–Lin–Chu test	212
10.4	The Im–Pesaran–Shin test	214
11.1	FDI inflows in the euro area member states during the crisis and post-crisis periods (\$bn)	229
11.2	Innovation performance	231
11.3	Motives to work abroad in order of significance (1 = not important, 3 = highly important)	232
13.1	Inflation of countries with large c/a surpluses and fixed exchange rates (% YoY 2008–2012)	295
13.2	Germany’s portfolio investment assets – top five partners (€bn)	304

Acknowledgments

First and foremost we thank all our contributors (all named in the next section where detailed bios are provided), without which this edited book would have not been possible.

A very special thanks must go to our editorial assistance team, Thomas Alexopoulos and Andreas Tsalas, both PhD candidates in the Department of Economics, University of the Peloponnese in Greece, for their invaluable help and support in preparing this volume.

Special thanks to the team from Palgrave Macmillan publishing house – initially Aimee Dibbens and in the latest and most crucial stages Grace Jackson as well as the production team. Also our gratitude to Professor Phil Molyneux (Dean – Bangor University College of Business, Law, Education and Social Sciences), Editor-in-Chief for the Palgrave Macmillan Studies in Banking and Financial Institution Series for his decision to approve our proposal, and his comments and suggestions at all stages of the project.

Also many thanks to our colleagues at the University of the Peloponnese, the Rimini Centre of Economic Analysis, Eurobank S.A. and Prifysgol Bangor University (as well as in many other fora) for their ideas shared with us whenever the topic of the book was coming to the discussion; a final thanks to all our students that have been “freshening” up our take, view, ideas and thinking on the topic throughout the years.

Disclaimer

The Editorial team emphasizes that the contributors' views expressed in their respective chapters are their personal views and do not express the views of any of their previous or current employers.

Notes on Contributors

Editors

Platon Monokroussos is Deputy General Manager and Group Chief Economist at Eurobank Ergasias S.A. He is the Chairman of the Scientific Council of the Hellenic Bank Association and its representative at the Chief Economist Group of the European Banking Federation. He is also a member of Board of Directors of Eurobank Properties REIC, a public company which manages one of the most important commercial property portfolios in Greece and Eastern Europe. He holds a Professional Qualification Certificate for the provision of investment services (type D) issued by the Bank of Greece. Before joining Eurobank, he held high-level positions in leading financial institutions, including ABN AMRO and Bank of America. Monokroussos holds a Bachelor's degree in theoretical Mathematics (University of Crete, Greece), Masters Degrees in Economics (Clark University, Worcester, MA, USA) and Business Administration (Boston College, Wallace E. Carroll School of Management Boston, MA, USA) as well as a Diploma in Business and Corporate Leadership from Harvard Business Publishing. He holds a PhD from the National and Kapodistrian University of Athens (doctorate thesis on foreign exchange microstructure).

Kostas I. Nikolopoulos is the Director of forLAB, the forecasting laboratory (www.forLAB.eu) in Bangor Business School and the think tank www.forTANK.com. He specializes in time series analysis and forecasting, decision support systems and forecasting the impact of special events. He holds a PhD in Engineering from National Technical University of Athens (EMII). He holds the Chair in Decision Sciences at Bangor Business School and is the College Director of Research (Assistant Dean/Research) for the College of Business, Law, Education and Social Sciences in Prifysgol Bangor University. His work has appeared in numerous journals, and he is Associate Editor of *Oxford IMA Journal of Management Mathematics* and *Supply Chain Forum: An International Journal*. He is co-originator of the Theta forecasting method and the ADIDA temporal aggregation method-improving framework.

Dimitrios D. Thomakos is Professor of Applied Econometrics and Head of the Department of Economics at the University of Peloponnese, Greece, and senior fellow and member of the Scientific Committee at the Rimini Center for Economic Analysis in Italy. He holds an MA, MPhil and PhD from the Department of Economics of Columbia University. His research work has appeared in several prestigious international journals in economics and finance such as the *Review of Economics and Statistics*, *Canadian Journal of Economics*, *Review of International Economics*, *Journal of Empirical Finance*, *International Review of Financial Analysis*, *International Journal of Forecasting* and others. He has been a guest co-editor for *Mathematical & Computer Modelling*, an editorial board member of the *Journal of Modern Applied Statistical Methods* and now serves on the editorial board of the *International Journal of Energy and Statistics*. He is also the co-founder of QuantF.com.

Contributors

Alexis Anagnostopoulos holds a BSc in Business Mathematics and Statistics and an MSc in Econometrics and Mathematical Economics from the London School of Economics. He went on to complete his PhD thesis at the London Business School in 2006 under the supervision of Prof. Morten Ravn. Since graduating, he has been working as an assistant professor in The economics Department of the State University of New York at Stony Brook. He has spent time as a visiting scholar at the University of Cambridge, at the University of Southern California Marshall Business School and at UCLA. His research interests lie in the area of the macroeconomic effects of financial market incompleteness. His recent work has looked into the effects of incomplete markets on optimal tax policy as well as on households' home-ownership decisions.

Michael G. Arghyrou is Reader in Economics and Director of the M.Sc. in International Economics, Banking and Finance at Cardiff Business School. His research interests are international macroeconomics/finance. His articles have appeared in the *Canadian Journal of Economics*, *Oxford Economic Papers*, *Review of International Economics*, *Economics Letters*, *Journal of Macroeconomics*, *Journal of International Financial Markets and Institutions & Money*. He provides regular commentary to major international media including the BBC, CNN, Sky News, Voice of America, Bloomberg Radio, Washington Post, Reuters, ABC News and Russia Today. He also provides regular commentary and

opinion articles to Greek media including SKAI TV, Kathimerini and others. He is a member of the Research Fellows Network of the CESifo Group Munich (<http://www.cesifo-group.de/ifoHome.html>). He is also a member of the Scientific Board of the Institute of Democracy Konstantinos Karamanlis, Athens (<http://nd.gr/organosi/institouto-karamanli>) and a member of the Julian Hodge Institute of Applied Macroeconomics; (<http://business.cardiff.ac.uk/research/groups/julian-hodge-institute-applied-macroeconomics>).

Shanti P. Chakravarty is Professor Emeritus of Economics at Prifysgol Bangor University in Wales and specializes in development, welfare economics and political economy. He is also interested in macroeconomic forecasting and is a strategic advisor for forLAB, the forecasting laboratory in Bangor Business School. He is a former “Centre for Systems Science” fellow at the University of Rochester and research fellow on the Southampton Econometric Model Building Unit. More recently he was Chair in Economics at Bangor Business School. He subsequently worked on the construction of an econometric model for Wales. Recently, he was a visiting professor at the University of Frankfurt and the guest lecturer at Central Institute of Finance, Beijing.

Fokion Karavias is a chief executive officer at Eurobank Ergasias S.A. and a member of the Board of Directors. He was Senior General Manager, Head of Group Corporate and Investment Banking, Capital Markets and Wealth Management from July 2014 to January 2015. He has held professional positions at JP Morgan, Citibank and Eurobank, and became Treasurer at Telesis Investment Bank in 2000. He is a member of the Board of Directors of Eurobank Private Bank Luxembourg S.A. He holds a Diploma in Chemical Engineering from the National Technical University of Athens, a Master’s and PhD in Chemical Engineering from the University of Pennsylvania, Philadelphia. He has published several papers on topics concerning his academic research. Most recently, he has written a number of articles about the Eurozone and Greek sovereign crisis, published in the Greek press.

Marcel Kasumovich has a background in the intersection of global macro, policy and financial markets. His experience ranges from academic policy research at the Bank of Canada, technical advisor to the International Monetary Fund, international bond and currency strategies at Goldman Sachs and Merrill Lynch, and asset management at Soros Fund Management, as well as start-up funds. As regulatory and technological changes alter the investment landscape, Marcel is increasingly

focused on new innovations to identify and deliver medium-term macro investment exposures to global investors. Marcel holds a Master's in Economics from the University of Toronto.

Constantina Kottaridi is an assistant professor in the Department of Economics at the University of Piraeus. She holds a Master's in Economics with a Bachelor's in Statistics from Iowa State University. She joined the doctoral program of the Department of International and European Economic Studies at Athens University of Economics and Business where she was granted her PhD in 2004. In September 2004 she was employed at the University of Peloponnese, Department of Economics as a visiting lecturer. Her area of specialization is in foreign direct investment and multinational corporations, economic development and growth, small- and medium-sized enterprises. Her articles have appeared in *Journal of Macroeconomics*, *Empirical Economics* and *Review of International Economics*. She is a special advisor to the Observatory Plus, Crisis Observatory, ELIAMEP (Hellenic Foundation for European and Foreign Policy), a board member of the Hellenic Open University and Centre for the Greek Language.

Inachos Lazos began his career in finance at the London office of Salomon Brothers in 1999 as an investment-banking analyst. Following the firm's absorption by Citigroup, he spent six years advising European financial institutions in mergers and acquisitions and debt capital market transactions. Since 2006 he has worked as a portfolio strategist, holding positions at some of the world's largest and most reputable global macro hedge funds in New York, London, Geneva and Singapore. In these roles he has navigated the gyrations of the global economy and their investment implications during the past decade. He holds a BA in European Studies from Essex University, UK as well as an MBA from the Sloan School of Management in Boston.

Fabrice Montagné is Chief UK Economist at Barclays. Previously, he was a senior European economist responsible for French, Greek and euro area macroeconomics. He joined Barclays in January 2012 from the Dutch Central Bank where he was responsible for balance sheet, asset/liability management and strategic asset allocation decisions in the Financial Market division. Prior to that, he worked at the French Treasury and Fonds de Reserves pour les Retraites. He graduated from Ecole Polytechnique and holds an MSc in Economics and Statistics from ENSAE and an MSc in Economic Analysis and Policy from the Paris School of Economics.

Alex Patelis is the founder of Patelis Macro, a macroeconomic research firm he launched in 2010. He has over 18 years of experience with global client franchises. Patelis Macro (www.patelismacro.com) is an independent, unbiased, boutique firm offering macroeconomic research to select clients around the world. Previously, Alex was Managing Director of Global Research, Head of International Economics with Merrill Lynch. Based in London, he joined Merrill Lynch in 2002, was promoted to Head of Global FX & Debt Strategy in 2006 and to his latest position in 2007. Prior to that, Alex was a quantitative economist with Citigroup Asset Management based in London, an associate with Goldman, Sachs & Co. in New York working for Bill Dudley, Chief US Economist as well as a proprietary FICC trader. He holds an MA and PhD in Economics.

Gregorios D. Siourounis is Assistant Professor of Economic Theory and Policy in the Department of Regional and Economic Studies, Panteion University, Athens, Greece. He holds a PhD from the London Business School. He received the 2005 Young Economist Award from the European Economic Association and the 2008 Austin Robinson Prize from the Royal Economic Society for his work on “Democratization and Growth” (jointly with Elias Papaioannou). After his PhD, Gregorios spent almost two years in the Global FX Strategy team at Barclays Capital as global head of quantitative research. He has published papers in democratization, reserve allocation, capital markets and capital flows, and he is currently working on political institutions and foreign aid, human capital quality accumulation for long-term growth and capital flows and asset prices. He advises numerous private equity funds on asset allocation and is certified from the British FSA on consulting and trading financial instruments. He is a member of the American Economic Association and the Royal Economic Society and a referee for *Econometrica*, *American Economic Review*, *Quarterly Journal of Economics*, *Economic Journal* and the *Review of Economics and Statistics*.

Ralph Sueppel is an executive member of Graham Capital LLP. He manages relative-value investments based on macroeconomic trends across asset classes and markets. Prior to joining Graham, he worked at UBS Investment Bank as Head of Quant Macro Algorithmic Trading Strategies (2010–2011). From 2005 to 2009, he was a partner at BlueCrest Capital Management, serving as Chief Economist and Portfolio Manager. Prior to this assignment, he held positions in research and strategy at J.P. Morgan (1993–2002), the European Central Bank (2002–2003) and Merrill Lynch (2003–2005). He holds a PhD in Monetary Policy and Financial Markets from the University of Bonn.

Athanasios Vamvakidis has been Managing Director and Head of European G10 Foreign Exchange Strategy for Bank of America Merrill Lynch in Europe since 2010. During 1997–2010, he worked at the International Monetary Fund, where he held a number of senior positions, including Deputy Division Chief in the Strategy, Policy and Review Department and Resident Representative in Croatia. He was one of the architects of the IMF-FSB Early Warning Exercise. He holds a Master's and PhD in Economics from Harvard University. His research interests include a broad range of topics in international economics and macroeconomics and he has published extensively.
