Bibliography 222

Index 236

Acknowledgments

Video Games and Storytelling owes a great deal to the immense support that I received from my family, colleagues and friends. My partner, Dr Amrita Sen, and my parents have been simply amazing in the way they supported me through extremely trying circumstances. Amrita, Mum and Dad, I do not have enough words to thank you. Amrita, thank you for being a rock-solid source of support in extremely difficult times and for being the long-suffering first reader of everything that I write.

The two people whose help has been absolutely invaluable are my supervisors, Dr Phil Leonard and Dr Dave Woods. I am more than grateful for their encouragement, insights, criticism, their support in everything else and finally, for always making our supervisory sessions so enjoyable. I would also like to thank them for having introduced me to two of the most exciting videogames in human history: Phil, for properly introducing me to *Half-Life 2*, and Dave, for *S.T.A.L.K.E.R.*

I am very grateful to other members of staff in Nottingham Trent University. Professor John Goodridge, Mr Mahendra Solanki and Professor Tim Fulford have been the most sympathetic and supportive of friends. I have learnt a lot while working with Professor Sue Thomas and Professor Rukmini Bhaya Nair respectively while doing my postdoctoral research at De Montfort University and IIT, Delhi. I would also like to thank all my professors in Calcutta, especially Professor Amlan Dasgupta of Jadavpur University for his encouragement. I am also extremely grateful to Professor Stephan Guenzel, Professor Mathias Fuchs and other members of the 'Ludotopia' workshops for the many discussions that we have had on various things related to game studies.

I would like to specially thank Dr Mark Butler for his extremely helpful insights. It was a thrilling experience to be able to interview Dr Celia Pearce and Alexei Pazhitnov in GameCity 2007; I would like to thank them for their suggestions. I am also grateful to Mike Prescott who agreed to be interviewed by me about his work on After Action Reports. I would also like to thank the organisers of various games conferences for having given me the chance to participate and meet other researchers. I am also grateful to *Writing Technologies* for having published a shorter version of my sixth chapter and to all reviewers of my publications for their very helpful suggestions.

This book would not have been possible at all without the patient help and co-operation of Felicity Plester, Global Head of the Film, Culture and Media Studies at Palgrave Macmillan. Sneha Kamat Bhavnani and her colleagues at Palgrave Macmillan have been extremely supportive at every step of the process of getting this book together. I am very grateful to Felicity and her team at Palgrave Macmillan for making this book happen.

The research on this book project would have been a horribly lonely affair without my friends in Nottingham and elsewhere. I would especially like to thank Cristina Bermejo, Kalyan Das, Dr Koutilya Bhattacharya, Mahitosh Mandal, Dr Maria Marti, Tobias Mueller, Dr David Munoz, Juan Moreno, Liliana Maligłówka, Arijit Nag and Dr Jenna Pitchford for being such superb friends. I would also like to thank my friends from India and elsewhere, who are too many to list: you know who you are.

Last but not least, I would like to thank Lorenzo, my artificially intelligent friend. Lorenzo, perhaps more than anyone alive, has helped me most in reading games and playing books, and of course, the reverse.
