

Palgrave Series in Bioethics and Public Policy

Series editor
Sheldon Krimsky
Department of Urban and Environmental Policy
and Planning
Tufts University
Medford, MA, USA

Biotechnology continues to impact populations in myriad ways influencing contemporary issues in food supply, genetic therapy, health care, biosecurity, terrorism, criminal justice, food supply, and environmental engineering among many other aspects of daily life. The 'Palgrave Series in Bioethics and Public Policy' seeks to promote interdisciplinary research that analyzes and assesses the social, environmental, and moral ramifications of where this technology is taking us. With a wide range of topics within bioethics open to the series, the project will provide a home for cutting-edge research that bridges the divide between the natural and social sciences. Based on the strengths in these fields within Palgrave, and Macmillan Science and Higher Education more broadly, this series will attract a dynamic and varied assortment of scholars to provide comprehensive evaluations of where biotechnology is taking our society-and most importantly, if these directions are being forged appropriately and ethically.

ACKNOWLEDGEMENTS

This project began as part of a session organized by Mary C. Rawlinson at the 2014 meeting of the European Consortium for Public Research. The authors would like to thank the audience and participants of that session. Their comments and suggests were invaluable in the writing of this book. The authors would also like to express their gratitude to Mary for organizing the session, without which this text may have never been written. Finally, the authors must acknowledge Caleb Ward and an anonymous reviewer who offered a great deal of terrific feedback to earlier versions of our argument.

Clement Loo thanks Adrienne Conley for being an endlessly patient sounding board for ideas.

Robert A. Skipper acknowledges grant support from the Charles P. Taft Research Center.

CONTENTS

1	Introduction	1
2	The New Face of Food Insecurity	7
3	Consent and Exploitation	31
4	Obesity and Coercion	49
5	Moving Forward	69
	Bibliography	81
	Index	85
