# List of Chart & Exhibits

## Chart

- 1 Assessing the distance between the yields of the 2-year, 5-year, 10-year and 30-year treasury bonds and the future notional coupon 35

## Exhibits

- 1 Testing alternative PCA-based strategies on US treasury bonds: hedging quality indicators 13
- 2 Testing alternative PCA-based strategies on US treasury bonds: average transaction fees 14
- 3 Testing alternative PCA-based strategies including USD interest rate swaps: hedging quality indicators 16
- 4 Testing the most common hedging techniques in their traditional form 37
- 5 Testing the most common hedging techniques in their error-adjusted form 38
- 6 Calculating the performance of hedging models based on the initial cheapest-to-deliver bonds 39
- 7 Alternative hedging models based on bond futures: sub-sample analysis 41
- 8 Sensitivity of PCA hedging models to small changes in the coefficients 42

9	Summary statistics on spreads related to BBB-rated bonds	63
10	Variance reduction obtained by alternative hedging strategies	64
11	Predictability of the hedging errors produced by alternative hedging strategies	66

# List of Figures

1	Historical reported IG corporate index excess returns	79
2	Analytical durations ( $Dur^{OAD}$ & $Dur^{DefAdj}$ ) for the NC IG corp index and their difference, July 1989–November 2012	83
3	Treasury yields and the difference between $Dur^{OAD}$ and $Dur^{DefAdj}$ , for the NC IG corp index, July 1989–November 2012	84
4	Comparison of OAS and the difference between $Dur^{OAD}$ and $Dur^{DefAdj}$ for the NC IG corp index, July 1989–November 2012	84
5	Statistics of various NC IG corp indices using two different analytical duration measures, July 1989–November 2012	85
6	Average ExRet (%/mo) for NC IG corp index conditional on the change in Treasury yields, July 1989–November 2012	86
7	Correlations of various $ExRet^{analyt}$ measures with Treasury returns, by sub-period, March 2004–November 2012	86
8	Evolution of various empirical duration betas for the NC IG corp index, July 1989–November 2012	89
9	Rolling correlations of various $ExRet^{emp}$ with Treasury returns, trailing 24 months, May 1991–November 2012	91
10	Statistics of various NC IG corp indices, July 1989–November 2012	92

11	Average $\text{ExRet}^{\text{analyt}}$ and $\text{ExRet}^{\text{emp dyn}}$ (%/mo) for NC IG corp index conditional on the change in Treasury yields, July 1989–November 2012	92
12	Cumulative NC IG corporate index $\text{ExRet}$ performance for various duration measures, July 1989–November 2012	93
13	Duration ratios (betas) for the IG corp index & matched-Dur <sup>OAD</sup> Treasury yields, January 1973–June 1989	95
14	Relation between IG corp index spreads & matched-Dur <sup>OAD</sup> Treasury yields, January 1973–June 1989	95
15	Correlation between IG corp spreads and matched-Dur <sup>OAD</sup> Treasury yields & level of matched-Dur <sup>OAD</sup> Treasury yields, January 1973–November 2012	96
16	Correlation of major assets' performance with macroeconomic variables, 1953–2011	97
17	Relationship of asset class performance with real GDP growth (%/y), 1953–2011	98
18	Relationship of asset class performance with CPI inflation (%/y), 1953–2011	98
19	Correlation of asset class returns with macroeconomic variables, 1953–2011	99
20	Smoothed, de-measured macroeconomic variables, GDP growth & CPI inflation, Q1/1963–Q3/2012	100
21	Return statistics for various returns of the IG corp index, January 1978–September 1981	101
22	Return statistics for mean-variance-optimal portfolios of Treasuries with various returns of the non-call DGT IG index, July 1989–November 2012	105
23	Net weight to Treasuries (scaled) for various corp/ Treasury portfolios, as % of total net allocation, July 1989–November 2012	106
24	Cumulative performance of various $\text{ExRet}$ measures for the IG corporate index, January 1973–November 2012	108
25	Return statistics of various returns of the IG corporate index, January 1973–November 2012	108

## Notes on Contributors

**Giovanni Barone Adesi** is Professor of Finance Theory at the Swiss Finance Institute, University of Lugano, Switzerland. A graduate from the University of Chicago, he has taught at the University of Alberta, University of Texas, City University and the University of Pennsylvania. His main research interests are derivative securities and risk management. Especially well-known are his contributions to the pricing of American commodity options and the measurement of market risk.

**Nicola Carcano** holds a degree in Economics from the LUISS University in Rome, an MBA from the New York University, and a PhD in Financial Markets Theory from the University of St Gallen. He teaches Structured Products at the University of Lugano, Switzerland. After working as a consultant and institutional portfolio manager, he is now the Chief Executive Officer of Heron Asset Management. His research focuses on fixed-income finance.

**Hakim Dall'O** received his PhD in Finance at the Swiss Finance Institute in 2011. He has been working in both the banking and the insurance industries as a quantitative risk analyst for more than five years. Currently, he is working in the security lending market as senior credit analyst.

**Radu C. Gabudean** co-manages American Century Investments' asset allocation strategies and conducts related research. Prior to ACI, Gabudean was vice president of quantitative strategies with Barclays Risk Analytics and Index Solutions (BRAIS), where he designed and

implemented asset allocation strategies. Previously, he was a quantitative portfolio modeler at Lehman Brothers and Barclays Capital. Gabudean holds a BA from York University and a PhD (Finance) from New York University.

**Kwok Yuen Ng** is a director in the Quantitative Portfolio Strategy group at Barclays Capital. Ng is responsible for conducting studies on portfolio strategies and index replication. Ng joined Barclays in 2008 after spending 20 years at Lehman Brothers, where he held a similar position. Prior to that, he was a consultant at The Davidson Group and Software AG. Ng holds an MS (Computer Science) from New York University.

**Bruce D. Phelps** is a managing director in global research at Barclays Capital where he evaluates investment strategies on behalf of institutional investors. Phelps joined Barclays in 2008 from Lehman Brothers where he was managing director in research for eight years. Prior to that, he was an institutional portfolio manager, a designer of electronic trading systems and a forex trader. Phelps graduated with an AB from Stanford and a PhD (Economics) from Yale.
