Drawing on both leading and emerging scholars of environmental communication, the Palgrave Studies in Media and Environmental Communication Series features books on the key roles of media and communication processes in relation to a broad range of global as well as national/local environmental issues, crises and disasters. Characteristic of the cross-disciplinary nature of environmental communication, the books showcase a broad variety of theories, methods and perspectives for the study of media and communication processes regarding the environment. Common to these is the endeavour to describe, analyse, understand and explain the centrality of media and communication processes to public and political action on the environment.

Advisory Board

Stuart Allan, Cardiff University, UK

ACKNOWLEDGEMENTS

This book would not have been possible without the generosity of the 45 leaders who found time in their busy lives to share their exceptional knowledge and experience with us. Among those we interviewed in 2014 and 2015 were the national heads of some of Australia's most prominent NGOs, including the Australian Conservation Foundation, The Wilderness Society, Lock the Gate, the Climate Institute, GetUp! Friends of the Earth Australia, WWF-Australia and Greenpeace Australia Pacific. Members of Parliament at both state and federal level made themselves available, as did veterans of campaigns that had helped shape the contemporary environment movement in Australia and beyond.

Interviews were conducted by the authors and their colleagues, Dr. John Cianchi and Ph.D. candidate Peter Wells. We thank John and Peter for their diligence and care.

An earlier version of Chap. 3 appeared as Lester, L., McGaurr, L., and Tranter, B., 'The election that forgot the environment? Issues, EMOs and the press in Australia', *International Journal of Press/Politics*, Vol. 20(1), pp. 3–25, DOI: [10.1177/1940161214552030](https://doi.org/10.1177/1940161214552030). This research was conducted as part of an Australian Research Council-funded project, ‘Leadership and the Construction of Environmental Concerns in Australia’, 2013–2015 (DP130102154). We thank the ARC for its support of this research into an important part of Australian political history—and its future.
