Appendix A. Coping with percentages 311

Appendix B. Using graphs and charts 316

Appendix C. Balancing accounts—the rules 319

**Index 321**

# About this book

This book gives a wide introduction to modern accounting, and emphasises the logic and reason behind the procedures involved. We have designed the book to be used in a number of different ways. It may be used as an intensive one-year course, or as a 'straight-through' two-year course—an appropriate aim for the end of the first year would be unit 17. Alternatively, it is possible to choose some of the units to form a basic and balanced course, with the possibility of suitable students proceeding later to a course comprising the more difficult units (those marked with an asterisk in the *Contents*).

The book attempts to involve the student as the course proceeds, and to develop a questioning and intelligent approach to the issues involved. Students are recommended to keep a record of the activity work suggested in each unit, together with their answers to other practical assignments.

## **Acknowledgements**

The authors wish to thank Mrs Judith Johnson and Miss Helen Turner for their considerable help in preparing this book.
