

DEBT, DEFICIT AND ECONOMIC PERFORMANCE

CENTRAL ISSUES IN CONTEMPORARY ECONOMIC THEORY AND POLICY

General Editor: **Mario Baldassarri**, *Professor of Economics, University of Rome 'La Sapienza', Italy*

This new series is a joint initiative between Macmillan, St. Martin's Press and SIPI, the publishing company of Confindustria (the Confederation of Italian Industry), based on the book collection MONOGRAFIE RPE published by SIPI and originated from the new editorial programme of one of the oldest Italian journals of economics, the *Rivista di Politica Economica*, founded in 1911. This series is intended to become an arena in which the most topical economic problems are freely debated and confronted with different scientific orientations and/or political theories.

The 1990s clearly represent a transition period in which the world economy will establish new international relationships and in this context, new challenges and new risks will have to be faced within each economic system. Fundamental issues on which economic theory and policy have long based their reasoning over the last two or three decades have to be critically reviewed in order to pursue new frontiers for theoretical development and economic policy implementation. In this sense, this new series aims at being a "place of debate" between professional economists, an updated learning tool for students and a specific reference for a wider readership aiming at understanding economic theory and policy evolution even from a non-specialist point of view.
