

Public Policy and Politics

Series Editors: Colin Fudge and Robin Hambleton

Public policy-making in western democracies is confronted by new pressures. Central values relating to the role of the state, the role of markets and the role of citizenship are now all contested and the consensus built up around the Keynesian welfare state is under challenge. New social movements are entering the political arena: electronic technologies are transforming the nature of employment; changes in demographic structure are creating heightened demands for public services; unforeseen social and health problems are emerging; and, most disturbing, social and economic inequalities are increasing in many countries.

How governments – at international, national and local levels – respond to this developing agenda is the central focus of the Public Policy and Politics series. Aimed at a student, professional, practitioner and academic readership, it aims to provide up-to-date, comprehensive and authoritative analyses of public policy-making in practice.

The series is international and interdisciplinary in scope, and bridges theory and practice by relating the substance of policy to the politics of the policy-making process.

8.2	DoT spending on public transport	195
8.3	DoT support for local authority spending	200
9.1	Rail franchise payments	247

Preface

This book has its origin in a report on *Transport Policy-Making in Britain*, which was commissioned from the Greater London Group of the London School of Economics by the Rees Jeffreys Road Fund. The research undertaken for that report has been extended and widened to provide a more comprehensive text. We owe a considerable debt to the Trustees of the Road Fund for having stimulated our joint approach to transport policy across a range of disciplines and expertise. The authors would like to thank all those who helped them in the collection of material, ideas and opinions, including David Bayliss, June Bridgeman, Peter Bryant, Mike Cottell, Tony Ridley and all the practitioners who commented on drafts and debated the issues with us in meetings of the Greater London Group and other fora.
