# Contents

<i>List of Figures</i>	viii
<i>List of Tables</i>	ix
<i>Notes on the Contributors</i>	x
<b>Introduction</b>	<b>1</b>
<i>Georg von Krogh, Ikujiro Nonaka and Toshihiro Nishiguchi</i>	
<b>PART I FUNDAMENTAL ISSUES IN KNOWLEDGE CREATION THEORY</b>	
<b>1 Justification in Knowledge Creation: Dominant Logic in Management Discourses</b>	<b>13</b>
<i>Georg von Krogh and Simon Grand</i>	
Justification in knowledge creation: The basic propositions	13
Knowledge Creation and Justification: Open Issues and Research Questions	16
Justification and the Impact of Dominant Logic: Basic Argument	19
Justification in Knowledge Creation: Underlying Discursive Practices	24
Theoretical and Managerial Implications	29
<b>2 Organizing Around Not-Yet-Embodied Knowledge</b>	<b>36</b>
<i>Claus Otto Scharmer</i>	
Two Types of Tacit Knowledge	36
Three Propositions on Not-Yet-Embodied Knowledge	38
The Case of AHC	46
Conclusion: Towards an Emerging Double Knowledge Spiral	49
Implications	53

**PART II CREATING MARKET KNOWLEDGE**

<b>3</b>	<b>Organizational Creativity: A New Perspective from Cognitive Systems Theory</b>	<b>63</b>
	<i>Salvio Vicari and Gabriele Troilo</i>	
	Introduction	63
	The Firm as an Autopoietic Cognitive System	64
	The Relations between Knowledge and Creativity	67
	Creativity	69
	Levels of Creativity	70
	Organizational Creativity	72
	Enabling Organizational Creativity	75
	Perturbations as the Engine for Creativity	78
	Managerial Implications	81
	Conclusions	82
<b>4</b>	<b>Integrated IT Systems to Capitalize on Market Knowledge</b>	<b>89</b>
	<i>Ikujiro Nonaka, Patrick Reinmoeller and Dai Senoo</i>	
	Introduction	89
	The Theory of Knowledge Creation	89
	The Ontological Platforms for Knowledge Creation	92
	Three Kinds of Action–Reflection–Trigger Systems	95
	The Context for Action–Reflection–Trigger Systems	97
	Constructing ART Systems	102
	Case-study: Seven-Eleven Japan	103
	Implications	108

**PART III KNOWLEDGE CREATION IN INTERFIRM COLLABORATION**

<b>5</b>	<b>Knowledge and Economic Organization: An Application to the Analysis of Interfirm Collaboration</b>	<b>113</b>
	<i>Robert M. Grant and Charles Baden-Fuller</i>	
	Transaction Cost Approaches to Interfirm Collaboration	117
	The Knowledge-based View of Organization	120
	The Determinants of Productive Efficiency	122
	Knowledge Integration in Markets and Firms	126
	Efficiency Advantages of Interfirm Collaboration	129
	Operationalizing the Theory	140
	Conclusion	141

<b>6 Economic Organization and Innovation in Japan: Networks, Spin-offs and the Creation of Enterprise</b>	<b>151</b>
<i>Michael L. Gerlach and James R. Lincoln</i>	
Introduction	151
The Sources of Technological Change	153
Innovation and the Limits to Hierarchy	161
Innovation and the Limits to Markets	174
Summary	184
Conclusion and Implications	187
<b>PART IV KNOWLEDGE CREATION IN THE SUPPLY CHAIN</b>	
<b>7 Fractal Design: Self-organizing Links in Supply Chain Management</b>	<b>199</b>
<i>Toshihiro Nishiguchi and Alexandre Beaudet</i>	
Supply Chain Management and Self-Organization in the Toyota Supplier Network	200
The Aisin Seiki Crisis	208
Conclusions and Implications	218
<b>8 Analyzing Intangible Resources and Managing Knowledge in a Supply Chain Context</b>	<b>231</b>
<i>Richard Hall and Pierpaolo Andriani</i>	
Introduction	231
The Technique for Analyzing the Role of Intangible Resources	234
The Nature of the Research in Stage 1	239
Findings	241
Product/Delivery System Attributes	241
Discussion of Findings	245
The Management of Knowledge associated with Interorganizational Innovation	248
Conclusion	254
 <i>Index</i>	 259

# List of Figures

1.1	The locus of justification in knowledge creation	18
1.2	Dominant logic and knowledge creation	21
1.3	Dominant logic in management discourses	25
2.1	The process of self-transcending knowledge creation	49
2.2	The double spiral of self-knowledge creation	52
2.3	Four field-logics of languaging	55
3.1	Different economic systemic levels	73
3.2	The process of creativity	74
3.3	Creativity as a circular process	74
4.1	SECI as a self-transcending process	90
4.2	The necessity of multi-dynamic knowledge management	93
4.3	Three levels of utilizing customer knowledge	96
5.1	The knowledge-based theory of interfirm collaboration: an overview	116
5.2	An input–output representation of product and knowledge domains	133
5.3	The overlap between product and knowledge domains	134
6.1	Japanese spin-off pattern	159
6.2	The structure of growth in successful spinoffs versus divisions	165
6.3	Evolution of the Furukawa Group	169
6.4	Equity relations within the contemporary Furukawa Group	171
7.1	Self-similar pyramid	205
7.2	Input–output representation of product and knowledge domains	206
8.1	Mapping the body of knowledge in ‘strategic space’	251
8.2	Mapping the body of knowledge in ‘project management space’	253
8A.1	BA students’ opinions of Morgan cars	256

# List of Tables

I.1	Overview of key propositions	7
2.1	Three epistemologies	39
2.2	Twelve types of knowledge in organizations	43
6.1	Satellite companies affiliated with major electronics producers, 1994	167
6.2	New ventures created by NTT, as of February 1988	173
6.3	Probabilities that core electronic forms are major suppliers or customers of satellite firms	178
6.4	Capital and governance relationships among core electronics companies, satellites and banks	181
6A.1	The sample of 50 satellite companies	189
8.1	A checklist of product/delivery system attributes which produce sales advantage	235
8.2	The framework of four capabilities	237
8.3	Issues with respect to the development of intangible assets	238
8.4	The managers participating in the research project	239
8.5	The researchers' roles	241
8.6	Frequently quoted product/delivery system attributes	243
8.7	Important intangible resources	244
8.8	Statements designed to identify the nature of the knowledge associated with each unit of analysis	250
8A.1	The intangible resources related to the key product/delivery system attributes	255
8A.2	Development scenarios	256

# Notes on the Contributors

**Pierpaolo Andriani** is Senior Research Associate and Lecturer in Technological Innovation at the Centre for the Study of Supply Chain Strategy, Durham University Business School. His research interests include the area at the interface between knowledge management, innovation and supply chain; the application of complexity theories to social systems, specifically industrial districts.

**Charles Baden-Fuller** is the Centenary Professor of Strategy at City University Business School, Director of Research for the School and Visiting Research Professor at the Rotterdam School of Management, Erasmus University, Rotterdam. He has held positions at the University of Bath, London Business School and has been a Visiting Professor at the University of Paris Dauphine, Duke University (USA) and a visitor at the University of Bologna (NOMISMA) and Sloan School (MIT). He has also worked at the Chase Manhattan Bank, New York.

**Alexandre Beaudet** is currently research advisor at the Transnational Consulting Department, Mitsubishi Research Institute (MRI). He studied at the University of Montreal and Hitotsubashi University and conducted research at the Japan Society for the Promotion of Machine Industry as well as the Institute for International Economic Studies. His research interests include supply chain management, organizational change, and economic development.

**Michael L. Gerlach** is an Associate Professor in the Haas School of Business at the University of California, Berkeley. His teaching and research interests are in the areas of organizational theory, business policy and strategy, and comparative management, with a special emphasis on Japan and East Asia.

**Simon Grand** is Research Associate and Lecturer in Strategy and International Management at the University of St Gallen and, since 1997, Guest Lecturer in Organization Theory at the University of Zurich and Manager of a Swiss-based software company. His research interests include Strategy Process Research ('strategic think-

ing and acting') and Epistemology of Social Science ('theory and practice').

**Robert M. Grant** is Professor of Management at City University Business School and at Georgetown University. His primary interests are knowledge management, corporate strategy, and resource-based strategies.

**Richard Hall** is Professor of Operations and Procurement Strategy at Durham University Business School. He has a background of experience in industry, including Unilever and PA Consulting. His research interests include strategy; long-term surviving companies; knowledge management, and the role of intangible resources in business success.

**Georg von Krogh** is Professor at the Institute of Management at the University of St Gallen and a member of the board of directors at the Institute of Management. His present research interests are in the area of Strategic Management; cooperative strategies; strategic processes including knowledge creation; strategic management practices in emerging industries; the foundations of qualitative research in the field of strategy. He has published several books as well as some 40 articles in international journals.

**James R. Lincoln** is the Spieker Professor of Leadership in the Organizational Behaviour and Industrial Relations group of the Walter A. Haas School of Business and Director of the Institute of Industrial Relations at the University of California, Berkeley. His primary research and teaching interests include organizational design and innovation; Japanese management and interorganizational networks. He has been a visiting scholar at Hitotsubashi, Doshisha and Ritsumeikan Universities in Japan.

**Toshihiro Nishiguchi** is a Professor of Management at the Institute of Innovation Research, Hitotsubashi University, Tokyo, Japan. He holds a BA from Waseda University, Tokyo, an MSc from Imperial College, London and DPhil in Sociology from Nuffield College, Oxford. Building on his decades of research experience on industrial sourcing, his current research focuses on global interfirm collaboration in product development and manufacturing in the automotive and aircraft industries, as well as on the coevolutionary theory of interorganizational relations.

**Ikujiro Nonaka** is Dean of the Graduate School of Knowledge Science at the Japan Advanced Institute of Science and Technology, Ishikawa, Japan. He holds a PhD in Business Administration and MBA from the University of California, Berkeley, and BS in Political Science from Waseda University.

**Patrick Reinmoeller** is Assistant Professor at the Graduate School of Knowledge Science, Japan Advanced Institute of Science and Technology. He is also Visiting Professor 'Strategy and Self-renewal', LIUC Libero Istituto Universitario Carlo Cattaneo, Castellanza (VA), Italy and Lecturer 'Keiei Soshiki Ron' (Management-Organizational Theory) Kanazawa Gakuin Daigaku.

**Claus Otto Scharmer** is Lecturer at the MIT Sloan School of Management, Cambridge, Massachusetts. He has taught Planning and Managing Change at MIT Sloan School of Management; Organizational Learning at the University of Innsbruck; Leading Learning Communities at the University of Vienna and Epistemological Economics and Organizational Studies at Witten-Herdecke University.

**Dai Senoo** is Assistant Professor at the Graduate School of Knowledge Science, Japan Advanced Institute of Science and Technology (JAIST), Japan. Dai Senoo joined JAIST in April 1998 from Hitotsubashi University. His present research interests are in knowledge management, leadership and creativity.

**Gabriele Troilo** is PhD in Business Administration, Assistant Professor of Marketing at SDA Bocconi, Professor of New Product Development at Università Bocconi, and Professor of Marketing at Politecnico di Milano. He researches in the area of creativity and innovation management, consumer behaviour and environmental management. He has published many articles in the same research areas.

**Salvio Vicari** is Director of the PhD programme in Business Administration and Full Professor of Management at Università Bocconi. He is also Senior Professor at the Graduate School of Business Sda Bocconi and co-founder of Valdani Vicari & Associati. He has been a Visiting Scholar at the Wharton School of Business, University of Pennsylvania and holds an ITP postgraduate degree from the London Business School.
