‘The Palgrave Macmillan Studies in Family and Intimate Life series is impressive and contemporary in its themes and approaches’
– Professor Deborah Chambers, Newcastle University, UK, and author of *New Social Ties*.

The remit of the Palgrave Macmillan Studies in Family and Intimate Life series is to publish major texts, monographs and edited collections focusing broadly on the sociological exploration of intimate relationships and family organization. The series covers a wide range of topics such as partnership, marriage, parenting, domestic arrangements, kinship, demographic change, intergenerational ties, life course transitions, step-families, gay and lesbian relationships, lone-parent households, and also non-familial intimate relationships such as friendships and includes works by leading figures in the field, in the UK and internationally, and aims to contribute to continue publishing influential and prize-winning research.

This book is dedicated to all our colleagues from Portugal, Switzerland and Lithuania that have collaborated and worked together over the last 20 years on families, social networks and the life course.

We give special thanks to the founder of this scientific network, Jean Kellerhals, who encouraged collaborative research between sociologists of the family in these countries, particularly on families and family networks. Thanks also to all the interviewees who participated in the three national surveys on family trajectories and social networks.

Contents

- 1 Introduction** 1
Eric D. Widmer, Jacques-Antoine Gauthier, Karin Wall, Vida Česnuitytė, and Rita Gouveia
- 2 Contextualising Personal Networks Across Birth Cohorts and Countries** 19
Vasco Ramos, Vida Česnuitytė, Karin Wall, and Dominique Joye
- 3 A First Portrait of Personal Networks in a Comparative Perspective** 61
Rita Gouveia, Gaëlle Aeby, and Vida Česnuitytė
- 4 Changing Meanings of Family in Personal Relationships: A Comparative Perspective** 99
Karin Wall, Rita Gouveia, Gaëlle Aeby, and Vida Česnuitytė
- 5 Mapping the Plurality of Personal Configurations** 131
Gaëlle Aeby, Eric D. Widmer, Vida Česnuitytė, and Rita Gouveia

6	Understanding Personal Networks as Social Capital	167
	<i>Eric D. Widmer, Rita Gouveia, Gaëlle Aeby, and Vida Česnuitytė</i>	
7	Linking Family Trajectories and Personal Networks	187
	<i>Jacques-Antoine Gauthier, Gaëlle Aeby, Vasco Ramos, and Vida Česnuitytė</i>	
8	Conclusions	225
	<i>Karin Wall, Vida Česnuitytė, Eric D. Widmer, and Jacques-Antoine Gauthier</i>

Notes on Contributors

Gaëlle Aeby is a post-doctoral researcher at the University of Lausanne, Switzerland.

Vida Česnuiytė is a lecturer and head of the Sociological Research Laboratory, Mykolas Romeris University, Vilnius, Lithuania. ORCID ID: 0000–0002–9196–7975.

Vasco Miguel dos Santos Ramos is a post-doctoral fellow at the Institute of Social Sciences (ICS), University of Lisbon, Portugal.

Jacques-Antoine Gauthier is a senior lecturer at the Life Course and Social Inequality Research Centre, University of Lausanne, Switzerland.

Rita Gouveia is a post-doctoral fellow at the Institute of Social Sciences, University of Lisbon, Portugal.

Dominique Joye is a professor at the Institute for Social Sciences, Life Course and Social Inequality Research Centre, University of Lausanne, Switzerland.

Karin Wall is a research professor at the Institute of Social Sciences (ICS), the University of Lisbon, Portugal.

Eric D. Widmer is a professor at the Department of Sociology, the University of Geneva, Switzerland.

List of Figures

Fig. 2.1	Typology of occupational trajectories (ages 16–40)	50
Fig. 3.1	Average proportion of kin and non-kin alters in personal networks by country (% , $N = 2774$)	69
Fig. 3.2	Average proportion of present and past co-resident and non-co-resident alters in personal networks by country (% , $N = 2774$)	74
Fig. 3.3	Average proportion of alters with different acquaintanceship length in personal networks by country ($N = 2774$)	76
Fig. 3.4	Average proportion of male and female alters in personal networks by country (% , $N = 2774$)	77
Fig. 3.5	Variations of attitudinal indexes by country. Mean scores of level of agreement, with scale: 1 = Totally disagree; 2 = Disagree; 3 = Neither agree, nor disagree; 4 = Agree; 5 = Totally agree	81
Fig. 4.1	Main types of as-family networks (% of each cluster in total sample, $N = 2744$)	112
Fig. 5.1	Main types of personal configurations (% of each cluster in total sample, $N = 2835$)	140
Fig. 5.2	Interaction in a Narrow-nuclear configuration, Lithuania	156
Fig. 5.3	Interaction in an extended conjugal configuration, Portugal	158
Fig. 5.4	Interaction in a Work-oriented configuration, Switzerland	160
Fig. 6.1	Density of emotional support by configuration, by country (%)	177

xii **List of Figures**

Fig. 6.2	Centralisation of emotional support by configuration, by country (%)	178
Fig. 6.3	Graphical visualisation of the structure of emotional support exchange in Switzerland (A) and Portugal (B) in two friendship configurations	179
Fig. 7.1	Typology of co-residence trajectories (Note: A coloured version of these graphs is available at: http://lives.unil.ch/familychangesandcontinuity/coresidencetrajectories.pdf)	199

List of Tables

Table 2.1	Selected indicators 1970–2011	33
Table 2.2	Attitudes towards family life and gender roles (percentage of agree and strongly agree)	39
Table 2.3	Cohort characteristics (percentage)	44
Table 2.4	Occupational trajectories (age 16–40) by country, cohort and gender (percentage)	52
Table 3.1	Percentage and frequency of respondents who mentioned different number of alters	68
Table 3.2	Percentage of respondents who cited at least one alter in each tie category ($N = 2774$)	71
Table 3.3	Average proportion of male and female alters in personal networks by country ($N = 2774$)	78
Table 3.4	Distribution of shaping factors across countries (percentage)	79
Table 3.5	Principal component analysis on the dimensions of family-related attitudes (loadings)	80
Table 3.6	Influence of shaping factors on network size and proportion of kin. Regression models, unstandardized Beta coefficients	83
Table 3.7	Influence of shaping factors on the proportion of co-resident alters and female alters. Regression models, unstandardized Beta coefficients	85
Table 3.8	Influence of shaping factors on the proportion of very recent and very old acquaintances. Regression models, unstandardized Beta coefficients	87

xiv List of Tables

Table 3.9	Summary of the main characteristics of the composition of personal networks, by country	90
Table 4.1	Characteristics of members in networks of personal relationships. Frequency in absolute numbers and percentage of alters with each attribute	104
Table 4.2	Characteristics of members perceived as-family. Frequency in absolute numbers and percentage of alters with each attribute	105
Table 4.3	Types of ties cited in as-family networks. Frequency of alters in absolute numbers and percentage	107
Table 4.4	Percentage of respondents citing each type of tie in networks of important personal ties and in networks of as-family ties	109
Table 4.5	Characterization of as-family networks ($N = 2774$)	113
Table 4.6	Distribution of as-family networks within each country (%)	115
Table 4.7	Distribution of as-family networks by gender within each country (%)	117
Table 4.8	Distribution of types of as-family networks by birth-cohort within each country	118
Table 4.9	Influence of shaping factors on the belonging to each type of as-family network. Logistic regressions (odd ratios)	120
Table 5.1	Types of personal configuration. Average number of citations for each tie, by type	141
Table 5.2	Relative frequencies of personal configurations, by country ($N = 2774$)	144
Table 5.3	Factors shaping personal configurations. Results of the logistic regression (odd-ratios)	146
Table 5.4	Factors shaping personal configurations in Portugal. Results of the logistic regression (odd-ratios)	148
Table 5.5	Factors shaping personal configurations in Switzerland. Results of the logistic regression (odd-ratios)	149
Table 5.6	Factors shaping personal configurations in Lithuania. Results of the logistic regression (odd-ratios)	150
Table 6.1	Four structures of social capital in personal networks	170
Table 6.2	Indicators of social capital, by country. Average scores	174
Table 6.3	Social capital and the composition of personal networks (configurations) in the total sample. Average scores	176

Table 6.4	Influence of shaping factors on social capital: density and centralisation of interaction and emotional support. Linear regressions, unstandardized beta coefficients	181
Table 7.1	Mean time spent in each state and standard deviation, by type of co-residence trajectories	200
Table 7.2	Distribution of the types of co-residence trajectories (1990–2010), by country	202
Table 7.3	Impact of gender, birth cohort, country of residence, and level of education on co-residence trajectories. Separated logistic regressions (Exp(b))	206
Table 7.4	Impact of gender, birth cohort, country of residence, and co-residence trajectories on personal networks. Separated logistic regressions (Exp(b))	209
