As China's power grows, the search has begun in earnest for what super power status will mean for the People's Republic of China as a nation as well as the impact of its new-found influence on the Asia-Pacific region and the global international order at large. By providing a venue for exciting and ground-breaking titles, the aim of this series is to explore the domestic and international implications of China's rise and transformation through a number of key areas including politics, development and foreign policy. The series will also give a strong voice to non-western perspectives on China's rise in order to provide a forum that connects and compares the views of academics from both the east and west reflecting the truly international nature of the discipline.
