VOLUME 37

The titles published in this series are listed at the end of this volume.
Genetic Democracy

Philosophical Perspectives

Edited by

VEIKKO LAUNIS
Turku, Finland

and

JUHA RÄIKKÄ
Turku, Finland

Springer
The editors are deeply indebted to the writers and collaborators who participated the *Genetic Democracy Authors’ Meeting* held in Turku, Finland, in August 2006. The majority of the papers included were originally presented as part of this meeting.

Originally, the ideas discussed in this volume grew out of the research project *Genetic Democracy: Social and Ethical Implications of Genetically Modified Organisms*, directed by Juha Räikkä and funded by the Academy of Finland ESGEMO Research Programme.

Editorial work makes great demands on secretarial and other practical services. In practical matters, we have been enormously assisted by many of our colleagues in the Department of Philosophy at the University of Turku. Special thanks are due to Kirsi Rajala, Minna Soini and Susanne Uusitalo.

Finally, we are grateful to the Academy of Finland and Turku University Foundation which provided us the financial support to arrange the Authors’ Meeting in Turku.
Contents

Contributors........................................................................................................... ix

Introduction: The Scope and Importance of Genetic Democracy .............. 1
Veikko Launis

The Prerequisites for Genetic Democracy ......................................................... 9
Helena Siipi
