Fuzzy Hierarchical Model for Risk Assessment
Hing Kai Chan · Xiaojun Wang

Fuzzy Hierarchical Model for Risk Assessment

Principles, Concepts, and Practical Applications

Springer
# Contents

1 **Introduction** ........................................ 1  
   1.1 Multi-Criteria Decision-Making Problems and Risk Assessment .................. 1  
   1.2 Organisation of this Book. ......................... 3  
   References ........................................... 5  

2 **Risk Assessment** ...................................... 7  
   2.1 Introduction .................................... 7  
   2.2 Risk Assessment ................................... 8  
       2.2.1 Quantitative Risk Assessment .................. 9  
       2.2.2 Qualitative Risk Assessment ................. 10  
       2.2.3 Fuzzy Risk Assessment ....................... 10  
   2.3 Risk Assessment Applications ..................... 12  
       2.3.1 Supply Chain Risk Management ............... 12  
       2.3.2 Environmental Risk Assessment ............. 13  
       2.3.3 Food Safety Risk Assessment ................. 14  
       2.3.4 Project Risk Assessment ..................... 16  
   2.4 Summary ......................................... 17  
   References ........................................... 18  

3 **Hierarchical Model in Decision Making** ................... 25  
   3.1 Introduction .................................... 25  
   3.2 Brief Review of AHP. ............................ 25  
   3.3 Formulation of AHP ............................... 26  
   3.4 An Illustrative Case Study Using AHP .......... 29  
   3.5 Fuzzy AHP and Related Models ..................... 31  
       3.5.1 Fuzzy AHP ................................... 34  
       3.5.2 Fuzzy Extent Analysis ....................... 35  
       3.5.3 Fuzzy TOPSIS ............................... 36  
       3.5.4 Fuzzy Analytic Network Process ............ 37  
   3.6 Conclusions ..................................... 39  
   References ......................................... 39
# 4 An Integrated Fuzzy Approach for Aggregative Supplier Risk Assessment

4.1 Introduction .................................................. 45
4.2 An Aggregative Risk Assessment Model for Supplier Selection .................................................. 46
  4.2.1 Comprehensive Literature Review. ...................... 46
  4.2.2 Use Fuzzy Theory for Risk Assessment. .............. 51
  4.2.3 Analysis of Criteria Weights with AHP. .............. 53
  4.2.4 Evaluation of Aggregative Risk ......................... 54
4.3 An Application of the Proposed Model ...................... 56
  4.3.1 Case Background ........................................... 56
  4.3.2 Weights Evaluation by Pairwise Comparison .......... 58
  4.3.3 Two-Stage Assessment for Aggregative Risk Index. .... 61
4.4 Conclusion .................................................. 66
References ..................................................... 66

# 5 Fuzzy AHP Approach for Analysing Risk Rating of Environmentally Friendly Product Designs

5.1 Introduction .................................................. 71
5.2 Fuzzy AHP (FAHP) Method ................................... 71
5.3 Using FAHP for Green Design Evaluation: Constructing the Hierarchy of Green Design ...................... 75
5.4 Background Studies on Environmentally Friendly Design. .... 77
5.5 Case Study: An Electronic Product ........................ 80
5.6 Results and Discussion. ..................................... 85
5.7 Conclusions .................................................. 86
References ..................................................... 87

# 6 Fuzzy Extent Analysis for Food Risk Assessment

6.1 Introduction .................................................. 89
6.2 Fuzzy Extent Analysis ........................................ 90
6.3 Risk Assessment in the Food Industry ...................... 93
  6.3.1 Hazard Analysis and Critical Control Points. ........ 93
  6.3.2 Food Risk Assessment. .................................... 94
  6.3.3 Using Fuzzy Theory in Food Risk Assessment ....... 96
6.4 Fuzzy Hierarchical Model for Aggregative Food Risk Assessment .................................................. 97
  6.4.1 Hierarchical Structure .................................... 97
  6.4.2 Use of Fuzzy Theory in the Evaluation of Food Risk ... 98
  6.4.3 Analysis of Aggregative Food Safety Risk Indicator with Fuzzy Analytical Hierarchy Process .............. 102
6.5 Case Study .................................................. 103
  6.5.1 The Existing Risk Assessment Methodology in the Case Study Company .......................... 103
6.5.2 An Application of the Proposed Approach .................. 104
6.6 Discussion .................................................. 108
6.7 Conclusion .................................................. 111
References ...................................................... 112

7 A Hierarchical Fuzzy TOPSIS Approach for the Risk
Assessment of Green Supply Chain Implementation ............. 115
7.1 Introduction .................................................. 115
7.2 TOPSIS ..................................................... 116
7.3 Risk Assessment for GSCM Implementation ................. 118
7.4 Proposed Hierarchical Fuzzy TOPSIS Approach ............ 120
  7.4.1 Hierarchical Model ........................................ 120
  7.4.2 Analysis of Criteria Weights with AHP .................. 122
  7.4.3 Hierarchical Fuzzy TOPSIS .............................. 122
7.5 An Illustrative Case Application ................................ 125
7.6 Conclusions .................................................. 131
References ...................................................... 132

8 Fuzzy-ANP Approach for Environmental Risk Assessment
of Product Designs ............................................. 135
8.1 Introduction .................................................. 135
8.2 Using FANP and Fuzzy AHP for Green Design Evaluation ... 136
  8.2.1 An Evaluation Framework for Eco-Designs .............. 136
  8.2.2 Use Fuzzy AHP for Environmental Risk Assessment ... 138
  8.2.3 Use Fuzzy ANP to Estimate Weights for Life
        Cycle Phases and Criteria ................................ 139
  8.2.4 FANP Approach for Green Design Evaluation .......... 140
8.3 Case Study .................................................. 142
8.4 Results and Discussion ..................................... 150
8.5 Conclusions .................................................. 152
References ...................................................... 153

9 Conclusions and Future Research Directions ..................... 155
9.1 Conclusions .................................................. 155
9.2 Future Research Directions .................................. 156
References ...................................................... 158

Appendix A: Introduction to Life-Cycle Assessment (LCA) ........ 161

Appendix B: Pairwise Comparisons of the Example in Chapter 3 .... 163
