PART II

---

# ***METHODOLOGY***

Part II has six chapters. Each of these chapters discusses a specific phase of TAD methodology.

Chapter 4 deals with the first phase; this is problem definition. Chapter 5 represents the second phase: systems functioning. Chapter 6 discusses the third phase: business process reengineering. Chapter 7 deals with the fourth phase, the object model. Chapter 8 introduces the fifth phase: design. Finally, Chapter 9 represents the sixth phase, implementation.
