SPONSORS

ISOTT is a scientific society and as such is most grateful for the generosity of sponsoring organizations. However, it does not endorse any of their products or services. This applies also to any material that may be distributed in mailings or at its meetings.

Sponsors:

We would like to extend our appreciation to the following organizations for their generous financial support of ISOTT 2001:

Alliance Pharmaceutical Corporation
AstraZeneca Pharmaceuticals, Inc.
Institute for Environmental Medicine, University of Pennsylvania

Thanks are also due to the University of Pennsylvania Department of Biochemistry and Biophysics for administrative assistance, and to the volunteers from the School of Medicine who so graciously contributed their time and effort to making the meeting run smoothly.

PREFACE

The ISOTT 2001 local organizing committee was pleased to welcome over 140 delegates from around the world to the 29th annual general meeting of the International Society for Oxygen Transport to Tissue. The meeting was held in historic Philadelphia, USA, on the campus of the University of Pennsylvania from August 11 to 15, 2001. In the tradition of ISOTT, the conference was a total immersion experience. Attendees were encouraged to eat together and spend their evenings relaxing together in a style that maximized exchange of ideas and interactions of younger scientists with their more senior colleagues. Delegates participated in a total of 122 presentations including poster displays, selected oral presentations, seminars by invited speakers and a round table discussion. In choosing invited speakers and oral presenters, special emphasis was placed on methods for oxygen measurement in living tissue and application of these technologies to understanding physiological and biochemical basis for pathology related to tissue oxygenation.

All of the manuscripts contained in this volume underwent both an editorial and scientific review, and only those meeting both criteria have been published. However, while all efforts have been made to eliminate editorial errors, some have undoubtedly been overlooked, for which the editors apologize.

Production of this volume would not have been possible without the skillful shepherding and hard work of Isolde Dunphy, who played a major role in organizing the meeting and took primary technical responsibility for production of the Proceedings, or the copy-editing of Laraine Visser. The editors would also like to thank the many colleagues who reviewed manuscripts for scientific content. Without them, these Proceedings would not have been possible.

On behalf of ISOTT, we congratulate Fahmeed Hyder and Theresa Busch respectively as the Melvin H. Knisely and Dietrich W. Lubbers award winners of 2001, selected for their outstanding achievements in research related to oxygen transport to tissue.

CONTENTS

TUMOR BIOLOGY AND PHYSIOLOGY

1. THE ROLE OF TUMOR OXYGENATION IN VASCULAR AND CLINICAL RESPONSE TO ANGIOGENESIS INHIBITION ........ 1
   Michael S. Gee and William M. F. Lee

2. COMPARISON OF FLUCTUATIONS OF OXYGEN TENSION IN FSA, 9L AND R3230AC TUMORS IN RATS ........................................... 7
   L. Isabel Cárdenas-Navia, Rod Braun, Kristina Lewis, and Mark Dewhirst

3. EFFECT OF CARBOGEN-BREATHING ON REDOX STATUS OF THE RIF-1 TUMOR ................................................................. 13
   Govindasamy Illangovan, Haiquan Li, Jay L. Zweier, and Periannan Kuppusamy

4. EVALUATION OF MICROREGIONAL VARIATIONS IN TUMOR HYPOXIA FOLLOWING THE ADMINISTRATION OF ENDOSTATIN ........................................................................ 19
   Bruce M. Fenton, Scott F. Paoni, Brian K. Beauchamp, Baohuong Tran, Li Liang, Brian Grimwood, and Ivan Ding

5. EFFECT OF HYDRALAZINE ON BLOOD FLOW, OXYGENATION AND INTERSTITIAL FLUID PRESSURE IN SUBCUTANEOUS TUMORS ................................................................................ 25
   Tomaz Jarm, Blaž Podobnik, Gregor Serša, and Damijan Miklavčič

6. OXYGENATION OF CERVIX CANCERS: IMPACT OF CLINICAL AND PATHOLOGICAL PARAMETERS ........................................... 31
   Michael Höckel and Peter Vaupel

7. QUANTITATIVE SPATIAL ANALYSIS OF HYPOXIA AND VASCULAR PERFUSION IN TUMOR SECTIONS ...................... 37
   Theresa M. Busch, E. Paul Wileyto, Sydney M. Evans, and Cameron J. Koch
8. TUMOR OXYGENATION AND ITS RELEVANCE TO TUMOR PHYSIOLOGY AND TREATMENT .............................................. 45
Peter Vaupel and Michael H"ockel

9. MECHANISMS UNDERLYING HYPOXIA DEVELOPMENT IN TUMORS ........................................................................... 51
Mark W. Dewhirst

10. LACK OF ASSOCIATION BETWEEN TUMOR HYPOXIA, GLUT-1 EXPRESSION AND GLUCOSE UPTAKE IN EXPERIMENTAL SARCOMAS ................................................................. 57
Oliver Thews, Debra K. Kelleher, Norbert Esser, Stephan Kraus, and Peter Vaupel

11. THE IMPACT OF TISSUE MICROENVIRONMENT ON TREATMENT SIMULATION ................................................ 63
Alexandru Da"su and Juliana Denekamp

12. EVIDENCE FOR AND AGAINST HYPOXIA AS THE PRIMARY CAUSE OF TUMOR AGGRESSIVENESS ................................. 69
Paul Okunieff, Ivan Ding, Peter Vaupel, and Michael H"ockel

13. CHARACTERIZATION OF HUMAN Gc PROTEIN-DERIVED MACROPHAGE ACTIVATION FACTOR (GcMAF) AND ITS FUNCTIONAL ROLE IN MACROPHAGE TUMORICIDAL ACTIVITY ............................................................... 77
Saharuddin B. Mohamad, Hitoshi Hori, Hideko Nagasawa, Kenji Usui, and Yoshihiro Uto

BLOOD PHYSIOLOGY AND BLOOD SUBSTITUTES

14. EFFECT OF HEMOGLOBIN SOLUTIONS AS HEMODILUENTS ON CAPILLARY OXYGEN TENSION .............................................. 83
Roland N. Pittman, Kristin B. Miller, and Peter H. Tait

15. DIFFERENT EFFICACY IN VITRO OF HEMOGLOBIN BASED OXYGEN CARRIERS AND RED CELLS ................................. 89
E. Bucci, T.L. Watts, H.E. Kwansa, and A. Fasano

16. A NOVEL BLOOD TRANSFUSANT CANDIDATE: INTACT HUMAN ERYTHROCYTES CONTAINING HEMOGLOBIN EXCLUSIVELY NITROSYLATED IN THE $\alpha$-SUBUNITS .............. 93
Antonio Tsuneshige and Takashi Yonetani
