

**Reviews of Plasma Physics**

**VOPROSY TEORII PLAZMY**

**ВОПРОСЫ ТЕОРИИ ПЛАЗМЫ**

Translated from Russian by J. George Adashko

# Reviews of Plasma Physics

Edited by Acad. B. B. Kadomtsev

Volume **17**

 CONSULTANTS BUREAU · NEW YORK-LONDON

The Library of Congress cataloged the first volume of this title as follows:

---

Reviews of plasma physics. v. 1—

New York, Consultants Bureau, 1965—

/v. illus. 24 cm.

Translation of Voprosy teorii plazmy.

Editor: v. 1— M. A. Leontovich.

1. Plasma (Ionized gases)—Collected works. I. Leontovich, M. A., ed. II. Consultants Bureau Enterprises, Inc., New York. III. Title: Voprosy teorii plazmy. Eng.

QC718.V63

64-23244

## GENERATION OF NONINDUCTIVE CURRENT IN A TOKAMAK

Ya. I. Kolesnichenko, V. V. Parail, and G. V. Pereverzev

Introduction . . . . .	1
1. Qualitative Analysis of Noninductive Methods of Generating a Stationary Current in a Tokamak . . . . .	7
1.1. Main Mechanisms of Current Generation . . . . .	7
1.2. Methods Based on Introducing a Longitudinal Pulse into a Plasma . . . . .	12
1.3. Methods Not Involving an External Pulse . . . . .	24
2. Maintenance of a Stationary Current in a Tokamak . . . . .	39
2.1. Tokamak Reactor with Self-Maintaining Current (Boot Strap Tokamak) . . . . .	39
2.2. Maintaining a Current in a Tokamak by Neutral-Atom Injection . . . . .	51
2.3. HF-Dragging Currents in a Plasma . . . . .	66
2.4. Plasma Production by Cyclotron Waves . . . . .	98
3. Dynamics of Current Production in a Tokamak . . . . .	111
3.1. Kinetics of Current Generation in a Plasma with an Electric Field . . . . .	111
3.2. Dynamics of Total Current in a Tokamak . . . . .	129
3.3. Distribution of Noninductive Current in a Tokamak . . . . .	150
3.4. Dynamics of Current Density in a Tokamak . . . . .	164
4. Conclusion . . . . .	178
References . . . . .	184

# RESONANCE EFFECTS IN OSCILLATIONS OF UNEVEN FLOWS OF CONTINUOUS MEDIA

A. V. Timofeev

Introduction .....	193
1. Oscillations of Plane-Parallel Liquid Flows .....	196
1.1. Rayleigh's Theorem .....	196
1.2. Allowance for Viscosity. Landau's Circuiting Theorem .....	199
1.3. Rayleigh's Equation as a Schrödinger Equation with a Singular Potential .....	205
1.4. Analog of Rayleigh's Theorem for Singular Equations with Pole of Arbitrary Order .....	211
1.5. Rayleigh Instability .....	213
1.6. Analysis of Resonant Interaction in Flows of an Ideal Liquid. ....	216
1.7. Influence of Viscosity on Flow Stability .....	226
1.8. Instability of Flows as a Result of the Action of a Reynolds Stress .....	235
1.9. Evolution of Initial Perturbation in Liquid Flows ..	237
1.10. Resonant Buildup of Gravitation Waves .....	244
1.11. Resonant Interaction in Flows of a Compressible Liquid .....	249
2. Flute Oscillations of a Charged-Particle Gas and of an Inhomogeneously Rotating Plasma in a Magnetic Field .	255
2.1. Charged-Particle Gas in a Magnetic Field .....	255
2.2. Rarefied Uncompensated Plasma .....	265
2.3. Dense Rotating Plasma .....	271
3. Oscillations of Inhomogeneous Electron Streams in a Longitudinal Magnetic Field .....	279
3.1. Flow with Linear Velocity Profile .....	279
3.2. Adjacent Flows .....	284
4. Alfvén Oscillations of an Inhomogeneous Plasma .....	286
Appendices .....	293
A.1. Rayleigh's Theorem and Damped Oscillations ...	293
A.2. Fourth-Order Equations with Small Parameter of the Highest Derivative .....	294
References .....	298
