| jQuery Syntax .....                                   | 23        |
| Document Ready Event.....                             | 24        |
| jQuery noConflict() Method .....                      | 25        |
| jQuery Selectors .....                                | 27        |
| Working with jQuery .....                             | 31        |
| The Problem Statement.....                            | 31        |
| The Anonymous Function .....                          | 34        |
| Preloading Images with jQuery.....                    | 35        |
| each() in jQuery .....                                | 36        |
| Summary.....  | 38        |
| <b>■ Chapter 3: Traversing DOM with jQuery</b> .....  | <b>39</b> |
| Selecting Elements with CSS Selectors .....           | 39        |
| Type Selector .....                                   | 40        |
| Universal Selector.....                               | 40        |
| Attribute Selector.....                               | 40        |
| Class Selector .....                                  | 41        |
| ID Selector .....                                     | 42        |
| Pseudo Class Selector .....                           | 43        |
| Relationship-Based Selectors .....                    | 44        |
| Using jQuery Selectors .....                          | 45        |
| Type Selector .....                                   | 46        |
| Universal Selector.....                               | 46        |

|  |           |
|--|-----------|
| Attribute Selector.....  | 46        |
| Class Selector.....  | 47        |
| ID Selector.....   | 47        |
| Pseudo Class Selector.....   | 47        |
| Other jQuery Selectors.....  | 47        |
| <b>Traversing DOM with jQuery Traversal Methods.....</b>                     | <b>48</b> |
| The Curtain Raiser.....  | 49        |
| jQuery Methods for DOM Traversal.....  | 50        |
| <b>Caching Selector and Chaining Methods.....</b>                            | <b>60</b> |
| Selector Caching.....  | 60        |
| Chaining.....  | 63        |
| <b>jQuery Filtering.....</b>   | <b>64</b> |
| The .eq() Method.....  | 65        |
| The .filter() Method.....  | 66        |
| The .first() Method.....   | 69        |
| The .last() Method.....  | 69        |
| The .has() Method.....   | 70        |
| The .is() Method.....  | 71        |
| The .not() Method.....   | 72        |
| <b>Summary.....</b>  | <b>73</b> |
| <b>■ Chapter 4: DOM Manipulation with jQuery.....</b>                        | <b>75</b> |
| <b>Editing Appearance with jQuery CSS Methods.....</b>                       | <b>75</b> |
| Obtaining CSS Properties.....  | 76        |
| Setting CSS Properties.....  | 76        |
| Setting Multiple CSS Properties.....   | 79        |
| <b>Editing/Changing an Element's Attributes, Contents, and Position.....</b> | <b>80</b> |
| Editing Attributes.....  | 80        |
| Editing Contents.....  | 82        |

|   |            |
|---|------------|
| Creating and Inserting New DOM Elements .....         | 85         |
| .append() vs. .appendTo() .....                       | 86         |
| Inserting New Elements in Specific Locations .....    | 87         |
| Putting the Methods to Work .....                     | 87         |
| Removing and Cloning DOM Elements .....               | 91         |
| Working with Dimensions.....                          | 95         |
| jQuery width() and height() Methods.....              | 96         |
| jQuery innerWidth() and innerHeight() Methods.....    | 96         |
| jQuery .outerWidth() and .outerHeight() Methods.....  | 97         |
| Summary .....   | 98         |
| <b>■ Chapter 5: Events in jQuery .....</b>            | <b>99</b>  |
| Introducing Events .....                              | 99         |
| Browsers and Events.....                              | 101        |
| Event Listeners and Event Handlers.....               | 104        |
| The Event() Method in jQuery.....                     | 113        |
| Binding Events.....                                   | 117        |
| Unbinding Events.....                                 | 121        |
| Events Propagation and Events Bubbling.....           | 122        |
| The Event Capturing and Event Bubbling Models.....    | 123        |
| The W3C Event Model.....                              | 123        |
| Callback Action in Event.....                         | 125        |
| Summary.....  | 127        |
| <b>■ Chapter 6: Real World Events in jQuery .....</b> | <b>129</b> |
| Common Gotchas in Event Handling .....                | 129        |
| Handling Dynamic Elements.....                        | 129        |
| Handling jQuery Animation Buildup .....               | 131        |
| Preventing Event Propagation and Bubbling.....        | 133        |
| Handling the Event Queue .....                        | 134        |
| How Handling Works in a jQuery Event Queue .....      | 135        |
| The jQuery queue() Method.....                        | 135        |

|   |            |
|---|------------|
| Building a jQuery UI Accordion .....                  | 136        |
| Using the jQuery UI Accordion .....                   | 137        |
| Customizing an Accordion .....                        | 139        |
| Validating Form Elements .....                        | 141        |
| Using the Validate Plug-in.....                       | 142        |
| Validating Form Elements Using Customized jQuery..... | 144        |
| Summary .....   | 149        |
| <b>■ Chapter 7: Animation in jQuery .....</b>         | <b>151</b> |
| Life Without jQuery .....                             | 151        |
| jQuery's animate().....                               | 154        |
| Fading in jQuery .....                                | 157        |
| Using the fadeOut() Method .....                      | 158        |
| Using the fadeIn() Method.....                        | 160        |
| Using the fadeTo() Method .....                       | 164        |
| Using the fadeToggle() Method .....                   | 166        |
| Sliding in jQuery .....                               | 168        |
| Using the slideUp() Method .....                      | 168        |
| Using the slideDown() Method .....                    | 171        |
| Using the slideToggle() Method.....                   | 175        |
| Toggle() in jQuery .....                              | 177        |
| Creating a Basic Light Box .....                      | 179        |
| Controlling Animation Behavior .....                  | 184        |
| Smoothing Your Animations.....                        | 184        |
| Using the fx Object to Control Frame Rate .....       | 184        |
| Turning Off Your Animation .....                      | 185        |
| Creating a Basic Image Slider .....                   | 185        |
| Summary.....  | 193        |

|  |            |
|--|------------|
| <b>■ Chapter 8: Ajax with jQuery.....</b>              | <b>195</b> |
| Introducing Ajax .....                                 | 195        |
| How Did Ajax Originate? .....                          | 195        |
| The Technologies That Make Up Ajax.....                | 196        |
| Ajax Using jQuery .....                                | 197        |
| The Nuts and Bolts of Ajax in JavaScript.....          | 197        |
| The jQuery Approach .....                              | 198        |
| Introducing JSON .....                                 | 202        |
| Understanding JSON.....                                | 203        |
| Parsing JSON with JavaScript.....                      | 204        |
| Using the jQuery Alternative to JavaScript .....       | 206        |
| Ajax and JSON Usage Example .....                      | 207        |
| Summary.....   | 210        |
| <b>■ Chapter 9: Creating Plug-ins with jQuery.....</b> | <b>211</b> |
| What Is a Plug-in? .....                               | 211        |
| Plug-in Best Practices.....                            | 213        |
| Private Variables.....                                 | 213        |
| Public Variables .....                                 | 214        |
| Parameters .....                                       | 214        |
| Plug-in Writing Guidelines.....                        | 215        |
| Do You Really Need the Plug-in? .....                  | 215        |
| Reuse What Already Exists .....                        | 216        |
| Preserve the Reference to jQuery.....                  | 216        |
| Do Not Unnecessarily Modify Objects.....               | 216        |
| Ensure Chainability.....                               | 217        |
| Creating a Form Validation Plug-in.....                | 217        |
| Creating an Accordion Plug-in.....                     | 221        |
| Summary.....   | 227        |

- **Chapter 10: Integrating Plug-ins with jQuery..... 229**
  - Plug-in Repositories ..... 229
    - The jQuery Registry ..... 229
    - The NPM Open Source Package Repository ..... 230
    - The GitHub Repository ..... 231
  - Integrating Plug-ins..... 232

# About the Authors

**Mukund Chaudhary** is enamored of technology and keeps himself up-to-date through avid reading. In his leisure time, he can be found reading articles on current affairs and technologies alike. A perfectionist, he is a product manager by profession and is quite strict when it comes to delivery deadlines. He feels that 24 hours in a day are sufficient, provided a person has plans that are correct and clear.

**Ankur Kumar** is a software engineer by profession and an adventurer by nature. He is a person who reads people's faces by instinct. He believes that being honest and true to oneself works wonders. He also believes that knowledge is relative in this world, and that it is no big deal to accept that learning never stops as long as a person is alive. Ankur has worked on open source web technologies for a major part of his professional career. He offers thanks to the Almighty "for making us what we are and showing us the way ahead!"

# About the Technical Reviewer

**Jose Dieguez Castro** is a senior system administrator, working currently as a freelance consultant, who has worked in a wide range of projects—from small to large infrastructures, in the private and public sectors. When asked about his specialty, he answers: “Get the job done.” He also likes to think of himself as a developer, who cares too much about software libre. Photography, sports, music, and reading are his preferred ways of freeing his mind from work. He can be reached at [jose@jdcastro.eu](mailto:jose@jdcastro.eu).

# Acknowledgments

I take this opportunity to express my gratitude to everyone who supported me at all times. I am thankful to the editors for their aspiring guidance, invaluable constructive criticism, and friendly advice.

I sincerely thank everyone, including my parents, my better half, friends, and teammates, who gave their suggestions for improving this book. Special thanks to my grandfather, the late Kameshwar Chaudhary, who always inspired me to write.

—Mukund Chaudhary

I take this opportunity to thank the Almighty, as well as the extremely careful support staff at Apress, which was there at all times to guide us in the right direction. I particularly acknowledge the editors, who took great pains to understand my intent, and the way they managed the activities pertaining to giving this book its current form. Although thousands of miles away, I always received abundant assistance from them.

I also received enormous support from my parents all the while I was writing. Special thanks to my wife, Neha, who was patient enough to let me focus on providing quality content for this book.

—Ankur Kumar

# Introduction

This book aims to provide information to developers who have worked on JavaScript and wish to gain hands-on experience with jQuery. It starts by reviewing some JavaScript concepts and forges ahead to establish the need for a standard framework. This need is addressed by this book, which explores jQuery as a JavaScript framework and covers further developments, with the aim of helping readers to become familiar with the way problems are solved using jQuery.

Practical demonstrations are offered throughout the book, and the same examples are used across multiple demonstrations to ensure that readers receive a multidimensional view of the subject matter. The book concludes by providing information on how to test applications written in jQuery or JavaScript.
