Printed on acid-free paper

*Dedicated to my lovely wife, Jacqui Griffyth. And to Peanut,
who can also be lovely when she tries.*

Contents at a Glance

About the Author	xxv
About the Technical Reviewer	xxvii
■ Chapter 1: Getting Ready.....	1
■ Chapter 2: Your First Angular App.....	5
■ Chapter 3: Putting Angular in Context.....	31
■ Chapter 4: An HTML and CSS Primer.....	43
■ Chapter 5: JavaScript and TypeScript: Part 1.....	63
■ Chapter 6: JavaScript and TypeScript: Part 2.....	87
■ Chapter 7: SportsStore: A Real Application.....	107
■ Chapter 8: SportsStore: Orders and Checkout.....	135
■ Chapter 9: SportsStore: Administration	163
■ Chapter 10: SportsStore: Deployment	191
■ Chapter 11: Creating an Angular Project.....	197
■ Chapter 12: Using Data Bindings.....	227
■ Chapter 13: Using the Built-In in Directives	251
■ Chapter 14: Using Events and Forms.....	279
■ Chapter 15: Creating Attribute Directives	327
■ Chapter 16: Creating Structural Directives.....	353
■ Chapter 17: Understanding Components.....	389
■ Chapter 18: Using and Creating Pipes.....	423

■ Chapter 19: Using Services	455
■ Chapter 20: Using Service Providers	483
■ Chapter 21: Using and Creating Modules	515
■ Chapter 22: Creating the Example Project	541
■ Chapter 23: Using Reactive Extensions	559
■ Chapter 24: Making Asynchronous HTTP Requests	583
■ Chapter 25: Routing and Navigation: Part 1	611
■ Chapter 26: Routing and Navigation: Part 2	645
■ Chapter 27: Routing and Navigation: Part 3	673
■ Chapter 28: Using Animation	711
■ Chapter 29: Angular Unit Testing	745
Erratum	E1
Index	775

Contents

About the Author	xxv
About the Technical Reviewer	xxvii
■ Chapter 1: Getting Ready	1
What Do You Need to Know?	1
What Is the Structure of This Book?	1
Part 1: Getting Ready	2
Part 2: Working with Angular	2
Part 3: Advanced Angular Features.....	2
Are There Lots of Examples?	2
Where Can You Get the Example Code?	4
How Do You Set Up Your Development Environment?	4
Contacting the Author	4
Summary	4
■ Chapter 2: Your First Angular App.....	5
Preparing the Development Environment.....	5
Installing Node.js	5
Installing the angular-cli Package	6
Installing Git.....	6
Installing an Editor.....	7
Installing a Browser.....	8

Creating and Preparing the Project	8
Creating the Project.....	8
Creating the Package File.....	8
Starting the Server	10
Editing the HTML File.....	11
Adding Angular Features to the Project.....	13
Preparing the HTML File	14
Creating a Data Model	15
Creating a Template.....	17
Creating a Component	17
Putting the Application Together.....	19
Adding Features to the Example Application.....	22
Adding the To-Do Table	22
Creating a Two-Way Data Binding	25
Adding To-Do Items	27
Summary.....	30
■ Chapter 3: Putting Angular in Context.....	31
Understanding Where Angular Excels	32
Understanding Round-Trip and Single-Page Applications.....	32
Understanding the MVC Pattern	34
Understanding Models.....	36
Understanding Controllers/Components.....	38
Understanding Views/Templates	39
Understanding RESTful Services.....	39
Common Design Pitfalls	41
Putting the Logic in the Wrong Place.....	41
Adopting the Data Store Data Format.....	42
Just Enough Knowledge to Cause Trouble.....	42
Summary.....	42

■ Chapter 4: An HTML and CSS Primer	43
Preparing the Example Project.....	43
Understanding HTML.....	45
Understanding Void Elements.....	46
Understanding Attributes.....	46
Applying Attributes Without Values.....	46
Quoting Literal Values in Attributes.....	47
Understanding Element Content.....	47
Understanding the Document Structure.....	47
Understanding Bootstrap.....	49
Applying Basic Bootstrap Classes.....	50
Using Bootstrap to Style Tables.....	54
Using Bootstrap to Create Forms.....	55
Using Bootstrap to Create Grids.....	57
Summary.....	62
■ Chapter 5: JavaScript and TypeScript: Part 1	63
Preparing the Example Project.....	65
Creating the HTML and JavaScript Files.....	65
Configuring the TypeScript Compiler.....	66
Running the Example Project.....	66
Understanding the Script Element.....	67
Using a JavaScript Module Loader.....	68
Understanding the Basic Workflow.....	69
Using Statements.....	70
Defining and Using Functions.....	70
Defining Functions with Parameters.....	72
Defining Functions That Return Results.....	73
Using Functions as Arguments to Other Functions.....	74

Using Variables and Types	75
Using the Primitive Types	77
Using JavaScript Operators	79
Using Conditional Statements	79
The Equality Operator vs. the Identity Operator	80
Explicitly Converting Types	81
Working with Arrays	83
Using an Array Literal	83
Reading and Modifying the Contents of an Array	84
Enumerating the Contents of an Array	84
Using the Built-in Array Methods	85
Summary	86
■ Chapter 6: JavaScript and TypeScript: Part 2	87
Preparing the Example Project	87
Working with Objects	88
Using Object Literals	89
Using Functions as Methods	89
Defining Classes	90
Working with JavaScript Modules	94
Creating Modules	94
Importing from JavaScript Modules	95
Useful TypeScript Features	98
Using Type Annotations	98
Using Tuples	104
Using Indexable Types	104
Using Access Modifiers	105
Summary	106

■ Chapter 7: SportsStore: A Real Application	107
Preparing the Project	107
Creating the Folder Structure	108
Installing the Additional NPM Packages	108
Preparing the RESTful Web Service	109
Preparing the HTML File	112
Running the Example Application	112
Starting the RESTful Web Service.....	113
Preparing the Angular Project Features	113
Updating the Root Component.....	114
Updating the Root Module	114
Inspecting the Bootstrap File.....	115
Starting the Data Model	116
Creating the Model Classes	116
Creating the Dummy Data Source	117
Creating the Model Repository	118
Creating the Feature Module	119
Starting the Store	120
Creating the Store Component and Template	120
Creating the Store Feature Module.....	122
Updating the Root Component and Root Module.....	122
Adding Store Features the Product Details	123
Displaying the Product Details.....	123
Adding Category Selection	125
Adding Product Pagination	127
Creating a Custom Directive	131
Summary.....	134

- **Chapter 8: SportsStore: Orders and Checkout**..... **135**
 - Preparing the Example Application 135
 - Creating the Cart 135
 - Creating the Cart Model..... 136
 - Creating the Cart Summary Components 137
 - Integrating the Cart into the Store 139
 - Adding URL Routing..... 142
 - Creating the Cart Detail and Checkout Components 143
 - Creating and Applying the Routing Configuration..... 144
 - Navigating through the Application 145
 - Guarding the Routes 148
 - Completing the Cart Detail Feature 151
 - Processing Orders 153
 - Extending the Model..... 153
 - Collecting the Order Details..... 156
 - Using the RESTful Web Service 160
 - Applying the Data Source 161
 - Summary..... 162
- **Chapter 9: SportsStore: Administration** **163**
 - Preparing the Example Application 163
 - Creating the Module 163
 - Configuring the URL Routing System..... 166
 - Navigating to the Administration URL..... 167
 - Implementing Authentication 169
 - Understanding the Authentication System 169
 - Extending the Data Source 170
 - Creating the Authentication Service 171
 - Enabling Authentication..... 172

Extending the Data Source and Repositories	175
Creating the Administration Feature Structure.....	179
Creating the Placeholder Components	179
Preparing the Common Content and the Feature Module	180
Implementing the Product Feature	183
Implementing the Orders Feature.....	186
Summary.....	189
■ Chapter 10: SportsStore: Deployment	191
Preparing the Application for Deployment.....	191
Containerizing the SportsStore Application.....	191
Installing Docker.....	191
Preparing the Application	192
Creating the Docker Container	194
Running the Application.....	194
Summary.....	195
■ Chapter 11: Creating an Angular Project.....	197
Preparing a TypeScript Angular Development Project.....	197
Creating the Project Folder Structure	198
Creating and Serving the HTML Document.....	198
Preparing the Project Configuration	199
Adding Packages	199
Starting the Watch Processes.....	209
Starting Angular Development with TypeScript.....	209
Creating the Data Model.....	213
Creating the Template and Root Component	216
Creating the Angular Module	217
Bootstrapping the Application	217
Configuring the JavaScript Module Loader	218
Updating the HTML Document.....	222
Running the Application.....	224
Summary.....	225

■ Chapter 12: Using Data Bindings	227
Preparing the Example Project.....	228
Understanding One-Way Data Bindings	229
Understanding the Binding Target	231
Understanding the Expression.....	232
Understanding the Brackets	233
Understanding the Host Element.....	234
Using the Standard Property and Attribute Bindings.....	234
Using the Standard Property Binding	234
Using the String Interpolation Binding.....	236
Using the Attribute Binding.....	237
Setting Classes and Styles.....	239
Using the Class Bindings.....	239
Using the Style Bindings.....	244
Updating the Data in the Application.....	248
Summary.....	250
■ Chapter 13: Using the Built-In in Directives	251
Preparing the Example Project.....	252
Using the Built-in Directives.....	253
Using the ngIf Directive	254
Using the ngSwitch Directive	256
Using the ngFor Directive	259
Using the ngTemplateOutlet Directive	269
Understanding One-Way Data Binding Restrictions	272
Using Idempotent Expressions	272
Understanding the Expression Context.....	275
Summary.....	278

■ Chapter 14: Using Events and Forms	279
Preparing the Example Project.....	280
Adding the Forms Module	280
Preparing the Component and Template	282
Using the Event Binding	283
Understanding Dynamically Defined Properties	285
Using Event Data	287
Using Template Reference Variables	289
Using Two-Way Data Bindings.....	291
Using the ngModel Directive.....	293
Working with Forms	295
Adding a Form to the Example Application.....	295
Adding Form Data Validation	297
Validating the Entire Form	307
Using Model-Based Forms	314
Enabling Model-Based Forms Feature	314
Defining the Form Model Classes.....	315
Using the Model for Validation.....	318
Generating the Elements from the Model.....	322
Creating Custom Form Validators.....	323
Applying a Custom Validator.....	324
Summary.....	326
■ Chapter 15: Creating Attribute Directives	327
Preparing the Example Project.....	328
Creating a Simple Attribute Directive	330
Applying a Custom Directive.....	331
Accessing Application Data in a Directive	333
Reading Host Element Attributes.....	333
Creating Data-Bound Input Properties.....	336
Responding to Input Property Changes	339

Creating Custom Events	341
Binding to a Custom Event	343
Creating Host Element Bindings.....	344
Creating a Two-Way Binding on the Host Element	345
Exporting a Directive for Use in a Template Variable.....	349
Summary.....	352
■ Chapter 16: Creating Structural Directives.....	353
Preparing the Example Project.....	354
Creating a Simple Structural Directive	355
Implementing the Structural Directive Class	356
Enabling the Structural Directive.....	358
Using the Concise Structural Directive Syntax	360
Creating Iterating Structural Directives.....	361
Providing Additional Context Data	364
Using the Concise Structure Syntax	366
Dealing with Property-Level Data Changes	367
Dealing with Collection-Level Data Changes.....	369
Querying the Host Element Content	380
Querying Multiple Content Children.....	384
Receiving Query Change Notifications	386
Summary.....	387
■ Chapter 17: Understanding Components.....	389
Preparing the Example Project.....	390
Structuring an Application with Components.....	391
Creating New Components	392
Defining Templates	396
Completing the Component Restructure	407

Using Component Styles	407
Defining External Component Styles	409
Using Advanced Style Features	410
Querying Template Content	418
Summary	421
■ Chapter 18: Using and Creating Pipes	423
Preparing the Example Project	424
Installing the Internationalization Polyfill	426
Understanding Pipes	429
Creating a Custom Pipe	430
Registering a Custom Pipe	431
Applying a Custom Pipe	432
Combining Pipes	433
Creating Impure Pipes	434
Using the Built-in Pipes	438
Formatting Numbers	439
Formatting Currency Values	441
Formatting Percentages	444
Formatting Dates	446
Changing String Case	449
Serializing Data as JSON	450
Slicing Data Arrays	451
Summary	453
■ Chapter 19: Using Services	455
Preparing the Example Project	456
Understanding the Object Distribution Problem	457
Demonstrating the Problem	457
Distributing Objects as Services Using Dependency Injection	462
Declaring Dependencies in Other Building Blocks	468

Understanding the Test Isolation Problem.....	474
Isolating Components Using Services and Dependency Injection.....	475
Completing the Adoption of Services	478
Updating the Root Component and Template	478
Updating the Child Components	479
Summary.....	481
■ Chapter 20: Using Service Providers	483
Preparing the Example Project.....	484
Using Service Providers	486
Using the Class Provider.....	488
Using the Value Provider.....	496
Using the Factory Provider	498
Using the Existing Service Provider.....	501
Using Local Providers.....	502
Understanding the Limitations of Single Service Objects.....	503
Creating Local Providers in a Directive.....	504
Creating Local Providers in a Component.....	506
Controlling Dependency Resolution.....	511
Summary.....	513
■ Chapter 21: Using and Creating Modules	515
Preparing the Example Project.....	516
Understanding the Root Module.....	518
Understanding the Imports Property	520
Understanding the Declarations Property.....	520
Understanding the Providers Property.....	521
Understanding the Bootstrap Property	521
Creating Feature Modules	523
Creating a Model Module.....	525
Creating a Utility Feature Module	529
Creating a Feature Module with Components	535
Summary.....	539

■ Chapter 22: Creating the Example Project.....	541
Starting the Example Project.....	541
Adding and Configuring the Packages	542
Configuring TypeScript.....	543
Configuring the Development HTTP Server	543
Configuring the JavaScript Module Loader	544
Creating the Model Module	544
Creating the Product Data Type	544
Creating the Data Source and Repository.....	545
Completing the Model Module.....	546
Creating the Core Module.....	547
Creating the Shared State Service	547
Creating the Table Component.....	547
Creating the Form Component.....	549
Completing the Core Module	551
Creating the Messages Module.....	552
Creating the Message Model and Service	552
Creating the Component and Template	553
Completing the Message Module	553
Completing the Project.....	554
Creating the Angular Bootstrap	554
Creating the Reactive Extensions Module	555
Creating the HTML Document.....	555
Running the Example Project.....	556
Summary.....	557
■ Chapter 23: Using Reactive Extensions	559
Preparing the Example Project.....	560
Understanding the Problem.....	561

Solving the Problem with Reactive Extensions	563
Understanding Observables.....	564
Understanding Observers	566
Understanding Subjects	567
Using the Async Pipe.....	568
Using the Async Pipe with Custom Pipes	569
Scaling Up Application Feature Modules.....	571
Going Beyond the Basics.....	574
Filtering Events.....	575
Transforming Events.....	576
Receiving Only Distinct Events	579
Taking and Skipping Events.....	581
Summary.....	582
■ Chapter 24: Making Asynchronous HTTP Requests.....	583
Preparing the Example Project.....	584
Configuring the JavaScript Module Loader	585
Configuring the Model Feature Module	586
Updating the Form Component.....	587
Running the Example Project	587
Understanding RESTful Web Services	588
Replacing the Static Data Source.....	589
Creating the New Data Source Service	590
Configuring the Data Source.....	592
Using the REST Data Source.....	593
Saving and Deleting Data	595
Consolidating HTTP Requests	598
Making Cross-Origin Requests.....	600
Using JSONP Requests.....	601
Configuring Request Headers.....	603

Handling Errors	605
Generating User-Ready Messages.....	606
Handling the Errors.....	608
Summary.....	610
■ Chapter 25: Routing and Navigation: Part 1	611
Preparing the Example Project.....	612
Disabling the State Change Event Display.....	614
Getting Started with Routing.....	616
Creating a Routing Configuration.....	617
Creating the Routing Component.....	619
Updating the Root Module	619
Completing the Configuration.....	620
Adding Navigation Links	621
Understanding the Effect of Routing.....	624
Completing the Routing Implementation.....	626
Handling Route Changes in Components	626
Using Route Parameters	629
Navigating in Code.....	635
Receiving Navigation Events	638
Removing the Event Bindings and Supporting Code	640
Summary.....	643
■ Chapter 26: Routing and Navigation: Part 2	645
Preparing the Example Project.....	645
Adding Components to the Project.....	648
Using Wildcards and Redirections.....	652
Using Wildcards in Routes	652
Using Redirections in Routes.....	655
Navigating Within a Component	656
Responding to Ongoing Routing Changes	658
Styling Links for Active Routes	660
Fixing the All Button.....	663

Creating Child Routes	664
Creating the Child Route Outlet	666
Accessing Parameters from Child Routes	668
Summary	671
■ Chapter 27: Routing and Navigation: Part 3	673
Preparing the Example Project	673
Guarding Routes	675
Delaying Navigation with a Resolver	676
Preventing Navigation with Guards	683
Loading Feature Modules Dynamically	697
Creating a Simple Feature Module	698
Loading the Module Dynamically	699
Guarding Dynamic Modules	702
Targeting Named Outlets	705
Creating Additional Outlet Elements	706
Navigating When Using Multiple Outlets	708
Summary	710
■ Chapter 28: Using Animation	711
Preparing the Example Project	712
Adding the Animations Polyfill	712
Disabling the HTTP Delay	714
Simplifying the Table Template and Routing Configuration	715
Getting Started with Angular Animation	717
Creating the Animation	718
Applying the Animation	721
Testing the Animation Effect	724
Understanding the Built-in Animation States	726
Understanding Element Transitions	727
Creating Transitions for Built-in States	727
Controlling Transition Animations	729

Understanding Animation Style Groups.....	734
Defining Common Styles in Reusable Groups	735
Using Element Transformations.....	736
Applying CSS Framework Styles	738
Understanding Animation Trigger Events	740
Summary.....	743
■ Chapter 29: Angular Unit Testing.....	745
Preparing the Example Project.....	747
Adding the Testing Packages.....	748
Creating a Simple Unit Test.....	751
Starting the Tools.....	751
Working with Jasmine.....	753
Testing an Angular Component	755
Working with the TestBed Class	755
Testing Data Bindings.....	759
Testing a Component with an External Template.....	762
Testing Component Events	764
Testing Output Properties	766
Testing Input Properties.....	768
Testing with Asynchronous Operations.....	770
Testing an Angular Directive.....	772
Summary.....	774
Erratum.....	E1
Index.....	775

About the Author

Adam Freeman is an experienced IT professional who has held senior positions in a range of companies, most recently serving as chief technology officer and chief operating officer of a global bank. Now retired, he spends his time writing and long-distance running.

About the Technical Reviewer

Fabio Claudio Ferracchiati is a senior consultant and a senior analyst/developer using Microsoft technologies. He works for BluArancio (www.bluarancio.com). He is a Microsoft Certified Solution Developer for .NET, a Microsoft Certified Application Developer for .NET, a Microsoft Certified Professional, and a prolific author and technical reviewer. Over the past ten years, he's written articles for Italian and international magazines and coauthored more than ten books on a variety of computer topics.

The original version of this book was revised. An erratum to this book can be found at DOI [10.1007/978-1-4842-2307-9_30](https://doi.org/10.1007/978-1-4842-2307-9_30)
