# Preface

Spectrum sensing is critically important for cognitive radio, an emerging solution to the spectrum congestion and low usage of licensed spectrum. Energy detection is a promising low-complexity and low-cost spectrum sensing technique. Its performance analysis has been revisited extensively in the recent literature. This book thus aims at a comprehensive summary of recent research on energy detection for spectrum sensing in cognitive radio networks. This book is for researchers and engineers in both industry and academia who would like to know more about applications of energy detection.

After introducing cognitive radio and spectrum sensing techniques in Chap. 1, we discuss the basics of conventional energy detection in detail in Chap. 2. To improve conventional energy detection, many alternative energy detection techniques have been developed, which are described in Chap. 3. The common performance measures of energy detector are described in Chap. 4. Finally, Chap. 5 deals with diversity and cooperative spectrum sensing techniques which can significantly improve energy detection performance.

We would like to thank Dr. Xuemin (Sherman) Shen, for his help in publishing this monograph.

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Wireless Communications	1
1.2	Cognitive Radio	3
1.2.1	Applications of Cognitive Radio	3
1.2.2	Dynamic Spectrum Access	4
1.3	Spectrum Sensing	5
1.4	Spectrum Sensing Techniques	6
	References	8
<b>2</b>	<b>Conventional Energy Detector</b>	11
2.1	Binary Hypothesis Testing Problem	11
2.2	Energy Detection	12
2.3	Test Statistic	13
2.3.1	Signal Models	15
2.3.2	Distribution of Test Statistics	16
2.3.3	CLT Approach	18
2.3.4	Low-SNR and High-SNR Models	20
2.4	Spectrum Sensing Standardization	20
2.4.1	IEEE 802.22 Standard	21
2.5	Design Parameters	21
2.5.1	Threshold	22
2.5.2	Number of Samples	22
2.6	Noise Effect	23
	References	24
<b>3</b>	<b>Alternative Forms of Energy Detectors</b>	27
3.1	Probability-Based Weighted Energy Detector	27
3.2	Double Threshold Energy Detector	29
3.3	Blindly Combined Energy Detector	30

3.4	Energy Detector with an Arbitrary Power Operation .....	31
3.4.1	Improved Energy Detector .....	31
3.4.2	$L_p$ -Norm Detector .....	32
3.5	Hybrid/Coherent Energy Detection .....	34
3.6	Sequential Energy Detection .....	35
3.6.1	Doubly Sequential Energy Detection .....	35
3.7	Adaptive Detection .....	36
3.8	Generalized Energy Detector .....	37
3.9	Other Energy Detectors .....	38
	References .....	38
<b>4</b>	<b>Performance Measurements .....</b>	<b>41</b>
4.1	Average Detection Probability .....	42
4.1.1	Direct Averaging .....	42
4.1.2	MGF Approach .....	43
4.1.3	Infinite Series Representation .....	44
4.2	Sensing Gain .....	45
4.3	Receiver Operating Characteristic Curve .....	47
4.4	Area Under the ROC Curve .....	50
4.4.1	Direct Integration .....	51
4.4.2	Threshold Averaging .....	51
4.4.3	MGF Approach .....	52
4.4.4	Complementary AUC .....	54
4.4.5	Partial AUC .....	55
4.5	Low-SNR Energy Detection .....	56
	References .....	59
<b>5</b>	<b>Diversity Techniques and Cooperative Networks .....</b>	<b>63</b>
5.1	Traditional Diversity Techniques .....	63
5.1.1	Maximal Ratio Combining .....	64
5.1.2	Equal Gain Combining .....	65
5.2	Square-Law Techniques .....	66
5.2.1	Square-Law Combining .....	66
5.2.2	Square-Law Selection .....	68
5.2.3	Performance Analysis .....	68
5.3	Cooperative Networks .....	70
5.3.1	Data Fusion .....	72
5.3.2	Decision Fusion .....	78
	References .....	82

# Acronyms

ADC	Analog-to-digital converter
AUC	Area under the receiver operating characteristic curve
AWGN	Additive white Gaussian noise
BCED	Blindly combined energy detection
BER	Bit error rate
BSC	Binary symmetric channel
CAUC	Complementary AUC
CCI	Co-channel interference
CDF	Cumulative distribution function
CLT	Central limit theorem
CSCG	Circularly symmetric complex Gaussian
CSI	Channel-state information
DSA	Dynamic spectrum access
EGC	Equal gain combining
ENP	Estimated noise power
FCC	Federal Communications Commission
FDMA	Frequency division multiple access
GGN	Generalized Gaussian noise
GMN	Gaussian mixture noise
ICA	Independent component analysis
i.i.d.	Independent and identically distributed
LLR	Log-likelihood ratio
LTE	Long term evolution
MG	Mixture gamma
MGF	Moment generating function
MIMO	Multiple-input multiple-output
MRC	Maximal ratio combining
OFDM	Orthogonal frequency division multiplexing
PDF	Probability density function
PSK	Phase shift keying
ROC	Receiver operating characteristic

SC	Selection combining
SLC	Square-law combining
SLS	Square-law selection
SNR	Signal-to-noise ratio
SPRT	Sequential probability ratio test
SUN	Smart utility networks
TDMA	Time division multiple access
TV	Television
WiMAX	Worldwide interoperability for microwave access
WLAN	Wireless local area network
WRAN	Wireless regional area network
