

Biological and Medical Physics, Biomedical Engineering

BIOLOGICAL AND MEDICAL PHYSICS, BIOMEDICAL ENGINEERING

This series is intended to be comprehensive, covering a broad range of topics important to the study of the physical, chemical and biological sciences. Its goal is to provide scientists and engineers with textbooks, monographs, and reference works to address the growing need for information. The fields of biological and medical physics and biomedical engineering are broad, multidisciplinary and dynamic. They lie at the crossroads of frontier research in physics, biology, chemistry, and medicine.

Books in the series emphasize established and emergent areas of science including molecular, membrane, and mathematical biophysics; photosynthetic energy harvesting and conversion; information processing; physical principles of genetics; sensory communications; automata networks, neural networks, and cellular automata. Equally important is coverage of applied aspects of biological and medical physics and biomedical engineering such as molecular electronic components and devices, biosensors, medicine, imaging, physical principles of renewable energy production, advanced prostheses, and environmental control and engineering.

Editor-in-Chief

Bernard S. Gerstman, Department of Physics, Florida International University, Miami, FL, USA

Series Editors

Masuo Aizawa, Tokyo Institute Technology, Tokyo, Japan

Robert H. Austin, Princeton, NJ, USA

James Barber, Wolfson Laboratories, Imperial College of Science Technology, London, UK

Howard C. Berg, Cambridge, MA, USA

Robert Callender, Department of Biochemistry, Albert Einstein College of Medicine, Bronx, NY, USA

George Feher, Department of Physics, University of California, San Diego, La Jolla, CA, USA

Hans Frauenfelder, Los Alamos, NM, USA

Ivar Giaever, Rensselaer Polytechnic Institute, Troy, NY, USA

Pierre Joliot, Institute de Biologie Physico-Chimique, Fondation Edmond de Rothschild, Paris, France

Lajos Keszthelyi, Biological Research Center, Hungarian Academy of Sciences, Szeged, Hungary

Paul W. King, Biosciences Center and Photobiology, National Renewable Energy Laboratory, Lakewood, CO, USA

Gianluca Lazzi, University of Utah, Salt Lake City, UT, USA

Aaron Lewis, Department of Applied Physics, Hebrew University, Jerusalem, Israel

Stuart M. Lindsay, Department of Physics and Astronomy, Arizona State University, Tempe, AZ, USA

Xiang Yang Liu, Department of Physics, Faculty of Sciences, National University of Singapore, Singapore, Singapore

David Mauzerall, Rockefeller University, New York, NY, USA

Eugenie V. Mielczarek, Department of Physics and Astronomy, George Mason University, Fairfax, USA

Markolf Niemz, Medical Faculty Mannheim, University of Heidelberg, Mannheim, Germany

V. Adrian Parsegian, Physical Science Laboratory, National Institutes of Health, Bethesda, MD, USA

Linda S. Powers, University of Arizona, Tucson, AZ, USA

Earl W. Prohofsky, Department of Physics, Purdue University, West Lafayette, IN, USA

Tatiana K. Rostovtseva, NICHD, National Institutes of Health, Bethesda, MD, USA

Andrew Rubin, Department of Biophysics, Moscow State University, Moscow, Russia

Michael Seibert, National Renewable Energy Laboratory, Golden, CO, USA

Nongjian Tao, Biodesign Center for Bioelectronics, Arizona State University, Tempe, AZ, USA

David Thomas, Department of Biochemistry, University of Minnesota Medical School, Minneapolis, MN, USA

Contents

Part I RNA Binding Proteins

1	How Proteins Recognize RNA	3
	Rajan Lamichhane	
1.1	Introduction	3
1.2	RNA-Binding Proteins Are Modular	8
1.3	Single-Stranded RNA Recognition	9
1.4	Double-Stranded RNA Recognition	13
1.5	SAM-Binding Domain	15
1.6	Protein–RNA Interactions in the Ribosome	15
1.7	Conclusions	16
	References	16
2	The Interaction Between L7Ae Family of Proteins and RNA Kink Turns	23
	Lin Huang and David M. J. Lilley	
2.1	Introduction	23
2.2	The Structure of K-Turns in RNA	25
2.3	The L7Ae Family of Proteins and Their Cellular Roles	26
2.4	The Molecular Recognition of K-Turns by L7Ae-Family Proteins	26
2.5	L7Ae-Family Proteins Bind k-Turns with High Affinity, Generating the Kinked Conformation	28
2.6	The Manner of K-Turn Folding Resulting from the Binding of L7Ae-Family Proteins	29
2.7	Modulation of L7Ae-Family Protein Binding and k-Turn Folding by N ⁶ -Methylation of Adenine	31
2.8	L7Ae-Bound K-Turns in Nanoconstruction	33
2.9	Summary	34
	References	34

3	Evolving Methods in Defining the Role of RNA in RNP Assembly	39
	Jaya Sarkar, Jong Chan Lee and Sua Myong	
3.1	Introduction	39
3.2	Current Methods in Probing RNP Granules: Strengths and Limitations	44
3.3	Methods to Probe Initial Phases of RNP Assembly	46
3.4	Concluding Thoughts	53
	References	53
4	Single-Molecule Studies of Exonucleases: Following Cleavage Actions One Step at a Time	57
	Gwangrog Lee	
4.1	Introduction	57
4.2	Single-Molecule Methods to Study Nuclease Mechanisms	58
4.3	Molecular Bases of Nucleic Acid Degradation by Nucleases	63
4.4	Conclusions	78
	References	78
5	Fitting in the Age of Single-Molecule Experiments: A Guide to Maximum-Likelihood Estimation and Its Advantages	85
	Behrouz Eslami-Mosallam, Iason Katechis and Martin Depken	
5.1	Introduction	85
5.2	Prerequisites	86
5.3	Maximum Likelihood	90
5.4	Comparing LS and ML Through Simulations	96
5.5	Fitting Experimental Data	100
5.6	Conclusion	103
	References	104
Part II Transcription and Translation		
6	A Single-Molecule View on Cellular and Viral RNA Synthesis	109
	Eugen Ostrofet, Flavia Stal Papini, Anssi M. Malinen and David Dulin	
6.1	Introduction	109
6.2	In Vitro Single-Molecule Studies of Cellular RNAPs	111
6.3	In Vitro Single-Molecule Studies of Viral RNA-Dependent RNA Polymerases	126
6.4	Perspective	133
	References	133

7	Single-Molecule Optical Tweezers Studies of Translation	143
	Xiaohui Qu	
7.1	Introduction	143
7.2	The Single-Molecule Optical Tweezers Technique	144
7.3	mRNA Structure Disruption in Translation Initiation.	147
7.4	The Decoding Process.	150
7.5	Interactions Between Nascent Polypeptide and Ribosome	159
7.6	Concluding Remarks.	160
	References	161
	Part III RNA-Guided Protein Machineries	
8	Biophysical and Biochemical Approaches in the Analysis of Argonaute–MicroRNA Complexes	167
	Sujin Kim and Yoosik Kim	
8.1	Introduction	167
8.2	Functional Domains of Ago	168
8.3	Assembly of Ago–MiRNA Complex	171
8.4	Target Recognition by Minimal RISC	173
8.5	Implications of the Sub-seed Region: 1-D Target Search	176
8.6	Toward Target Cleavage	179
8.7	Concluding Remarks.	181
	References	183
9	Biophysics of RNA-Guided CRISPR Immunity	189
	Luuk Loeff and Chirlmin Joo	
9.1	Introduction	189
9.2	Target Search	193
9.3	crRNA-DNA Duplex Formation	196
9.4	Conformational Dynamics of CRISPR Effector Complexes	198
9.5	CRISPR-Mediated DNA Degradation.	201
9.6	Outlook	205
	References	205
10	Dynamics of MicroRNA Biogenesis	211
	Mohamed Fareh	
10.1	Introduction	211
10.2	Genomic Architecture and Transcription Regulation of MicroRNA	213
10.3	MicroRNA Processing by Drosha-DGCR8 Complex.	214
10.4	MicroRNA Transport Through the Nuclear Pore Complex	219
10.5	Pre-miRNA Recognition and Processing by Dicer-TRBP	224
10.6	Concluding Remarks.	241
	References	243
