For Nicky

Acknowledgements

Thanks go, first of all, to all at the NCCA Bournemouth, past and present, students and staff. This book is a direct result of teaching and being taught there.

Thanks also go to John Cowell, and Rebecca Mowat and Joanne Cooling at Springer, for their suggestions, editing and help.

Finally, thanks are due to my wife, my friends and my family for their support and patience whilst this book was written.

Contents

1. Basics	1
What Is Maya?	1
How Best to Use This Book	1
The Desired Environment	2
Notes and Notation	2
The Maya Interface	3
The Camera Views	4
Hotkeys	5
The Spacebar and the Hotbox	6
Marking Menus	6
Summary	7
2. Objects, Duplicates and Transforms	9
Introduction	9
A Simple Object	9
Selection Methods	10
The Outliner	10
Shaded and Unshaded Object Display	10
Transformations	11
Transform Manipulators	12
Using the Channels Box for Transformations	14
A Simple Stick Character from Primitives	14
Hiding, Displaying and Templating	19
Summary	19
3. Hierarchies, Groups and Nodes	21
Introduction	21
Hierarchies	21
Groups	24
Node Structures	26
Summary	28
4. Modeling and Surface Creation	29
Introduction	29

Surface Types and Their Components	29
NURBS Modeling	32
Curves	33
NURBS Surface Tools	37
Editing the Final Surface	49
A NURBS Teapot	50
Polygon Modeling	52
A Polygon Teapot	61
Subdivision Surface Modeling	63
A Subdiv Squid	68
Sculpting with Artisan	70
Summary	71
5. Animation	73
Introduction	73
The Animation Environment	73
Keyed Animation	74
Procedural Animation	85
Non-Linear Animation	92
Paths and Constraints	98
Deformers	103
Skeletons, Bones and Joints	121
Binding a Surface to a Skeleton	137
Summary	150
6. Rendering	153
Introduction	153
Lights	153
The IPR Renderer	171
Materials and Shading Groups	172
Textures and Texture Mapping	177
Texturing Polygons	185
Texturing Subdivision Surfaces	190
Texturing Lights and Shadows	190
Utilities	190
Building a Basic Shader	193
Environments	196
Reflection Mapping	198
Backgrounds and Integration	199
Volumes	199
The Renderer	200
Surface Rendering	200
Renderer Effects	204
Summary	206
7. Particle Systems	209
Introduction	209

Emitters, Particle Objects and Fields	209
Collisions	215
Volume Fields and Volume Emitters	217
Emitting from Surfaces and Curves	219
Controlling Emission with Textures	223
Particle Goals	225
Particle Replacement	225
Caching the Scene for Improved Feedback	228
Rendering Particles	230
Summary	241
8. Dynamic Objects	243
Introduction	243
Rigid Body Dynamics	243
Soft Body Dynamics	253
Clip FX	260
Summary	262
9. MEL Scripting	263
Introduction	263
Simple Commands	263
Changing Attributes	265
Writing Scripts	265
The MEL User Interface	273
Summary	281
10. Paint Effects	283
Introduction	283
Painting in 2D	283
Painting in 3D	287
Animating Paint Effects Objects	289
Animating the Growth	291
Rendering	292
Summary	295
11. Integration	297
Introduction	297
The Corridor and Door	297
The Tentacles	301
The Door Animation	302
The Side Tentacle Animation	303
The Main Tentacle Animation	305
Finishing Touches	306
Summary	307
Index	309
