Erfurt, Thüringen, Germany

Although numerous scholars and activists have written academic and popular texts meant to unpack and advocate for humanism and atheism as life orientations, what is needed at this point is clear and consistent attention to the various dimensions of humanist and atheists thought and practice. This is the type of focused agenda that this book series makes possible. Committed to discussions that include but extend well beyond the United States, books in the series—meant for specialists and a general readership—offer new approaches to and innovative discussions of humanism and atheism that take into consideration the socio-cultural, political, economic, and religious dynamics informing life in the twenty-first century.

## ACKNOWLEDGMENTS

This book is about searching for a meaningful way of life. As a pragmatist scholar, I believe that philosophy is able to contribute to this quest. However, this kind of understanding of what philosophy can (and should) accomplish cannot always be taken for granted within academic circles. This is why I would like to express my great appreciation to the Forschungsinstitut für Philosophie Hannover. Apart from being an excellent place for research, it provided me with the opportunity to explore more practical philosophical spaces. In this spirit, I would like to offer special thanks to Jürgen Manemann for encouraging me to follow rather experimental roads.

The pragmatic tradition is the main resource of my philosophical work, although I have been quite a late adopter. Therefore, I am particularly grateful for the ongoing and thought-provoking conversations with Sami Pihlström, Ulf Zackariasson, Magnus Schlette, and Matthias Jung. Their critical remarks and supportive advice have been of great value in developing and refining my philosophical ideas in the field of pragmatism as well as philosophy of religion.

Furthermore, I received invaluable impulses for thinking about science and democracy from discussions at the meetings of the “Demokratie als Denk- und Lebensform” research group at the FEST Heidelberg and at the Forschungsinstitut für Philosophie Hannover over the course of the past three years. This group gathered many of the finest pragmatic thinkers, and initiated the German Pragmatism Network, promoting pragmatic research in the German-speaking countries. During this process, I had the chance to meet inspiring colleagues, and to benefit greatly from their work.

This book is indebted to many colleagues and audiences. When the Institute for Humanist Studies invited me to the Annual Symposium at Rice University in 2016, I first began to elaborate my ideas on humanism through a pragmatist lens. Early versions of the chapters of this book have been presented at a variety of academic conferences and workshops as well as public lectures. The feedback from various disciplines and perspectives invited me to question my theses and, consequently, rearticulate and complement them. Kim Joris Boström, Dominik Hammer, Greta Jasser, Christof Kalb, Heidi Salaverría, Dennis Stammer, and Katrin Wille carefully read parts of the manuscript. Their comments were vital for clarifying my thoughts and completing the manuscript.

Finally, the challenge of writing a book is not purely of intellectual nature. It can only be met with a sympathetic environment. I am grateful for being accompanied by the most supportive fellow human beings. Ian Kaplow and Stefan Riepe kept me going and my spirit up in every sense—thank you.
