Preface

The book series Neuroscience and Respiration presents contributions by expert researchers and clinicians in the multidisciplinary areas of medical research and clinical practice. Particular attention is focused on pulmonary disorders as the respiratory tract is up front at the first line of defense for organisms against pathogens and environmental or other sources of toxic or disease-causing effects. The articles provide timely overviews of contentious issues or recent advances in the diagnosis, classification, and treatment of the entire range of diseases and disorders, both acute and chronic. The texts are thought as a merger of basic and clinical research dealing with biomedicine at both the molecular and functional levels and with the interactive relationship between respiration and other neurobiological systems, such as cardiovascular function, immunogenicity, endocrinology and humoral regulation, and the mind-to-body connection. The authors focus on modern diagnostic techniques and leading-edge therapeutic concepts, methodologies, and innovative treatments. Neuromolecular and carcinogenetic aspects relating to gene polymorphism and epigenesis as well as practical, data-driven options to manage patients also are addressed.

Body functions, including lung ventilation and its regulation, are ultimately driven by the brain. However, neuropsychological aspects of disorders are still mostly a matter of conjecture. After decades of misunderstanding and neglect, emotions have been rediscovered as a powerful modifier or even the probable cause of various somatic disorders. Today, the link between stress and health is undeniable. Scientists accept a powerful psychological connection that can directly affect our quality of life and health span.

Clinical advances stemming from molecular and biochemical research are but possible if research findings are translated into diagnostic tools, therapeutic procedures, and education, effectively reaching physicians and patients. All this cannot be achieved without a multidisciplinary, collaborative, bench-to-bedside approach involving both researchers and clinicians. The role of science in shaping medical knowledge and transforming it into practical care is undeniable.

Concerning respiratory disorders, their societal and economic burden has been on the rise worldwide, leading to disabilities and shortening of life-span. Chronic obstructive pulmonary disease and sleep apnea syndrome are cases in point. Concerted efforts are required to improve this situation, and part of those efforts are gaining insights into the underlying mechanisms of disease and staying abreast with the latest developments in diagnosis and treatment regimens. It is hoped that the articles published in this series will assume a leading position as a source of information on interdisciplinary medical research advancements, addressing the needs of medical professionals and allied health-care workers, and become a source of reference and inspiration for future research ideas.

I would like to express my deep gratitude to Paul Roos, and Cynthia Kroonen of Springer Nature NL for their genuine interest in making this scientific endeavor come through and in the expert management of the production of this novel book series.

Contents

Effects of Exposure to Carbon Dioxide in Potash Miners	1
Christian Monsé, Birger Jettkant, Bernd Karl Heinrich Schramm, Horst Christoph Broding, Matthias Knappe, Manfred Michl, Frank Hoffmeyer, Kirsten Sucker, Thomas Brüning, and Jürgen Bünger	
B Cell-Attracting Chemokine-1 and Progranulin in Bronchoalveolar Lavage Fluid of Patients with Advanced Non-small Cell Lung Cancer: New Prognostic Factors	11
W. Naumnik, B. Panek, M. Ossolińska, and B. Naumnik	
Paraoxonase 1 Gene L55M Polymorphism and Paraoxonase 1 Activity in Obstructive Sleep Apnea Patients	17
A. Pióciniczak, A. Baszczuk, A. Ludziejewska, H. Winiarska, S. Michalak, G. Kasprzak, D. Formanowicz, S. Cofta, and E. Wysocka	
Adaptation to Hypoxia in Sleep Apnea Patients: Multifaceted Mechanisms	25
Maciej Śmietanowski, Jarosław Wysocki, Jarosław Balcerzak, Agnieszka Cudnoch-Jędrzejewska, Maryla Śmietanowska, and Kazimierz Niemczyk	
Mandibular Advancement Devices in Obstructive Sleep Apnea Patients Intolerant to Continuous Positive Airway Pressure Treatment	35
M. Wojda, J. Kostrzewa-Janicka, P. Śliwiński, P. Bieleń, P. Jurkowski, R. Wojda, and E. Mierzwińska-Nastalska	
Simvastatin Therapy and Bronchoalveolar Lavage Fluid Biomarkers in Chronic Obstructive Pulmonary Disease	43
Iwona Patyk, Cezary Rybacki, Agata Kalicka, Agnieszka Rzeszutarska, Jolanta Korsak, and Andrzej Chciałowski	
Influence of Socio-Economic Status on Lung Function in Male Adolescents in Tanzania	53
Ewa Rębacz-Maron, Anna Stangret, and Iwona Teul	

Unmet Needs and Pro-health Behavior in Patients with Chronic Respiratory Diseases	69
M. Duda-Sikula, B. Mroczek, A. Szewczyk, and D. Kurpas	
Circulation of Influenza Virus in the 2015/2016 Epidemic Season in Poland: Serological Evaluation of Anti-hemagglutinin Antibodies	77
D. Kowalczyk, K. Szymański, K. Cieślak, E. Hallmann-Szelińska, and L. B. Brydak	
Respiratory Viruses in Different Provinces of Poland During the Epidemic Season 2016/2017	83
K. Szymański, K. Cieślak, D. Kowalczyk, E. Hallmann-Szelińska, and L. B. Brydak	
Index	89
