

Palgrave Studies in Economic History

Series Editor

Kent Deng

London School of Economics

London, UK

Palgrave Studies in Economic History is designed to illuminate and enrich our understanding of economies and economic phenomena of the past. The series covers a vast range of topics including financial history, labour history, development economics, commercialisation, urbanisation, industrialisation, modernisation, globalisation, and changes in world economic orders.

Acknowledgements

The research underlying this book would not have been possible without the economic support from Jan Wallanders och Tom Hedelius Stiftelse, Stiftelsen för Ekonomisk Forskning i Västsverige and strategic funding from the School of Business, Economics and Law at Gothenburg University.

The research would likewise not have been possible without access to primary sources in the archives. We would therefore like to thank all the staff at the London Guildhall Archive, as well as Julia Woolcott, archivists at the Barloworld Limited company archive.

A couple of research assistants have furthermore been most helpful for different parts of this research project: Jens Boberg (Chap. 5), Young Jang (Chap. 8), Stefan Hagberg (Chap. 12), Laura Phillips (Chap. 12), Dimitrios Theodoridis (Chap. 14) and Stefania Galli (Chap. 14). We thank you all for your assistance to this work.

A number of scholars that we have been in contact with over the years have generously shared their respective expertise with us, providing us crucial feedback on sources, the methods employed or the results we arrived at. We would therefore like to thank Johan Fourie, Jeremy Mouat, Arn Keeling, Mark Hendrickson, Fredric Quivik, Kip Curtis and John Turner for their help as well as participants in the audience at several conferences where parts of this research have been presented, including conferences organized by the African Economic History Network,

European Business History Conference, the European Historical Economics Society, Ekonomisk-Historiska Mötet and the LEAP-seminar at Stellenbosch University. We would also like to thank Moritz Schularick who generously shared data from his research with us.

Most importantly, we would like to extend our deepest gratitude to a number of scholars who generously shared their expertise with us by reading selected draft chapters of this book and providing much valuable feedback. This helped us develop these chapters substantially. Thank you to Tinashe Nyamunda, Robert L. Tignor, Charles Harvey, Gareth Austin, Sarah Stockwell, Mariusz Lukasiewicz, Ed Kerby, Grietjie Verhoef, Staffan Granér, Birgit Karlsson and Susanna Fellman. All remaining errors are, naturally, our responsibility.

List of Figures

Fig. 2.1	British investments in mining by region, 1865–1914 (percentage of total capital called). Source: Stone (1999, table 57)	29
Fig. 2.2	Capital exports from the United Kingdom to the British Empire and to countries outside the British Empire, by year, 1865–1914 (£000 sterling, current prices). Source: Stone (1999, table 33–34)	31
Fig. 5.1	Number of companies in the African Colonial Equities Database, by year, 1869–1969. Source: African Colonial Equities Database (ACED)	82
Fig. 6.1	Market capitalization in the African Colonial Equities Database, by year and region, 1869–1969 (£ million, constant 1868 prices). Source: African Colonial Equities Database (ACED). Note: market capitalization calculated for the month of December every year of observation. East African investments are too small to be clearly discernible in the figure	102
Fig. 6.2	Three-firm concentration ratio of the market capitalization in the African Colonial Equities Database, by year and region, 1869–1969 (per cent, nine-year moving averages). Source: African Colonial Equities Database (ACED)	105
Fig. 6.3	Histogram of the nominal average return on investment in individual companies in Africa, 1869–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED)	108

Fig. 6.4	Nominal and real return on investment in Africa, by decade, 1869–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED)	109
Fig. 6.5	Accumulated return on investment in Africa, by year and region, 1869–1969 (index 1868 = 100, logarithmic scale). Source: African Colonial Equities Database (ACED)	111
Fig. 6.6	Nominal return on British investments in South Africa compared to previous research, by decade, 1900–1969 (geometric mean per year). Source: Our estimates based on African Colonial Equities Database (ACED); Dimson et al.’s estimate based on (Dimson et al. 2002, table 28-2)	114
Fig. 6.7	Nominal return on British and South African investments in South African gold mining compared to previous research, by year, 1919–1962. Source: Our estimates based on African Colonial Equities Database (ACED); Frankel’s estimate based on (Frankel 1967, appendix C, Table 6)	117
Fig. 6.8	Nominal return on investment in Belgian Congo compared to previous research, by year, 1889–1962. Source: Our estimates based on African Colonial Equities Database (ACED); Buelens & Marysse’s estimates from (Buelens and Marysse 2009, appendix 1)	118
Fig. 6.9	Real return on investment in Africa compared to previous research on British foreign investments, by year, 1862–1913 (five year moving average). Source: Our estimates based on African Colonial Equities Database (ACED); Edelstein’s estimates from (Edelstein 1976, appendix 3); Davis & Huttenback’s estimates extracted from the data in (Davis and Huttenback 1986, chart 3.1)	120
Fig. 6.10	Real return on investment in Africa compared to previous research on investments in the UK, by decade, 1870–1969 (geometric mean per year). Source: Our estimates based on African Colonial Equities Database (ACED); Edelstein’s figures based on (Edelstein 1976, appendix 3); Dimson et al.’s figures based on (Dimson et al. 2002, Table 32–2). Note: Dimson et al.’s figures have here been adjusted by using the same data for UK inflation rate as is used throughout this study, so that any differences due to different estimates of the inflation rate are eliminated	121

- Fig. 7.1 Return on investment in Africa, by year and decade, 1869–1969 (per year and geometric mean by decade). Source: African Colonial Equities Database (ACED). Note: The y-axis is truncated at +60 per cent to show fluctuations throughout the period more clearly, so the outlier in the year 1881 (+118 per cent) is not visible in the figure 126
- Fig. 7.2 Average nominal return on investment in Africa in relation to the number of years present in the sample, by company, 1869–1969. Source: African Colonial Equities Database (ACED). Note: the x-axis is truncated at +100 per cent. Four outliers are therefore excluded from the figure. All of these outliers were present only one year in our sample before they disappear again 134
- Fig. 7.3 Survival estimates of African companies traded on the London Stock Exchange, 1869–1969. Source: African Colonial Equities Database (ACED). Note: The figure also shows censored observations 136
- Fig. 8.1 Price quotations of the Suez Canal Company on the London and Paris Stock Exchanges, by month, 1862–1969 (£ sterling, current prices, logarithmic scale). Source: African Colonial Equities Database (ACED) and (Bonin 2010, tables 22–24) 153
- Fig. 8.2 Real return on investment in North Africa, by decade, 1869–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED) 170
- Fig. 9.1 Real return on investment in West Africa, by decade, 1869–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED) 200
- Fig. 10.1 Real return on investment in Central/Southern Africa, by decade, 1869–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED) 228
- Fig. 11.1 Real return on investment in South Africa, by decade, 1869–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED) 266
- Fig. 12.1 Price quotations for the Rand Mines Limited in London, by month, 1893–1904 (£ sterling, current prices). Source: Letters (February 1893–February 1894), *Financial Times* (FT) (March 1894–May 1895), African Colonial Equities Database (ACED) (June 1895–December 1904). Note: The time series

- has been adjusted for the split of the stock in 1901. The series are interpolated February 1893 to February 1894 based on letters found in March 1893, June 1893, December 1893 and February 1894) 297
- Fig. 13.1 Price quotations for Egyptian equity on the London Stock Exchange, by month, 1870–1885 (index 1881 m1 = 100, current prices). Source: African Colonial Equities Database (ACED) 312
- Fig. 13.2 Accumulated return on investment in Egypt, by month, 1874–1890 (index, January 1882 = 100, logarithmic scale). Source: African Colonial Equities Database (ACED) 316
- Fig. 13.3 Accumulated return on investment in South Africa, by month, 1895–1905 (index, September 1899 = 100). Source: African Colonial Equities Database (ACED). Note: The shaded area shows the period of the South African War, from October 1899 to May 1902 318
- Fig. 13.4 Accumulated return on investment for the British South Africa and Royal Niger Companies during chartered and post-chartered periods, by year, 1883–1965 (index, year chartered ended = 100, logarithmic scale). Source: African Colonial Equities Database (ACED). Note: In the case of RNC, 1899 is treated as the last year of the charter, whereas in the case of BSAC, 1923 is treated as the last year of the charter, as the charter in the latter case was revoked effectively first by the end of the year 322
- Fig. 13.5 Accumulated return on investment by type of colony, by year, 1869–1969 (index, 1868 = 100). Source: African Colonial Equities Database (ACED) 324
- Fig. 13.6 Accumulated return on investment prior to and following political independence in Egypt, Ghana and Nigeria, by year (index, year of independence = 100, logarithmic scale). Source: African Colonial Equities Database (ACED) 329
- Fig. 13.7 Accumulated return on investment prior to and following political independence in Belgian Congo, Zambia and Southern Rhodesia, by year (index, year of independence = 100, logarithmic scale). Source: African Colonial Equities Database (ACED). Note: All data are for portfolios representing all equity investments in each respective colony/

- country, except in the case of Belgian Congo, which is based on the sole company of Tanganyika Concessions. As was shown in Fig. 6.8, the return on investment in this particular company seems to match the return on investment for the Belgian portfolio of investments studied by Buelens and Marysse quite well 331
- Fig. 14.1 Market capitalization of companies in the Global Mining Equities Database, by continent of operation, 1869–1929 (£ million, constant 1868 prices). Source: Global Mining Equities Database (GMED) 340
- Fig. 14.2 Market capitalization of companies in the Global Mining Equities Database, by continent of operation, 1930–1969 (£ million, constant 1868 prices). Source: Global Mining Equities Database (GMED) 342
- Fig. 14.3 Relative market capitalization of companies in the Global Mining Equities Database operating in British colonies, 1869–1969 (per cent of market capitalization of all companies in the database). Source: Global Mining Equities Database (GMED) 342
- Fig. 14.4 Ore grades of gold mining in selected parts of the world, 1886–1969 (ounce gold per metric ton ore, weighted averages by year). Sources: for Ghana: (Afrifa-Taylor 2006, appendix 3); for South Africa: (Charles Sidney Goldmann (1895) *South African Mines: Their Position, Results & Developments*. London: Effingham Wilson & Co.; Notes and Proceedings of the House of Assembly; Vol. V, Colonial and Provincial Papers Transvaal; Mining Engineer, report for the year ending 30th June 1910, table 13; Annual report of Mining Engineer 1947, table 10; Annual report of Mining Engineer 1965, unnumbered table); for Canada: (Geological Survey of Canada. Annual Report 1886–1905; A General Summary of the Mineral Production of Canada 1910–1917); for Australia: (A Statistical Account of the Seven Colonies of Australasia, 1897–1898; The Wealth and Progress of New South Wales 1887–1901; Statistical Register of the Colony of Western Australia 1899–1905; Report of the Department of Mines, Western Australia, Mining Statistics 1906–1970); for Colorado and South Dakota in the United States: (Mineral

- Resources of the US 1904–1928; United States Bureau of Mines—Minerals Yearbook 1932–1969). Note: The data from Ghana is based on only one company, the major producer Ashanti Goldfields 344
- Fig. 14.5 Average annual real return on investment in mining, by decade and continent of operations, 1869–1969 (geometric mean per year). Source: Global Mining Equities Database (GMED) 349
- Fig. 14.6 Real return on investment in mining in Africa, by decade and by type of ore mined, 1869–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED) 365
- Fig. 14.7 Return on investment in South African gold mining and ore grade of the gold deposits mined, by decade, 1886–1969 (geometric mean per year). Source: African Colonial Equities Database (ACED) and Fig. 14.4 368
