Contents

1 Introduction: Problem Solving and the Curriculum	1
Background	1
The Case for Problem Solving Within the Curriculum	1
The Focus on Post-16 Physics	2
A Critical Realist Approach	3
The Specifics of the Study	3
References	4
2 What We Know from the Literature	7
What Are Problems in Physics?	7
The Process of Problem Solving	8
Expert and Novice Approaches to Problem Solving	8
Metacognition During Problem Solving	12
Philosophical and Theoretical Perspectives for Developing Physics Problem Solving	14
Critical Realism and Problem-Solving Instruction	14
Sociocultural Theory: A Sociogenetic Perspective on Learning and Problem Solving	17
Physics Problem-Solving Strategy Instruction: A Sociocultural Approach	18
The Mechanisms Triggered During Intervention and the Importance of Contexts	19
A Sociogenetic Perspective: Social Cognitive Theory	20
Key Mechanisms from a Social Cognitive Theory Perspective	21
Developing Problem-Solving Competences from a Social Cognitive Theory Perspective	23
Problem Solving from a Cognitive Information Processing Perspective	25
The Working Memory Model and Problem Solving	26
The Mechanisms to Trigger in Problem Solving: An Information Processing Perspective	27

Strategies to Increase Physics Problem-Solving Competence:	
An Information Processing Perspective	29
An Emerging Framework for Physics Problem Solving	32
Statement of the Problem and the Study's Research Aims	32
References	34
3 The Study	41
A Critical Realist Methodology	41
The Critical Realist Grounded Research Study	43
The Context and the Participants	44
Ethical Issues	45
The Intervention Phases	47
The Pre-intervention Phase	47
The First Intervention Phase	48
The Second Intervention Phase	48
The Qualitative Methodological Approach	50
Data Collection Methods	50
Data from Examination Scripts	55
Videos for the Individual and Collaborative Physics Problem-Solving Sessions	55
References	56
4 The Findings	59
Research Question 1	60
Exam Script Analysis	60
Exam Script Analysis: A Thematic Approach	60
Findings from the G481 Scripts and Research Question 1	63
Exam Script Analysis: A Qualitative Content Analysis Approach	69
Video Data Analysis	74
Analysing the Video Data for Cognitive-Metacognitive Processes	75
Analysis of the Individual Problem-Solving Videos	81
Framework for Analysis of Collaborative Competences During CGPS	81
Theoretical Background	81
The CGPS Data Analysis Framework	83
Analysis of CGPS Videos	87
Assessing Self-efficacy	87
Results of Video and Audio Data for Each Student	87
Findings for Jamal	88
End of the First Intervention Cycle	90
Exit Data	92
Findings for Mik	96
Self-efficacy	100

Findings for Sue	106
Findings for Nik	112
References	123
5 Discussion and Implications	125
Overview of the Study	125
The First Research Question	126
The Second Research Question	130
The Good Mathematician with a Physics Target Grade of B: Jamal	130
The Slow Worker, with a Physics Target Grade of C: Mik From a Routine Problem Solver to a Highly Efficacious Collaborator: Sue	132
From the Near Drop-Out to the Diligent and Focussed Collaborator: Nik	133
Summary in Response to Research Question 2	134
A Critical Realist Interpretation of the Results	136
Limitations of the Study	136
Implications for Research	138
Implications for Practice	139
References	140
