

Studies in Computational Intelligence

Volume 875

Series Editor

Janusz Kacprzyk, Polish Academy of Sciences, Warsaw, Poland

The series “Studies in Computational Intelligence” (SCI) publishes new developments and advances in the various areas of computational intelligence—quickly and with a high quality. The intent is to cover the theory, applications, and design methods of computational intelligence, as embedded in the fields of engineering, computer science, physics and life sciences, as well as the methodologies behind them. The series contains monographs, lecture notes and edited volumes in computational intelligence spanning the areas of neural networks, connectionist systems, genetic algorithms, evolutionary computation, artificial intelligence, cellular automata, self-organizing systems, soft computing, fuzzy systems, and hybrid intelligent systems. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution, which enable both wide and rapid dissemination of research output.

The books of this series are submitted to indexing to Web of Science, EI-Compendex, DBLP, SCOPUS, Google Scholar and Springerlink.

Dr. Deepak Gupta would like to dedicate this book to his father Sh. R. K. Gupta, his mother Smt. Geeta Gupta, his mentors Dr. Anil Kumar Ahlawat, Dr. Arun Sharma for their constant encouragement, his family members including his wife, brothers, sisters, kids, and to my students close to my heart.

Prof. (Dr.) Aboul Ella Hassanien would like to dedicate this book to his beloved wife Azza Hassan El-Saman.

Dr. Ashish Khanna would like to dedicate this book to his mentors Dr. A. K. Singh and Dr. Abhishek Swaroop for their constant encouragement and guidance and his family members including his mother, wife and kids. He would also like to dedicate this work to his (Late) father Sh. R. C. Khanna with folded hands for his constant blessings.

Preface

We hereby are delighted to launch our book entitled *Advanced Computational Intelligence Techniques for Virtual Reality in Healthcare*. This volume is able to attract a diverse range of engineering practitioners, academicians, scholars, and industry delegates, with the reception of abstracts from different parts of the world. Around 25 full-length chapters have been received. Among these manuscripts, 11 chapters have been included in this volume. All the chapters submitted were peer-reviewed by at least two independent reviewers, who were provided with a detailed review proforma. The comments from the reviewers were communicated to the authors, who incorporated the suggestions in their revised manuscripts. The recommendations from two reviewers were taken into consideration while selecting chapters for inclusion in the volume. The exhaustiveness of the review process is evident, given a large number of articles received addressing a wide range of research areas. The stringent review process ensured that each published chapter met the rigorous academic and scientific standards.

We would also like to thank the authors of the published chapters for adhering to the time schedule and for incorporating the review comments. We wish to extend my heartfelt acknowledgment to the authors, peer reviewers, committee members, and production staff whose diligent work put shape to this volume. We especially want to thank our dedicated team of peer reviewers who volunteered for the arduous and tedious step of quality checking and critique on the submitted chapters.

Lastly, we would like to thank Springer for accepting our proposal for publishing the volume titled *Advanced Computational Intelligence Techniques for Virtual Reality in Healthcare*.

About This Book

Advanced Computational Intelligence Techniques for Virtual Reality in Healthcare addresses the difficult task of integrating computational techniques with virtual reality and healthcare.

The book presents world of virtual reality in healthcare, cognitive and behavioral training, understand mathematical graphs, human–computer interaction, fluid dynamics in healthcare industries, accurate real-time simulation, healthcare diagnostics, and so on.

By presenting the computational techniques for virtual reality in healthcare, this book teaches readers to use virtual reality in healthcare industry, thus providing a useful reference for educational institutes, industry, researchers, scientists, engineers, and practitioners.

Contents

World of Virtual Reality (VR) in Healthcare	1
Bright Keswani, Ambarish G. Mohapatra, Tarini Ch. Mishra, Poonam Keswani, Pradeep Ch. G. Mohapatra, Md Mobin Akhtar and Prity Vijay	
1 Introduction	2
2 Virtual Reality Application in Medicine	5
2.1 Medical Teaching and Training	6
2.2 Medical Treatment	7
2.3 Experimenting Medicine Composition	9
3 Key Research Opportunities in Medical VR Technology	10
4 Computational Intelligence for Visualization of Useful Aspects	15
4.1 General Guidelines for Patient Care	16
5 Surgical VR and Opportunities of CI	16
5.1 The JIGSAWS Model	17
6 Human Computer Interface in CI Based VR	17
6.1 Computer-Aided Design (CAD) Repairing Imitated Model (Design for Artificial Body Part)	19
6.2 Test and Treatment for Mental Sickness	19
6.3 Improvement for Treatment Safety	19
7 Advantages of VR Techniques	19
8 Conclusion	20
References	20
Towards a VIREAL Platform: Virtual Reality in Cognitive and Behavioural Training for Autistic Individuals	25
Sahar Qazi and Khalid Raza	
1 Introduction	26
1.1 VIREAL: Decoding the Terminology	27
1.2 Historical Background of VIREAL	28
1.3 Day-to-Day Applications of VIREAL	29

- 2 Autism and VIREAL 30
 - 2.1 Common Teaching Techniques for Autistic Children 32
 - 2.2 Qualitative and Quantitative Teaching Method – PECS 33
 - 2.3 From VIREAL Toilets to Classroom: VR Design and Analysis 34
- 3 Social and Parental Issues Related to VIREAL 34
- 4 Computational Intelligence in VIREAL Platforms 36
 - 4.1 Where Do VIREAL and Machine Learning Intersect? 37
 - 4.2 SLAM for VIREAL Environments 38
 - 4.3 VIREAL on Mobile: Mobile App Developments for Autism 39
 - 4.4 Mind Versus Machine: Practicality of AI in Autism 39
 - 4.5 Limitations of Computational Intelligence in VIREAL 41
- 5 Future Perspectives 41
- 6 Conclusion 42
- References 44

Assisting Students to Understand Mathematical Graphs Using Virtual Reality Application 49

Shirsh Sundaram, Ashish Khanna, Deepak Gupta and Ruby Mann

- 1 Introduction 49
 - 1.1 Applications 50
 - 1.2 Scope of VR in Education 51
- 2 Literature Review 51
- 3 Methodology 53
- 4 Implementation 55
- 5 Results and Discussions 57
- 6 Conclusion and Future Scope 61
- References 61

Short Time Frequency Analysis of Theta Activity for the Diagnosis of Bruxism on EEG Sleep Record 63

Md Belal Bin Heyat, Dakun Lai, Faijan Akhtar, Mohd Ammar Bin Hayat and Shajan Azad

- 1 Introduction 63
- 2 Stages of Sleep 64
 - 2.1 Non-rapid Eye Movement (NREM) 64
 - 2.2 Rapid Eye Movement (REM) 65
- 3 History of Sleep Disorder 65
 - 3.1 Classification of Sleep Disorder 66
- 4 Electroencephalogram (EEG) Signal 69
 - 4.1 EEG Generation 70
 - 4.2 Classification of EEG Signal 70

5 Subject Details and Methodology 71
 5.1 Welch Method 71
 5.2 Hamming Window 72
 6 Analysis of the EEG Signal 72
 7 Results 78
 8 Future Scope of the Proposed Research 80
 9 Conclusion 80
 References 80

Hand Gesture Recognition for Human Computer Interaction and Its Applications in Virtual Reality 85

Sarthak Gupta, Siddhant Bagga and Deepak Kumar Sharma

1 Introduction 86
 2 Process of Hand Gesture Recognition 87
 2.1 Hand Segmentation 88
 2.2 Contour Matching 89
 2.3 Hand Tracking 90
 2.4 Feature Extraction 91
 3 Latest Research in Hand Gesture Recognition 91
 4 Applications of Virtual Reality and Hand Gesture Recognition in Healthcare 93
 5 Hand Gesture Recognition Techniques 96
 5.1 Detection 96
 5.2 Tracking 98
 5.3 Recognition 98
 6 Further Challenges 101
 7 Conclusion 102
 References 103

Fluid Dynamics in Healthcare Industries: Computational Intelligence Prospective 107

Vishwanath Panwar, Sampath Emani, Seshu Kumar Vandrangi, Jaseer Hamza and Gurunadh Velidi

1 Introduction 108
 2 A CI Critical Review in Relation to Fluid Dynamics in Healthcare Industries 108
 3 Conclusion 119
 References 119

A Novel Approach Towards Using Big Data and IoT for Improving the Efficiency of m-Health Systems 123

Kamta Nath Mishra and Chinmay Chakraborty

1 Introduction 124
 2 Literature Review 127

- 3 Proposed Architecture of IoT Based m-Health System 130
 - 3.1 IoT Components 130
 - 3.2 The Architecture of the Internet of Things 131
 - 3.3 Proposed Model 132
- 4 Discussions 134
- 5 Conclusions 135
- References 136

Using Artificial Intelligence to Bring Accurate Real-Time Simulation to Virtual Reality 141

Deepak Kumar Sharma, Arjun Khera and Dharmesh Singh

- 1 Introduction 141
- 2 Applications of VR in Healthcare 144
 - 2.1 Medical Education 144
 - 2.2 Surgery Training and Planning 146
 - 2.3 Diagnostics 147
 - 2.4 Treatment of Patients 148
- 3 Rendering in Virtual Reality 149
 - 3.1 Virtual Reality and 3D Game Systems 150
 - 3.2 Human Vision and Virtual Reality 150
 - 3.3 Virtual Reality Graphics Pipeline 152
 - 3.4 Motion to Photons Latency 153
 - 3.5 Improving Input Performance: Using Predictions for Future Viewpoints Estimation 154
 - 3.6 Improving the Rendering Pipeline Performance 156
- References 161

Application of Chicken Swarm Optimization in Detection of Cancer and Virtual Reality 165

Ayush Kumar Tripathi, Priyam Garg, Alok Tripathy, Navender Vats, Deepak Gupta and Ashish Khanna

- 1 Introduction 166
- 2 Background 168
 - 2.1 Machine Learning Methods 168
 - 2.2 Feature Selection 175
 - 2.3 Genetic Algorithm 175
- 3 Methodology 176
 - 3.1 Proposed Chicken Swarm Optimisation 176
 - 3.2 Implementation of the Proposed Method 178
- 4 Results and Discussions 186
- 5 Comparison 186
 - 5.1 Cervical Cancer (Risk Factors) 187
 - 5.2 Breast Cancer (Wisconsin) 188

About the Editors

Dr. Deepak Gupta is Eminent Academician and plays versatile roles and responsibilities juggling between lectures, research, publications, consultancy, community service, Ph.D., and postdoctorate supervision, etc. With 12 years of rich expertise in teaching and two years in industry, he focuses on rational and practical learning. He has contributed massive literature in the fields of human–computer interaction, intelligent data analysis, nature-inspired computing, machine learning, and soft computing. He has served as Editor-in-Chief, Guest Editor, and Associate Editor in SCI and various other reputed journals. He has completed his postdoc from Inatel, Brazil, and Ph.D. from Dr. APJ Abdul Kalam Technical University. He has authored/edited 35 books with national/international-level publishers (Elsevier, Springer, Wiley, Katson). He has published 87 scientific research publications in reputed international journals and conferences including 39 SCI Indexed Journals of IEEE, Elsevier, Springer, Wiley, and many more. He is the convener and organizer of “ICICC” Springer Conference Series.

Dr. Aboul Ella Hassanien is Founder and Head of the Egyptian Scientific Research Group (SRGE) and Professor of Information Technology at the Faculty of Computer and Information, Cairo University. He is Ex-Dean of the faculty of computers and information, Beni Suef University. He has more than 800 scientific research papers published in prestigious international journals and over 30 books covering such diverse topics as data mining, medical images, intelligent systems, social networks, and smart environment. He won several awards including the Best Researcher of the Youth Award of Astronomy and Geophysics of the National Research Institute, Academy of Scientific Research (Egypt, 1990). He was also granted a scientific excellence award in humanities from the University of Kuwait for the 2004 Award and received the superiority of scientific—University Award (Cairo University, 2013). Also, he honored in Egypt as the best researcher in Cairo University in 2013. He was also received the Islamic Educational, Scientific and Cultural Organization (ISESCO) Prize on Technology (2014) and received the State Award for Excellence in Engineering Sciences in 2015. He was awarded the medal of Sciences and Arts of the first class by the President of the Arab Republic of Egypt, 2017.

Dr. Ashish Khanna is a highly qualified individual with around 15 years of rich expertise in teaching, entrepreneurship, and research and development with specialization in Computer Science Engineering Subjects. He received his Ph.D. degree from National Institute of Technology, Kurukshetra. He has completed his M. Tech. in 2009 and B. Tech. from GGSIPU, Delhi, in 2004. He has published many research papers in reputed journals and conferences. He also has papers in SCI and Scopus Indexed Journals including some in Springer Journals. He is Co-author in 10 textbooks of various engineering courses. He is Guest Editor in many special issues of *IGI Global*, *Bentham Science*, and *Inderscience Journals*. He is convener and organizer in ICICC-2018 Springer conference. He is also a successful entrepreneur by originating a publishing house named as “Bhavya Books” having 250 solution books and around 50 textbooks. He has also started a research unit under the banner of “Universal Innovator”.
