

**SpringerBriefs in Applied Sciences
and Technology**

SpringerBriefs present concise summaries of cutting-edge research and practical applications across a wide spectrum of fields. Featuring compact volumes of 50 to 125 pages, the series covers a range of content from professional to academic.

Typical publications can be:

- A timely report of state-of-the art methods
- An introduction to or a manual for the application of mathematical or computer techniques
- A bridge between new research results, as published in journal articles
- A snapshot of a hot or emerging topic
- An in-depth case study
- A presentation of core concepts that students must understand in order to make independent contributions

SpringerBriefs are characterized by fast, global electronic dissemination, standard publishing contracts, standardized manuscript preparation and formatting guidelines, and expedited production schedules.

On the one hand, **SpringerBriefs in Applied Sciences and Technology** are devoted to the publication of fundamentals and applications within the different classical engineering disciplines as well as in interdisciplinary fields that recently emerged between these areas. On the other hand, as the boundary separating fundamental research and applied technology is more and more dissolving, this series is particularly open to trans-disciplinary topics between fundamental science and engineering.

Indexed by EI-Compendex, SCOPUS and Springerlink.

Contents

1	Advanced Operations Management for Complex Systems	
	Analysis: Introduction	1
	References	4
2	Two-Stage Interval Best-Worst Method for Weighting:	
	Prioritization of Influential Factors of Airport Competitiveness	7
	2.1 Introduction	7
	2.2 Two-Stage Interval Best-Worst Method	9
	2.2.1 Traditional Best-Worst Method	10
	2.2.2 Interval Numbers	12
	2.2.3 Two-Stage Interval Best-Worst Method	13
	2.3 Influential Factors of Airport Competitiveness	19
	2.4 Results and Policy Implications	22
	2.5 Conclusions	29
	References	30
3	2-Tuple DEMATEL for Complex Interrelationships Analysis:	
	Barriers Identification, Cause-Effect Analysis and Policy	
	Implications for Sustainable Tourism Industry	33
	3.1 Introduction	33
	3.2 Literature Review	34
	3.3 Methods	35
	3.3.1 Barriers Identification	36
	3.3.2 Definitions and Operations of 2-Tuple Linguistic	
	Variables	37
	3.3.3 Improved DEMATEL	38
	3.4 Results and Discussions	44
	3.5 Policy Implications and Conclusions	54
	References	55

4	Fuzzy Best-Worst Method and Interpretive Structural Modelling for Complex System Analysis: Enablers Analysis for Aviation Maintenance Safety	57
4.1	Introduction	57
4.2	Methods	58
4.2.1	Enablers of Aviation Maintenance Safety	58
4.2.2	Fuzzy Best-Worst Method	60
4.2.3	Fuzzy Best-Worst Network Method	63
4.2.4	Interpretative Structural Modeling	64
4.3	Results and Discussion	67
4.4	Conclusions	77
	References	77
5	Multi-stakeholder Multi-criteria Decision-Making Framework for Sustainability Prioritization: Investigation of the Processes for Sludge-to-Wealth	79
5.1	Introduction	79
5.2	Evaluation Criteria	81
5.3	Methods	82
5.3.1	Preliminaries	82
5.3.2	Multi-stakeholder Intuitionistic Fuzzy AHP Method	85
5.3.3	Multi-stakeholder Intuitionistic Fuzzy Grey Relational Analysis (GRA)	88
5.4	Case Study	90
5.5	Discussion	97
5.6	Conclusion	98
	Appendix	101
	References	102
