

Lecture Notes in Networks and Systems

Volume 283

Series Editor

Janusz Kacprzyk, Systems Research Institute, Polish Academy of Sciences,
Warsaw, Poland

Advisory Editors

Fernando Gomide, Department of Computer Engineering and Automation—DCA,
School of Electrical and Computer Engineering—FEEC, University of Campinas—
UNICAMP, São Paulo, Brazil

Okyay Kaynak, Department of Electrical and Electronic Engineering,
Bogazici University, Istanbul, Turkey

Derong Liu, Department of Electrical and Computer Engineering, University
of Illinois at Chicago, Chicago, USA; Institute of Automation, Chinese Academy
of Sciences, Beijing, China

Witold Pedrycz, Department of Electrical and Computer Engineering,
University of Alberta, Alberta, Canada; Systems Research Institute,
Polish Academy of Sciences, Warsaw, Poland

Marios M. Polycarpou, Department of Electrical and Computer Engineering,
KIOS Research Center for Intelligent Systems and Networks, University of Cyprus,
Nicosia, Cyprus

Imre J. Rudas, Óbuda University, Budapest, Hungary

Jun Wang, Department of Computer Science, City University of Hong Kong,
Kowloon, Hong Kong

The series “Lecture Notes in Networks and Systems” publishes the latest developments in Networks and Systems—quickly, informally and with high quality. Original research reported in proceedings and post-proceedings represents the core of LNNS.

Volumes published in LNNS embrace all aspects and subfields of, as well as new challenges in, Networks and Systems.

The series contains proceedings and edited volumes in systems and networks, spanning the areas of Cyber-Physical Systems, Autonomous Systems, Sensor Networks, Control Systems, Energy Systems, Automotive Systems, Biological Systems, Vehicular Networking and Connected Vehicles, Aerospace Systems, Automation, Manufacturing, Smart Grids, Nonlinear Systems, Power Systems, Robotics, Social Systems, Economic Systems and other. Of particular value to both the contributors and the readership are the short publication timeframe and the world-wide distribution and exposure which enable both a wide and rapid dissemination of research output.

The series covers the theory, applications, and perspectives on the state of the art and future developments relevant to systems and networks, decision making, control, complex processes and related areas, as embedded in the fields of interdisciplinary and applied sciences, engineering, computer science, physics, economics, social, and life sciences, as well as the paradigms and methodologies behind them.

Indexed by SCOPUS, INSPEC, WTI Frankfurt eG, zbMATH, SCImago.

All books published in the series are submitted for consideration in Web of Science.

Editor's Preface

It is a great privilege for us to present the proceedings of the Computing Conference 2021, held virtually on July 15 and 16, 2021.

The conference is held every year to make it an ideal platform for researchers to share views, experiences and information with their peers working all around the world. This is done by offering plenty of networking opportunities to meet and interact with the world-leading scientists, engineers and researchers as well as industrial partners in all aspects of computer science and its applications.

The main conference brings a strong program of papers, posters, videos, all in single-track sessions and invited talks to stimulate significant contemplation and discussions. These talks were also anticipated to pique the interest of the entire computing audience by their thought-provoking claims which were streamed live during the conferences. Moreover, all authors had very professionally presented their research papers which were viewed by a large international audience online.

The proceedings for this edition consist of 235 chapters selected out of a total of 638 submissions from 50+ countries. All submissions underwent a double-blind peer-review process. The published proceedings has been divided into three volumes covering a wide range of conference topics, such as technology trends, computing, intelligent systems, machine vision, security, communication, electronics and e-learning to name a few.

Deep appreciation goes to the keynote speakers for sharing their knowledge and expertise with us and to all the authors who have spent the time and effort to contribute significantly to this conference. We are also indebted to the organizing committee for their great efforts in ensuring the successful implementation of the conference. In particular, we would like to thank the technical committee for their constructive and enlightening reviews on the manuscripts in the limited timescale.

We hope that all the participants and the interested readers benefit scientifically from this book and find it stimulating in the process.

Hope to see you in 2022, in our next Computing Conference, with the same amplitude, focus and determination.

Kohei Arai

Contents

| | |
|---|-----|
| Analytical View on Non-invasive Measurement of Moving Charge by Various Topologies of Wannier Qubit | 1 |
| Krzysztof Pomorski | |
| Multi-population Genetic Algorithm with the Actor Model Approach to Determine Optimal Braking Torques of the Articulated Vehicle | 56 |
| Kornel Warwas and Szymon Tengler | |
| A Novel Three-Way Merge Algorithm for HTML/XML Documents Using a Hidden Markov Model | 75 |
| Nikolaos G. Bakaoukas and Anastasios G. Bakaoukas | |
| Scaling Out Transformer Models for Retrosynthesis on Supercomputers | 102 |
| Joris Mollinga and Valeriu Codreanu | |
| Naming Processes in Multichannels with Beeps in the Weak Model | 118 |
| Layla S. Aldawsari and Tom Altman | |
| Distributed Evolution of Deep Autoencoders | 133 |
| Jeff Hajewski, Suely Oliveira, and Xiaoyu Xing | |
| Computational Power of a Hybrid Algorithm for Solving the Multiple Knapsack Problem with Setup | 154 |
| Samah Boukhari, Isma Dahmani, and Mhand Hifi | |
| Accelerated Quantum Computation based on Quantum Coherent Dynamics of Evanescent Photons in Liquid Water | 169 |
| Luigi Maxmilian Caligiuri | |
| Computer Scientist’s and Programmer’s View on Quantum Algorithms: Mapping Functions’ APIs and Inputs to Oracles | 188 |
| Ilie-Daniel Gheorghe-Pop, Nikolay Tcholtchev, Tom Ritter, and Manfred Hauswirth | |
