Human Medical Research
Contents

1 Introduction ........................................ 1
   Jan Schildmann, Verena Sandow, Oliver Rauprich
   and Jochen Vollmann

Part I Historical and Socio-Cultural Contexts in Medical Research

2 British Responses to Nazi Medical War Crimes .............. 7
   Fiona McClenaghan

3 History and its Relevance in the Development and Teaching
   of Research Ethics ................................... 19
   Rael D. Strous

4 Human Embryo Research and Islamic Bioethics:
   A View from Iran .................................... 29
   Mansooreh Saniei

5 From Farming to Pharming: Transcending of Bodily Existence
   as a Question of Medical Ethics in an Intercultural Context .... 43
   Axel Siegemund

Part II Considerations on Ethical and Legal Regulations
   for Medical Research

6 Rethinking the Therapeutic Obligation in Clinical Research .... 55
   Nunziata Comoretto
Contents

7 Biomedical Research in Developing Countries and International Human Rights Law ......................... 65
Ilja R. Pavone

Tomasz Zimny

9 The Development and Validation of a Guide for Peruvian Research Ethics Committees to Assist in the Review of Ethical-Scientific Aspects of Clinical Trials ....................... 97
Susy Olave Quispe, Dúllo Fuentes Delgado, Gabriela Minaya Martínez, Rosa Surco Ibarra, Martín Yagui Moscoso, Manuel Espinoza Silva, Juan Antonio Senent de Frutos and Nuria Homedes

Part III Conflicts in Medical Research

10 Conflicts of Interest in Medical Research: What can Ethics Contribute? ......................... 117
Verena Sandow, Jan Schildmann and Jochen Vollmann

11 Research Ethics in Genomics Research: Feedback of Individual Genetic Data to Research Participants .......... 127
Annelien L. Bredenoord and Johannes J. M. van Delden

12 Regulating “Higher Risk, No Direct Benefit” Studies with Children: Challenging the US Federal Regulations ....... 137
Anna E. Westra, Jan M. Wit, Rám N. Sukhai and Inez D. de Beaufort

Part IV New Developments in Medical Research and Ethical Implications

13 A Paradigm Change in Research Ethics ......................... 155
Rieke van der Graaf and Johannes J. M. van Delden

14 Translation of Cancer Molecular Biomarkers: Ethical and Epistemological Issues ..................... 163
Flavio D’Abramo and Cecilia Guastadisegni
15 Rethinking the Ethics of Human Biomedical Non-Interventional Research. ............................ 175

Contributors

Annelien L. Bredenoord  PhD is an Assistant Professor of Medical Ethics at the University Medical Center in Utrecht. She graduated in theology and political sciences at Leiden University and obtained her PhD at Maastricht University with a thesis on ethical issues at the interface of reproductive medicine and genetic technology. Her current research focuses on the ethics of the novel biosciences, with an emphasis on regenerative medicine, stem cells, genetics/genomics, biobanks, and reproductive technologies. She is currently the PI in projects on the ethics of paediatric biobanks and the ethics of innovative regenerative technologies. She is a member of several committees, among which are UMC Utrecht’s Research Ethics Committee, the Young Health Council of The Netherlands and the Ethics Working Group of the International Stem Cell Forum.

Nunziata Comoretto  MD PhD is a researcher in bioethics and an Assistant Professor. Following her medical studies and her MD in legal medicine at the University of Udine, she received her PhD in bioethics from the Catholic University of the Sacred Heart, Rome. She has been a visiting scholar at the Center for Clinical Bioethics, Georgetown University, Washington D.C. She teaches bioethics and clinical ethics at the Catholic University School of Nursing. She is a member of the Institutional Ethics Committee “RM-H” in Rome. Her research focuses on clinical ethics (especially virtues and end-of-life issues) and research ethics (especially foundational issues).

Flavio D’Abramo  PhD is a researcher in epistemology and philosophy of medicine and biology at the University of Rome, La Sapienza. He was a visiting researcher at the department of Epidemiology and Public Health, Imperial College London, where he utilised a sociological approach to analyse the models and beliefs researchers use and the laboratories practice with which they produce the data. His research focuses on the history and philosophy of biology and medicine, particularly on genetics and epigenetics, and on research and medical ethics.

Manuel Espinoza Silva  MD is a physician. He studied medicine in Peru at the San Marcos University. After completing his clinical training in the medicine of
infectious and tropical diseases, he joined the National Institute of Health in Peru, where he has been the chief of the General Office of Research and Technology since 2011. He completed a Master’s degree in economics in health, and a PhD in medicine at the San Marcos University. He has been the General Secretary of the Peruvian Society of Infectious diseases since 2010.

Duilio Fuentes Delgado MD is a physician. He studied medicine in Arequipa, Peru, at the San Agustin National University. After completing his clinical training in internal medicine at the San Marcos University, he joined the National Institute of Health in Peru, where he is a principal reviewer and inspector of clinical trials in the General Office of Research and Technology. He completed a Master’s degree in bioethics at the Borja Institute and University Lull of Barcelona, Spain. He has been the Chief of the National Centre of Intercultural Health since 2010.

Cecilia Guastadisegni MD MSc DPMSA is a senior researcher at the Istituto Superiore di Sanità, Rome, Italy. She studied medicine at the University of Rome and she received a MSc in toxicology at the University of Surrey, UK. After she had worked for several years on the health effects of environmental pollutants, she got a Diploma in Ethics and Philosophy of Health-care at the Wellcome Trust, London. She joined the Molecular Epidemiology Unit, where she is responsible for the ethics of cancer molecular biomarker research. She works on the history and theory of carcinogenesis. Her ethical research focuses on personalised medicine in oncology and on how to optimise patients’ access to palliative care.

Nuria Homedes MD Dr P.H. is an Associate Professor and coordinator of the Global Health Program at the University of Texas School of Public Health. She has worked for multiple multilateral agencies (World Bank, WHO, UNCTAD), USAID, and the governments of the Dominican Republic, Mexico, Colombia, and Spain. Her areas of expertise include comparative health systems and pharmaceutical policies, with an emphasis on Latin America and the US-Mexico border. Since 1998, she has been the editor of a Spanish electronic bulletin promoting the appropriate use of pharmaceuticals in Latin America (http://www.boletinfarmacos.org). In 2003, she co-founded Salud y Farmacos and in 2007, the Latin American Network for Ethics and Pharmaceuticals. She has worked in the following countries: the Dominican Republic, Costa Rica, Mexico, Peru, Bolivia, Panama, Honduras, Chad, Papua New Guinea, Mozambique, Spain, Colombia, and Guyana.

Kristi Lõuk MA is working as a project manager in the Centre for Ethics, University of Tartu, Estonia. She has Bachelor of Arts and Master of Arts degrees in philosophy from the Department of Philosophy of the University of Tartu. She has been a member of the Research Ethics Committee of the University of Tartu since 2007, and since 2008, a member and secretary of the Estonian Council on Bioethics. In 2009–2011, she participated in the Advanced Certificate Program “Research Ethics in Central and Eastern Europe” at the Union Graduate College, Albany, NY. She works in the fields of research ethics, bioethics and ethics of new technologies.
Fiona McClenaghan  BSc is currently a final-year student in clinical medicine at St Bartholomew’s and the Royal London Medical School in London, UK. She interrupted her medical studies to pursue a BSc in the History of Medicine at the Wellcome Institute for the History of Medicine at University College, London. In 2010, she completed her dissertation on Nazi medical war crimes, focusing on the British response to these events, before recommencing her medical studies. She hopes to continue her research into the ethics of human experimentation during the Second World War in the future.

Gabriela Minaya Martínez  MD is a physician. He studied medicine in Peru at the Federico Villareal University. After completing his clinical training in infectious and tropical illness at the San Marcos University, he joined the National Institute of Health in Peru, where he is a principal reviewer and inspector of clinical trials in the General Office of Research and Technology. He completed a Master’s degree in ethics in health and clinical bioethics at the San Marcos National University, Lima, Peru.

Susy Olave Quispe  PhD Pharm is a pharmacist. She studied pharmacy in Cusco Peru at the San Antonio Abad National University. After completing her training in pharmacoepidemiology at the University of Barcelona, Spain, she returned to Peru in 2000 and worked in a hospital and at the General Directorate of Medicines and Devices of the Minister of Health, where she carried out activities on pharmacovigilance and clinical trials. She finished her PhD with European mention at the University of Seville, Spain, with a visiting research position at the School of Law, Queen Mary, University of London, and she completed her Master’s degree in bioethics and law at the University of Barcelona, Spain. Her research focuses on clinical trials, research ethics and pharmacovigilance. She has been working at the Spanish Medicine Agency focusing on supporting Latin American Regulatory Authorities since 2011.

Ilja R. Pavone  PhD is a researcher of international law at the Institute for International Legal Studies (ISGI) of the Italian National Research Council (CNR), Unit of Bioethics, Research Integrity and Law. He is also Professor of Bioethics at the University of Siena, and a member of the Bioethics Commission of CNR. His research interests in the field of bioethics and international law concern mainly human medical research, beginning of life and end-of-life issues, genetic testing, biotechnologies, and bioterrorism.

Oliver Rauprich  PhD Dipl.-Biol. graduated in biology and received his PhD in philosophy from the Ludwig-Maximilians-Universität München (LMU), in Munich, Germany. He held positions as Assistant Professor in Medical Ethics at the Friedrich-Alexander-Universität Erlangen-Nürnberg and as head of the research group “Justice in Modern Medicine” at the Institute for Medical Ethics and History of Medicine, Ruhr University Bochum, Germany. Currently, he is senior research scholar at the Institute for Ethics, History and Theory of Medicine at the LMU. Research stays brought him to the Kennedy Institute of Ethics,
Georgetown University, Washington DC and to the Program in Ethics and Health, Harvard University, Boston. His main research interests include theoretical approaches to biomedical ethics, especially principlism; allocation and justice in health care; public health ethics; and evolutionary ethics.

Verena Sandow MA is a researcher in medical ethics and applied ethics. Following her studies in philosophy, media studies and economic history at the Heinrich-Heine-University Düsseldorf, she was a member of the research training group “Bioethics” at the International Centre in Science and Humanities, Eberhard-Karls-University Tuebingen. She has been research assistant at the Institute for Medical Ethics and History of Medicine, Ruhr University Bochum since 2010. She works in the field of human medical research, research ethics and especially conflict of interest, and co-organised the conference “Human Medical Research” on which this volume is based.

Mansooreh Saniei is currently doing her PhD in biomedicine and society studies at King’s College, University of London. In her PhD project, she is working on ethics, policy and the regulation of human embryonic stem cell research in Iran (funded by a Wellcome Trust Biomedical Ethics Developing Countries Studentship). She has a background in bioethics from the Erasmus Mundus Masters Program. She also has a Master’s degree in Nursing Education from Shaheed Beheshti University, Iran. Mansooreh has spent five years working as a researcher and counsellor in social policy and ethics in health and medicine at Shaheed Beheshti University, combining this with nursing teaching at different universities in Iran. Her main research interests are the sociology and ethics of bioscience, as well as the regulatory policy of biotechnology in Muslim and Middle Eastern countries.

Jan Schildmann MD, MA is a medical ethicist and physician. He studied medicine at the Charité Medical School, Berlin and received an MA in medical law and ethics from King’s College, University of London. After completing his clinical training in internal medicine, he became head of the NRW-Junior research group “Medical ethics at the end of life: norm and empiricism” at the Institute of Medical Ethics and History of Medicine, Ruhr University Bochum. His research focuses on clinical ethics (i.e. end-of-life decisions, ethics support services), research ethics (i.e. personalised medicine in oncology, conflict of interest) and methodological aspects of empirical medical ethics.

Juan Antonio Senent de Frutos PhD is a lawyer and Associate Professor of Philosophy and Law at the Department of Philosophy and Law, University of Seville, Spain. He works in the field of human rights and current challenges, bioethics and biotechnology, and critical theory of law in Latin America.

Axel Siegemund Dr. phil., Dipl.-Ing. is an engineer and theologian working in the field of environmental and applied ethics with a special focus on social science and technology issues. After his studies of water engineering, history and theology at Dresden Technical University, theological colleges in India, as well as IIT
Delhi, he worked in environmental engineering. Following a lectureship for theology and the ethics of science and technology in Freiburg/Br. and the assistant to the Bishop of the Lutheran Church of Saxony, he is now leading the India Desk of the Lutheran Church of Northern Germany in Hamburg.

**Rael D. Strous** MD is a clinical and research psychiatrist currently serving as the Director of the chronic inpatient psychiatry unit at the Beer Yaakov Mental Health Center and as Associate Professor of Psychiatry at the Sackler Faculty of Medicine, Tel Aviv University, Israel. He completed his medical training at the University of Witwatersrand Medical School, Johannesburg, South Africa. He then specialized in psychiatry at the Albert Einstein College of Medicine, New York, which was followed by a clinical research fellowship in psychopharmacology at the Massachusetts Mental Health Center, Harvard Medical School, USA. He researches and publishes in the areas of psychopharmacology, psychiatric genetics, neuroimaging, epidemiology, PTSD, and ethics.

**Rám N. Sukhai** MD PhD born in Surinam in 1950, did his medical and paediatric training at the University of Utrecht, and paediatric nephrology at the Sophia’s Children University Hospital, Rotterdam (1979–1984). From 1984 to 2000, he was head of the paediatric department of the Zuiderziekenhuis; a general training hospital in Rotterdam. In this period, he also defended his nephro-urological PhD thesis. From 2000 to 2010, he was the head of general paediatrics and of the paediatric residency program of the Leiden University Medical Center. From 2010, he has been involved in paediatric nephrology and partly in general paediatrics.

**Rosa María Surco Ibarra** is a lawyer and psychologist. She studied law at the San Marcos National University and psychology at the Ricardo Palma University, both of them in Lima, Peru. Since 2009, she has been an advisor to the General Office of Research and Technology of the National Institute of Health in Peru, in the clinical trials area. She has completed the course in ethics in research involving human (clinical trials) of the UNESCO Bioethics Network.

**Johannes J. M. van Delden** MD PhD is Professor of Medical Ethics at the medical school of Utrecht University and Director of Education at the Julius Center for Health Sciences. Ever since working as a house officer in an intensive care ward, he has been highly interested in medical ethics. He wrote a thesis on the medical and ethical aspects of Do Not Resuscitate orders. He was also one of the principal researchers of the study of medical decisions concerning the end of life for the Remmelink committee. He was secretary of the International Association of Bioethics. As a full Professor of Medical Ethics, he has built up an academic group within the University Medical Center in Utrecht. The special fields of interest of this group are: research ethics, moral problems at the end of life and moral problems in the care for the elderly. He is currently President of the Council of International Organisations of Medical Sciences (CIOMS).
Rieke van der Graaf  PhD is a researcher in medical ethics. She studied classics and theology at Leiden University. In 2010, she defended her thesis at Utrecht University on “Ethical fundamentals in Human Subject Research. On equipoise and human dignity”. The chapter in this book is based on this thesis. She is currently working as an Assistant Professor at the same university. She is the secretary-ethicist of the UMC Utrecht’s Hospital Ethics Committee (Commissie Medische Ethiek) and a member of the IRB (METC) of the UMC Utrecht. Her current research is on ‘the ethics of innovative designs’, ‘palliative care research’, ‘equitably choosing study populations’ and ‘research with children with cancer’.

Jochen Vollmann  MD PhD is Professor and Director at the Institute for Medical Ethics and History of Medicine and Chair of the Centre for Medical Ethics, Ruhr University Bochum, Germany. He completed a clinical training in psychiatry and psychotherapy at the University Hospitals in Gießen, Munich and Freiburg, and wrote his habilitation thesis on the ethical problems of informed consent in mental health research at the Free University of Berlin. Professor Vollmann was a visiting fellow at the Kennedy Institute of Ethics, Georgetown University, Washington, DC (1994/1995), and visiting Professor at the San Francisco School of Medicine, University of California, at the Mount Sinai School of Medicine, New York (1999/2000), at the Institute for the Medical Humanities UTMB, Texas (2001), and at the Centre for Values, Ethics and the Law in Medicine at the University of Sydney (2004, 2008, 2009, 2010, and 2012). He was honoured with the Prize for Brain Research in Geriatrics by the University of Witten/Herdecke and with the Stehr-Boldt-Prize for Medical Ethics of the University of Zurich. Professor Vollmann’s research interests include informed consent and capacity assessment, mental health ethics, end-of-life decision-making, advance directives, personalised medicine, medical professionalism, clinical ethics committees, and clinical ethics consultation.

Anna E. Westra  MD PhD is a paediatric resident at the Juliana Children’s Hospital in The Hague, The Netherlands. Following her studies in medicine and philosophy at the University of Amsterdam, she worked for four years on a research project addressing the moral limits of medical research in children. This project, which was supervised by two paediatricians and a medical ethicist, resulted in a PhD thesis defended in June 2011. Presently, her main focus is to become a reliable paediatrician. However, she is also highly motivated to continue her research activities in medical ethics. She does so, amongst others, by supervising a PhD student who continues her line of research.

Jan M. Wit  MD PhD studied medicine at Leiden University and specialized in paediatrics and paediatric endocrinology in the Sophia Children Hospital (Rotterdam). Following three years as a consultant paediatrician in Dominica, he became Associate Professor of Paediatric endocrinology at the Wilhelmina Children’s Hospital (Utrecht) in 1981, where he defended his PhD thesis on “Responses to growth therapy” and founded the Growth Hormone Advisory Group. From 1994 to 2006, he was full Professor of Paediatrics at the Leiden
Martín Yagui Moscoso MD is a physician. He studied medicine in Peru at the San Marcos National University and is a candidate for a Master’s degree in hospital epidemiology and hospital-acquired infections at Valparaíso University. After completing his training in clinical pathology at the San Marcos University, he became a Professor in the Faculty of Medicine at the San Marcos National University. He has been a member of the National Institute of Health in Peru for a long time and, during 2009–2010, he was Chief of the General Office of Research and Technology.

Tomasz Zimny MA Law, MA Phil. works as a research assistant at the Institute for Law Studies of the Polish Academy of Sciences. His main areas of interest are patent law and bioethics. Tomasz Zimny graduated in law at the Cardinal Stephen Wyszynski University in Warsaw and in philosophy at Warsaw University. He is currently preparing his PhD dissertation devoted to moral prerequisites of patentability. He is also a trainee attorney at the Polish Bar Association in Warsaw, a lecturer in E-Education in Research Ethics: Central and Eastern Europe Advanced Certificate program, and teaches intellectual property law to biotechnology students at the Warsaw University of Technology.
