Soil Security for Ecosystem Management

Mediterranean Soil Ecosystems 1
Mediterranean Soil Ecosystems (MSE)
Publication of the Soil Science Society of Turkey (SSST)

Editors: Selim Kapur and Sabit Erşahin

Managing Editor
Erhan Akça

International Advisory Board

Ahmet Mermut, University of Saskatchewan, Saskatoon, SK, Canada; University of Harran, S.Urfa, Turkey
Alexander Tsatskin, University of Haifa, Haifa, Israel
Alex Mc Bratney, University of Sydney, Sydney, Australia
Angel Faz Cano, Polytechnic University of Cartagena, University of Cartagena, Cartagena, Spain

Steven Nortcliff, University of Reading, Reading, UK
Takanori Nagano, Kobe University, Kobe, Japan
Tallal Darwish, National Council for Scientific Research, Beirut, Lebanon
Tenghiz Urshadze, Georgian Soil Science Society (GSSS), Tbilisi, Georgia
Tony Koppi, University of New South Wales, Sydney, NSW, Australia
Tsuhigiro Watanabe, Research Institute of Humanity and Nature, Kyoto, Japan
Uriel Safriel, Hebrew University of Jerusalem, Jerusalem, Israel
Winfried E. H. Blum, University of Natural Resources and Applied Life Sciences, Vienna, Austria
Preface

*Mediterranean Soil Ecosystems* (MSE) is a peer-reviewed series of formal scientific publications of the *Soil Science Society of Turkey* (SSST). The SSST was established in 1964 and promotes research into soil science and related disciplines, as well as developing a consensus for soil protection and use to sensitize governments and the coming generations in Turkey.

Mediterranean Soil Ecosystems publishes original and review papers on the global and regional scales concerning theoretical and experimental studies and themes on soil ecosystems, soil and land degradation and desertification, agro-ecosystem management, carbon dynamics and management systems and ancient land use in the Mediterranean environment and context, palaeopedology and geopedology, and the changing soils and soils of tomorrow and their probable use under climate change scenarios. Special sections are devoted to current news from the *International Union of Soil Sciences*, the Soil Science Societies of the Mediterranean riparian countries, and the *Soil Science Society of Turkey* (SSST).

Mediterranean Soil Ecosystems also aims to improve communication and develop holistic integrated approaches among different disciplines seeking the sustainable management of the environment. Contributions are drawn from soil and earth sciences, agriculture, forestry, biology, botany, climatology, ecology, ecological economics, environmental sciences and engineering, environmental law, carbon policies, and information sciences related to environmental integrity. Mediterranean Soil Ecosystems publishes studies by academic researchers and professionals at universities, including those in business, government, research institutes, and public interest groups, presenting a wide range of approaches.

Adana, Turkey, March 2013

Contents

1 Managing Terrestrial Carbon in a Changing Climate ............... 1
Rattan Lal

2 Land Degradation and Security Linkages in the Mediterranean Region ........................................ 19
Winfried E. H. Blum

3 The Role of Soil Information in Land Degradation and Desertification Mapping: A Review .................. 31
Claudio Zucca, Riccardo Biancalani, Selim Kapur, Erhan Akça,
Pandi Zdruli, Luca Montanarella and Freddy Nachtergaele

4 Pedoenvironments of the Mediterranean Countries: Resources and Threats .................................... 61
Franco Previtali

5 Carbon Cycle and Sequestration in Terrestrial Ecosystems with Specific Reference to Mediterranean and Boreal Regions ........ 83
Ahmet R. Mermut

6 Soil and Terroir ....................................................... 97
Edoardo Antonio Costantino Costantini and Pierluigi Bucelli

7 Polygenic Red Calcic Soils in Coastal Middle Palaeolithic Environments, Israel: Taxonomy and Pedosedimentary Reconstructions ........................................... 135
Alexander Tsatskin
Permissions and Credits ........................................ 155
About the Authors .............................................. 157
The Editors Other Books Published by Springer .......... 161
About the Editors ............................................... 163
About the Book .................................................. 167
Contributors

Erhan Akça  Technical Programmes, Adıyaman University, 02040 Adıyaman, Turkey

Riccardo Biancalani  Food and Agriculture Organization of the United Nations, Rome, Italy
