
Science, Technology and Innovation Studies

Series Editors

Leonid Gokhberg
Moscow, Russia

Dirk Meissner
Moscow, Russia

Science, technology and innovation (STI) studies are interrelated, as are STI policies and policy studies. This series of books aims to contribute to improved understanding of these interrelations. Their importance has become more widely recognized, as the role of innovation in driving economic development and fostering societal welfare has become almost conventional wisdom. Interdisciplinary in coverage, the series focuses on the links between STI, business, and the broader economy and society. The series includes conceptual and empirical contributions, which aim to extend our theoretical grasp while offering practical relevance. Relevant topics include the economic and social impacts of STI, STI policy design and implementation, technology and innovation management, entrepreneurship (and related policies), foresight studies, and analysis of emerging technologies. The series is addressed to professionals in research and teaching, consultancies and industry, government and international organizations.

Contents

1	Introduction	1
1.1	Why This Book?	1
1.2	foresight, Foresight—and Foresight for STI	3
2	Foresight for STI: What and Why	9
2.1	The Nature of Foresight and ForSTI	9
2.2	The Origins of ForSTI	14
2.3	ForSTI as a Process	19
3	Initiation: Scoping and Managing ForSTI	21
3.1	Introduction	21
3.2	Twelve Elements of Scoping	23
3.3	Conclusions	42
4	Interaction: Participation and Recruitment	43
4.1	Introduction	43
4.2	Panels: The Heart of ForSTI	46
4.2.1	Working with Panels in ForSTI: Seven Steps	49
4.2.2	Ways of Working with Panels	54
4.3	Common Interaction Methods	56
4.3.1	Brainstorming	56
4.3.2	Mind-Mapping	58
4.4	Conclusions	62
5	Intelligence: Environmental and Horizon Scanning	63
5.1	Introduction	63
5.2	Environmental Scanning	64
5.3	Horizon Scanning	67
5.3.1	Trends	69
5.3.2	Drivers	70
5.3.3	Weak Signals	72
5.3.4	Wild Cards	73
5.3.5	Discontinuities	74
5.4	Tools for Environmental and Horizon Scanning	79
5.4.1	Reviewing	79
5.4.2	Brainstorming for Scanning	81

5.4.3	Surveys	83
5.4.4	Big Data, Bibliometrics and Semantic Analysis	84
5.4.5	Network Analysis	88
5.5	Conclusions	91
6	Intelligence: Delphi	95
6.1	Introduction	95
6.2	Applications of the Delphi Method	98
6.3	Resources Needed for Delphi	99
6.4	Delphi Process	100
6.4.1	Preparatory Work	100
6.4.2	Formulation of Topic Statements	101
6.4.3	Formulation of Questions to Be Asked About the Topic Statements	104
6.4.4	Survey Implementation	105
6.4.5	Analysis and Dissemination of Results	107
6.5	Types of Delphi Surveys	114
6.5.1	“Standard” Delphi 1: Forecasting “What” and “When”	115
6.5.2	“Standard” Delphi 2: Forecasting “How Far”	116
6.5.3	“Impacts” Delphi	116
6.5.4	“Policy” Delphi	119
6.5.5	“Multiple Scenarios” Delphi	121
6.5.6	Other Types of Delphi	122
6.6	Conclusions	123
7	Imagination: Scenarios and Alternative Futures	125
7.1	Introduction	125
7.2	Introducing Scenarios	126
7.3	Scenarios: One or Many?	129
7.4	Methods for Scenario Development	131
7.5	Scenario Workshops	132
7.6	Scenario Approaches	133
7.7	Scenario Building and Analysis in Workshops	143
7.7.1	The Workshop Itself	148
7.7.2	The Post-workshop Phase	163
7.8	Conclusions	166
8	Integration: Modelling	169
8.1	Introduction	169
8.2	Becoming Aware of Modelling in ForSTI	170
8.2.1	Qualitative Modelling Approaches	175
8.2.2	Quantitative Modelling	190
8.2.3	Examples of Models in ForSTI	201
8.3	Conclusions	204

9	From Integration to Interpretation: Translating ForSTI into Strategies	205
9.1	Introduction	205
9.2	Assessment Methods	206
9.2.1	Cost-Benefit and Multi-criteria Analysis	206
9.2.2	Other Assessment Approaches	210
9.3	Prioritisation: Critical Technologies	211
9.3.1	Critical/Key Technologies	212
9.3.2	Applying the Critical Technologies Method	213
9.3.3	Limitations and Potential Weaknesses of the Critical Technologies Approach	223
9.4	Moving on to Interpretation: Roadmapping	223
9.4.1	Format and Architecture of Roadmaps	224
9.4.2	The Process of Roadmapping	228
9.5	Conclusions	234
10	Intervention and Impact: Outcomes, Action and Evaluation	237
10.1	Introduction	237
10.2	Outputs and Outcomes of ForSTI	238
10.3	Reporting on and Disseminating the ForSTI Process and Findings	239
10.4	Influencing Outcomes: Strategies, Actions and Stakeholders	241
10.5	From Intervention to Impact: Evaluation of Impacts	243
10.5.1	Tools for ForSTI Evaluation	244
10.5.2	The Evaluation Process	247
10.5.3	Some Evaluation Experiences	249
10.6	Conclusions	254
11	Conclusions	255
	References	261

Authors

Ian Miles is head of the Laboratory for the Economics of Innovation, Higher School of Economics, Moscow, and Professor of Technological Innovation and Social Change at The Manchester Business School, University of Manchester, UK. He has a BSc (Psychology) and a DSocSci (service innovation) from the University of Manchester. Most of his working life has been spent at Sussex University (SPRU—Science Policy Research Unit) and Manchester (MioIR—the Manchester Institute of Innovation Research, and its predecessor organizations PREST and CRIC). He has numerous journal articles, book chapters, and contributions to reports, in addition to edited and authored books. His first book, *The Poverty of Prediction*, was in the ForSTI area, as have been

several subsequent books and many other publications; more generally, a “futures” orientation is apparent in many of his other works on innovation, emerging technologies, indicators, and knowledge-intensive business services. He is a well-known lecturer and teacher in this area.

Ozcan Saritas is a Professor of Innovation and Strategy at the National Research University, Higher School of Economics, Moscow; a Senior Research Fellow at the Manchester Institute of Innovation Research, University of Manchester; and editor-in-chief of “Foresight”—the journal of future studies, strategic thinking and policy. His research focuses upon innovation and policy research with particular emphasis on socioeconomic and technological Foresight. With a Ph.D. from the “Foresight and Prospective Studies

Programme,” he introduced the “Systemic Foresight Methodology” and has produced a number of publications on the topic. He has extensive work experience with the international organizations including United Nations (UNIDO and UNCTAD), OECD, and the European Commission. He has been involved in large scale national, multinational, and corporate research and consultancy projects such as Research and Innovation Foresight for Europe 2030 (RIF2030); Russian S&T Foresight 2040; European Commission Anticipatory Governance Systems; and Scanning for Emerging Science, Technology and Innovation issues (SESTI) and a Horizon Scanning project for the Rockefeller Foundation on the future of developmental issues. He designs and delivers executive education courses on Foresight and STI Policy. He also delivers lectures on Foresight and Strategic Planning, Technology and Innovation Management, and STI policy and supervises Ph.D. and Masters students.

Alexander Sokolov is Deputy Director of National Research University Higher School of Economics (HSE) Institute for Statistical Studies and Economics of Knowledge and Director of HSE International Foresight Centre. His main professional interests are related to Foresight and S&T and innovation priorities, indicators, and policies. He is a tenure professor at HSE. He teaches Foresight for undergraduate and postgraduate students. He has authored over 120 publications in Russia and internationally and managed many Foresight projects, including Russian S&T Foresight: 2030, Foresight for Russian ICT sector (2012), Innovation Priorities for the Sector of Natural Resources (2008–2010), Russian S&T Delphi Study: 2025 (2007–2008), Russian Critical Technologies (2009), etc. He is a member of several high-level working groups at OECD and other international organizations and serves for advisory boards at several international conferences and journals.
