Lecture Notes in Electrical Engineering

Volume 392

Board of Series editors
Leopoldo Angrisani, Napoli, Italy
Marco Arteaga, Coyoacán, México
Samarjit Chakraborty, München, Germany
Jiming Chen, Hangzhou, P.R. China
Tan Kay Chen, Singapore, Singapore
Rüdiger Dillmann, Karlsruhe, Germany
Haibin Duan, Beijing, China
Gianluigi Ferrari, Parma, Italy
Manuel Ferre, Madrid, Spain
Sandra Hirche, München, Germany
Faryar Jabbari, Irvine, USA
Janusz Kacprzyk, Warsaw, Poland
Alaa Khamis, New Cairo City, Egypt
Torsten Kroeger, Stanford, USA
Tan Cher Ming, Singapore, Singapore
Wolfgang Minker, Ulm, Germany
Pradeep Misra, Dayton, USA
Sebastian Möller, Berlin, Germany
Subhas Mukhopadhyay, Palmerston, New Zealand
Cun-Zheng Ning, Tempe, USA
Toyoaki Nishida, Sakyoku, Japan
Bijaya Ketan Panigrahi, New Delhi, India
Federica Pascucci, Roma, Italy
Tariq Samad, Minneapolis, USA
Gan Woon Seng, Nanyang Avenue, Singapore
Germano Veiga, Porto, Portugal
Haitao Wu, Beijing, China
Junjie James Zhang, Charlotte, USA
About this Series

“Lecture Notes in Electrical Engineering (LNEE)” is a book series which reports the latest research and developments in Electrical Engineering, namely:

- Communication, Networks, and Information Theory
- Computer Engineering
- Signal, Image, Speech and Information Processing
- Circuits and Systems
- Bioengineering

LNEE publishes authored monographs and contributed volumes which present cutting edge research information as well as new perspectives on classical fields, while maintaining Springer’s high standards of academic excellence. Also considered for publication are lecture materials, proceedings, and other related materials of exceptionally high quality and interest. The subject matter should be original and timely, reporting the latest research and developments in all areas of electrical engineering.

The audience for the books in LNEE consists of advanced level students, researchers, and industry professionals working at the forefront of their fields. Much like Springer’s other Lecture Notes series, LNEE will be distributed through Springer’s print and electronic publishing channels.

More information about this series at http://www.springer.com/series/7818
Prevention and treatment of common and widespread chronic diseases is a challenge in any modern society and vitally important for health maintenance in aging societies. Capturing biometric data is a cornerstone for any analysis and treatment strategy. Latest advances in sensor technology allow accurate data measurement in a noninvasive way.

In many cases, it is necessary to provide online monitoring and real-time data capturing to support patients’ prevention plans or to allow medical professionals to access the current status. Different communication standards are required to push sensor data and to store and analyze them on different mobile platforms.

The objective of this book is to show new and innovative approaches dedicated to biometric data capture and analysis in a noninvasive way maintaining mobility. Examples can be found in human centered ambient intelligence or even in methodologies applied in automotive or home automation.

The book is organized in five parts:

- ICT for Health Care
- Embedded Systems for Biometric Data Acquisition
- Biometric Data in Automotive and Home Applications
- Biometric Data Analysis of Cardiac Signals
- Gait Analysis

The book presents a selection of papers presented in the international workshop “Mobile Networks for Biometric Data Analysis” held in Ancona, Italy, during October 30–31, 2014, organized by the Università Politecnica delle Marche (Italy), Hochschule Konstanz (Germany), Hochschule Reutlingen (Germany) approved and financed by DAAD German Academic Exchange Service.

Ancona, Italy  Massimo Conti
Reutlingen, Germany  Natividad Martinez Madrid
Konstanz, Germany  Ralf Seepold
Ancona, Italy  Simone Orcioni
Contents

Part I  ICT for Health Care

The Role of ICT in the Italian Health Care System .............................. 3
Maurizio Ciaschini, Monica De Angelis, Andrea Monteriù,
Rosita Pretaroli, Francesca Severini and Claudio Socci

A Non-Intrusive Model for the Collection and Analysis of Data,
Feedback and Needs ..................................................... 19
Lorenza Lupini and Francesca Scocchera

Analyzing Environmental Conditions and Vital Signs
to Increase Healthy Living .................................................. 27
Ralf Seepold, Christoph Dermati, Artur Kostka, Lars Pfeil,
Ralf Lange, Matthias Hermann and Benedikt Martinez

Preliminary Study of a Novel Shelving System for Nutrition
Habits Measuring ................................................................. 41
Alessandro Freddi, Sauro Longhi, Andrea Monteriù, Davide Ortenzi
and Mariorosario Prist

A Rule-Based Assistant System for Managing the Clothing Cycle ........ 51
Thomas Walzer, Emre Yay and Natividad Martinez Madrid

Part II  Embedded Systems for Biometric Data Acquisition

State of Charge Monitor for Wireless Sensor Networks ..................... 65
Mirko Carloni, Rocco d’Aparo, Pierpaolo Scorrano, Berardo Naticchia
and Massimo Conti

Development of an Algorithm and a Sensor to Monitor
the Heart Rate by Volumetric Measurement Techniques .................. 79
Jens Gansloser and Ralf Seepold
Contents

Piezoelectric Energy Harvesting on Running Shoes .................. 91
Enrico Camilloni, Giuseppe DeMaso-Gentile, Cristiano Scavonelli,
Simone Orcioni and Massimo Conti

Implementing Steganocryptography in Scanner
and Angio-Scanner Medical Images ................................. 109
Indrit Enesi and Blerina Zanaj

Part III  Biometric Data in Automotive and Home Applications

Stress-Aware Generation of Recommendations in a Driving
System to Increase User Acceptance ............................... 123
Emre Yay and Natividad Martínez Madrid

Stress Map Based Information System for Increasing Road Safety .... 135
Patrick Datko, Ralf Seepold and Natividad Martínez Madrid

An OpenCV Based Android Application for Drowsiness
Detection on Mobile Devices ................................. 145
Laura Montanini, Ennio Gambi and Susanna Spinsante

Distributed Speech and Speaker Identification System
for Personalized Domotic Control ................................. 159
Giorgio Biagetti, Paolo Crippa, Laura Falaschetti, Simone Orcioni
and Claudio Turchetti

Part IV  Biometric Data Analysis of Cardiac Signals

Surface EMG Fatigue Analysis by Means of Homomorphic
Deconvolution ................................................... 173
Giorgio Biagetti, Paolo Crippa, Simone Orcioni and Claudio Turchetti

sEMG-Based Evaluation of Muscle Recruitment Variability
During Walking in Terms of Activation Length and Occurrence
Frequency ................................................... 189
A. Mengarelli, E. Maranesi, L. Burattini, S. Fioretti and F. Di Nardo

High Performance Dynamic Threshold Calibration for RR Interval
Detection in a QRS Complex Using a Parallel Programing ....... 205
Mohammed Rajab and Ralf Seepold

An Analog Front-End for Combined EMG/ECG Wireless Sensors .... 215
Giorgio Biagetti, Paolo Crippa, Simone Orcioni and Claudio Turchetti

Stress Determent via QRS Complex Detection, Analysis
and Pre-processing ................................................... 225
Wilhelm Daniel Scherz, Juan Antonio Ortega, Ralf Seepold
and Natividad Martínez Madrid
Health Monitoring in Sport Through Wearable Sensors:  
A Novel Approach Based on Heart-Rate Variability ............... 235  
E. Maranesi, M. Morettini, A. Agostinelli, C. Giuliani, F. Di Nardo  
and L. Burattini  

A New Segmented-Beat Modulation Algorithm for Maternal  
ECG Estimation from Abdominal Recordings .................. 247  
A. Agostinelli, C. Giuliani, S. Fioretti, F. Di Nardo and L. Burattini  

Part V Gait Analysis  
Webcam and Smartphone for the Measure of Spatial-Temporal  
Parameters of Gait for Treadmill Use .......................... 261  
Vinicio Barone, F. Verdini, F. Di Nardo, E. Maranesi, L. Burattini  
and S. Fioretti  

The Wireless Surface Electromyographic Technique for Supporting  
the Assessment of Fall Risk in Diabetic Neuropathic Patients ...... 273  
E. Maranesi, S. Fioretti, V. Barone, G.G. Ghetti, O. Mercante,  
R.A. Rabini, L. Burattini and F. Di Nardo  

A Method for Computing the Functional Ambulation Profile  
Score by Stereophotogrammetric Data .......................... 285  
E. Maranesi, M. Petrini, G.G. Ghetti, O. Mercante, V. Barone,  
L. Burattini, F. Di Nardo and S. Fioretti  

Fall Detection Using Wearable Accelerometers and Smartphone .... 299  
Luca Basili, Giuseppe DeMaso-Gentile, Cristiano Scavongelli,  
Simone Orcioni, Stefano Pirani and Massimo Conti  

Step Length Estimation for Freezing of Gait Monitoring  
in Parkinsonian Patients ............................................ 313  
Lucia Pepa, Marco Rossini, Luca Spalazzi and Federica Verdini
